 11 2/3 **CCW** magnetic bottom spirals. Now, we have different variations. This would

Page: 33

 11 2/3 **CCW** magnetic bottom would be 21 2/3 CW, and this

 11 2/3 **CCW**. Their bottom spiral is the same as the top spiral

 21 2/3 **CCW**. It's interesting ... the differential field of a density shield

 have the female **CCW** magnetic monad, at DI3, and it creates a deflection field,

Page: 34

 supposed to spin **CCW**. That's just the natural structure of the mathematics and polarity

Page: 35

 This meant, a **CCW** rotation in phantom. And it lost a third of the

 7 7/9 **CCW**, again 2/3 of the natural spin. The differential between

Page: 36

 if it's going **CCW**. It will suck energy in. The wormhole did begin to

Page: 41

 parallel, on a **CCW** spin, then they were going to hit - you know

Page: 43

 drawing, because it's **CCW**, drawing into itself, eating itself, and expanding itself by eating

Page: 44

 to have a **CCW** rotation on the D2 axis of this planet. We have

Page: 45

 of the 34 **CCW** and 21 CW vortices, the original ones. The reason those

Page: 46

 one, the 22 **CCW** one here. Then you have this third pyramid. Here's its

Page: 47

 vortices, the 34 **CCW** in the pcm universe, and the 21 CW in the

Page: 48

 creates a 13 **CCW** merkaba peripheral field. So, you have the 13, you have

Page: 49

 as a 34 **CCW**, and this one started out as a 21 CW, but

Page: 50

 simultaneously, the 34 **CCW** and 21 CW, and then this system was put in

 on a 21 **CCW** rotation, so the shield itself was rotating CCW. That generated

 itself was rotating **CCW**. That generated into the partike universe a 21 CW reversed

 one, the 21 **CCW** arc 5 shield generated into the partike universe a virtual

 means it spins **CCW** in the actual field. That's another little trick the others

Page: 51

 merkaba in a **CCW** rotation, because we know CCW vortices are good and they

 because we know **CCW** vortices are good and they bring life force in." They

 spin your merkaba **CCW**, and you're actually generating the opposite field. But they don't

 S spins 21 **CCW** and that one generates this way. So, the arc S

 universe a 34 **CCW** virtual vortex. So, this is where these first vortices are

 with the 34 **CCW** rotation. And these were set, the 34/21 were set

Page: 52

 vortex here spins **CCW**, generated by the spin of the little hijacked seed atom

 particle universe 34 **CCW** vortex. This is showing the Earth. If we're looking at

Page: 53

 creates an unnatural **CCW** running electromagnetic, and they said it was carried in positrons

Page: 55

 a wormhole going **CCW** inside of a larger spiral going in the other direction,

 11 4/9 **CCW** rotation, and it had reduced the main spiral into 11

 10 7/9 **CCW** ~ 11 4/9 CCW. So there's the math on

 11 4/9 **CCW**. So there's the math on those. But this is called

 the other going **CCW** in the same place. They reach a static point where

Page: 56

 **CCW** magnetic field. Now what this does, in relation to the

 only, if it's **CCW** suck energy in, or if its CW push energy out.

 11 4/9 **CCW**, and the top spiral 11 4/9 CW with this

Page: 57

 their full 34 **CCW** over on this side and 21 over on the other

 4/9 wormhole **CCW**, 11 4/9 top spiral CW. So, they stopped. The

 7 7/9 **CCW**. The shield stopped spinning when the top spirals did. It

 the shield rotated **CCW**, when it was supposed to rotate CW. The density shield

 was reversed to **CCW** at 7 7/9, which was the speed that the

Page: 58

 to a 34 **CCW** same spin spiral set, and it would be happening over

 7 7/9 **CCW** like the bottom spiral and the top spiral stopped, it

 natural CW to **CCW**. The D3 shield also reversed from CW to CCW, following

 from CW to **CCW**, following the spin. The density shield also reversed to CCW.

 also reversed to **CCW**. But, when this process was set in motion, the D2

 held in its **CCW** position, because it would normally be CCW spin. So it

 would normally be **CCW** spin. So it was held there. All the rest was

 reverse to a **CCW** spin, following the spin of the bottom spiral, and you

 them all going **CCW**, and it meant that the physical, the D2 elemental body

Page: 59

 4/9 frequency **CCW**, joined with the 11 4/9 CCW frequency of the

 11 4/9 **CCW** frequency of the wormhole, and that took the rest, very

Page: 60

 7 7/9 **CCW** with negative charge. A negative charge and negative charge repel

 the 34 vortex **CCW** in the partium universe. We have the 21 CW in
