 bit about the **Milky Way** mysteries and we need to understand just a little

 more about the **Milky Way** connection to the Bloom of Doom as they've recently

 wrong with the **Milky Way**? Now, science tells us that the Milky Way galaxy

 us that the **Milky Way** galaxy appears to have at its core a massive

 larger than the **Milky Way** but at a different ARPS that allows a connection  
 Galaxy because the **Milky Way** literally fell, piece by piece actually, to become what  
 is now the **Milky Way** Galaxy. That is not a natural configuration. That should  
 from that the **Milky Way** actually separated where a part of that galaxy actually  
 to become the **Milky Way** Galaxy. And they are still connected. They are connected  
 to allow the **Milky Way** to hopefully, eventually evolve back in to the Andromeda  
 Galaxy, but the **Milky Way** is going into fall. And what that means is  
 here in the **Milky Way** Galaxy plane. So the information they've been giving me  
 somewhere around the **Milky Way** and connects us there, we just don't see it,

 that formed the **Milky Way** galaxy, literally formed it. This process began with the  
 when understanding the **Milky Way** galaxy, because this is all about the Milky Way  
 all about the **Milky Way** galaxy. So, I wanted to show you where the,

 Earth and our **Milky Way** system They had just begun that in Tribes 8  
 our galaxy. The **Milky Way** is part of that. It fell from there. Not  
 a time our **Milky Way** system was a part of the M-31 system  
 here in the **Milky Way** Galaxy and the M-31 galaxy. It also got  
 for the entire **Milky Way** system. It was the host link. It is through  
 31 and the **Milky Way**. The Milky Way is plagued by something called the  
 Milky Way. The **Milky Way** is plagued by something called the Procyak Matrix. This  
 is when the **Milky Way** became independent in space-time from the M-31

---

Page: 4

 center of the **Milky Way** galaxy that even science knows is there. So, they

---

Page: 6

 out of the **Milky Way** that can come out now, it would have gone

---

Page: 7

 level host-the **Milky Way** host. And this doesn't mean that the whole Milky  
 that the whole **Milky Way** plane is going to shift itself back up into  
 is falling. The **Milky Way** Galaxy is a phantom system at this point. It  
 systems in the **Milky Way** that will now have the opportunity to have portions  
 little phantom fallen **Milky Way** Galaxy that used to be part of M-31,

mess of the **Milky Way**, that a portion of the natural M-31 codes

 known as the **Milky Way**, which is not a natural phenomenon, it's something that  
 even though the **Milky Way** will fall, even though yes, we are now in

 we're in the **Milky Way** galaxy in one of the outer arms over here.  
 us how the **Milky Way** and M-31 actually fit together, and where the  
 still in the **Milky Way**. Then, there's another stage where the AdorA side goes

---

Page: 20

 and you know, **Milky Way** and M-31, so you could see what larger

---

Page: 21

 M-31 and **Milky Way**. The Milky Way part is falling, M-31 is  
 Milky Way. The **Milky Way** part is falling, M-31 is not It is  
 chair or the **Milky Way** galaxy and M-31. Now, light-years is basically

 is from the **Milky Way**. After that, the Milky Way will continue its way  
 After that, the **Milky Way** will continue its way toward its black hole center  
 history that the **Milky Way** will follow, but it's not going to all happen  
 worry about the **Milky Way** exploding tomorrow or anything like that. It's a very  
 time before the **Milky Way** finishes its thing. And, our sun will finish its  
 the time the **Milky Way** does its thing, or as far as going into  
 31. And, the **Milky Way** system is a time warp distortion phantom system that

---

Page: 23

 this is the **Milky Way**, used to be part of M-31. Pro-sEda  
 in with the **Milky Way** shift Now, we'll see here what we're going to

 part of those **Milky Way** gates. The Milky Way gates still had a chance  
 Way gates. The **Milky Way** gates still had a chance of being brought back  
 to bring the **Milky Way** back into M-31, gently. Uh, we're not going  
 to eat the **Milky Way**. They were planning to eat the Milky Way galaxy  
 to eat the **Milky Way** galaxy as energetic food, which will prevent them from  
 M-Gates are **Milky Way** Galaxy gates Now these are the ones that at

 fallen portions of **Milky Way** M-gates These were partially fallen They are fallen Phantom.  
 fallen Phantom. The **Milky Way** became, 350 billion years ago, a Phantom Matrix to  
 to become the **Milky Way** tilted into this, and again, this is that same  
 much of the **Milky Way** back into the natural ARPS, so it could be

 obviously in the **Milky Way**? I'll show you. This is why Earth has been  
 arcs, of the **Milky Way** system, the Procyak system, back to life So part  
 salvage of the **Milky Way** system as could be done. Ok, I don't think  
 So, this is **Milky Way**. This is M-31. M-31, number 3, is  
 have, in the **Milky Way**, Earth. Right there. That has been the one that

 phase in the **Milky Way** system And when they phase, they won't be able

 connected into the **Milky Way** system Right in the atmosphere around it, you have

 lock of the **Milky Way**. So, from here, right here, from Altair and through

 to get the **Milky Way** arcs phasing, at least whatever portions of them can

 all over the **Milky Way** that can still hold enough of a Krist frequency,

---

Page: 31

---

 like in the **Milky Way**, we have this connection, which is this one, the

 far as the **Milky Way**, this chamber activating is activating the Cloak of Arcturus,

 portions of the **Milky Way** system as well. And, it creates what is called

 instead of the **Milky Way** Procyak tilt. So it's literally the beginning of learning

 of the Procyak **Milky Way** fall path. It cloaks you from the F7 Arcturian

 the one-third **Milky Way** lotus arcs for the two thirds Krist Aqua"elle Host

 This is the **Milky Way** star gate 3 and the solar planet host line

 Procyak Matrix, the **Milky Way**'s host, all of those things. And that there was

 center of the **Milky Way** that holds the black hole connections there. And then

---

Page: 65

---

 would allow the **Milky Way** to tilt back, the part of it that could

 from, because the **Milky Way** fell from that system. The Milky Way galaxy is

 that system. The **Milky Way** galaxy is not really called the Milky Way. That's

 really called the **Milky Way**. That's what it was named down here; it's called

---

Page: 66

 this that the **Milky Way** host was enabled, the potential was enabled. And it

 Milky Way, the **Milky Way** gate 3. Now, Urtha is gate 3, the original  
 known as the **Milky Way**. So, the Milky Way gate 3 that was connected  
 Way. So, the **Milky Way** gate 3 that was connected to the natural gate  
 2 in the **Milky Way**. It was a place called AshaLA. So AshaLA was

---

Page: 70

 are doing the **Milky Way** pullback. They need our help in doing that. And  
 rest of the **Milky Way** and the host would not be able to be

---

Page: 75

---

 Galaxy that the **Milky Way** was a part of This is the tilt that  
 center of the **Milky Way** Galaxy. And it pulled more out of each density  
 axis of the **Milky Way** in relation to the axis, the natural axis of  
 refer to the **Milky Way**. The A gates refer to Aquinos, which is the

---

Page: 76

---

 center of the **Milky Way**, and on this side we have F gates, which  
 alignment through the **Milky Way** wormhole set-up into those gates, and they are  
 more of the **Milky Way** gates into it, and built their own. And they

---

Page: 78

---

 literally holds the **Milky Way** in phase lock, and then there's the one White

---

Page: 81

---

 in-like the **Milky Way** will tilt more, what's left of it And what

---

Page: 82

---

 a sovereign fall **Milky Way** Galaxy-where it wouldn't be eaten alive by another

---

Page: 96

 to AshaLA-3, **Milky Way** number 3. So AshaLA is the first stage, that

---

Page: 102

---

 that is the **Milky Way** plane that runs through that. So this shows our  
 tilt, and the **Milky Way** itself is going to tilt further And it will

 center of the **Milky Way** where it interfaces with the Wesa system So, we'll

---

Page: 106

---

 saying in the **Milky Way** level to interface between Earth and AshaLA. So when

---

Page: 114

---

 evening in the **Milky Way**. And it's not a bad thing, it's a good

---

Page: 117

---

 to harness the **Milky Way** actually because of the position that Earth has in

---

Page: 121

---

 left before the **Milky Way** Host was over, and nothing that could ascend was

---

Page: 122

---

 happening in the **Milky Way**. There is an equivalent on the galactic level of

 tonight in the **Milky Way** there is the first installment of the activation of

 Grids on the **Milky Way** level. We have a choice. We've been offered a

 through from the **Milky Way**. And they will activate. I mean, it's automatic. It's

---

Page: 124

 relation to the **Milky Way** problem was planted in here during those very early

---

Page: 128

 plugging into the **Milky Way** Procyak mess of the Daisy of Death stuff, and

 that allows the **Milky Way** Host to run. So they're still trying They're not

 Earth-in the **Milky Way**, in our galaxy. Yeah. And it will be the  
 Cycle from the **Milky Way** and it is not just for us on Earth,  
 places within the **Milky Way** galaxy. So what we'll see toward the end of  
 relationship to the **Milky Way** galaxy and the Milky Way galaxy's relationship to M-  
 galaxy and the **Milky Way** galaxy's relationship to M-31, which is what our  
 Veka Maps. The **Milky Way** is a phantom fall from that system. So when  
 anything in the **Milky Way**'s natural pathway home is back through M-31 and  
 now called the **Milky Way** galaxy occurred. And from that time there has been  
 occurred in the **Milky Way** galaxy. And ... yeah. So I'm going to be

---

Page: 4

---

 is for the **Milky Way** itself. It doesn't mean science is going to watch  
 as the whole **Milky Way** goes back up into M-31. That's not going  
 to happen. The **Milky Way** ... about a third will be capable of it.  
 portion of the **Milky Way** is literally starting to shift back into natural alignment  
 have been the **Milky Way** system, the complete Milky Way system. As we'll see  
 system, the complete **Milky Way** system. As we'll see in the maps that the

---

Page: 8

---

 deal with the **Milky Way** when we talk about the Daisy of Death, and

---

Page: 17

---

 core of the **Milky Way** Galaxy. So we'll see how all of those things  
 this system, this **Milky Way** system goes into quarantine, and there will be no  
 portions of the **Milky Way** that can still hold a Krystic BPR. A hosted  
 to become the **Milky Way**. So we'll see. That's later workshops they said. But

---

Page: 20

 involved the whole **Milky Way**, it became obvious that, well ... the Milky Way

 well ... the **Milky Way** fell a lot longer-you know way before that.

 but in the **Milky Way**. So this is really exciting. Next one please. [

 same for the **Milky Way** Galaxy. That after that 223-year period that we've

 center of the **Milky Way**, will be shut. Which means this, the **Milky Way**

 means this, the **Milky Way** System won't be eaten by what were called the

 from the entire **Milky Way**, that have the potential. That doesn't mean a third

 position in the **Milky Way** before that? And that is a star that is

 Galaxy. Now, the **Milky Way** Galaxy is what is called a Phantom Galaxy. It

 M31, and the **Milky Way** Galaxy. And all of that gets into very intense

 with the Procyak **Milky Way** that had to do with tilting back to get

 holding, in the **Milky Way**, Universal Star Gate 3 position, and that star is

 here in the **Milky Way** System, back up to where you came from in

 everything in the **Milky Way**, originally-well, I won't say everything in the **Milky**

 everything in the **Milky Way** came from here because, the original things in the

 things in the **Milky Way** came from M31. There have been many things that

 is shifting that **Milky Way** sheathe off of us where we can get free

 It is the **Milky Way** system, because it is becoming a closed system after  
 one is our **Milky Way**. Our Milky Way Galaxy has fallen It used to  
 Milky Way. Our **Milky Way** Galaxy has fallen It used to be a part  
 Galaxy and the **Milky Way** Galaxy are going to collide. Because space keeps expanding,  
 And basically the **Milky Way** is going to get swallowed by Andromeda again I  
 so indeed the **Milky Way** could naturally evolve back into the M31 system What  
 years rotate the **Milky Way** back into its natural alignment with M31, the ones

 M31 and the **Milky Way** twist. They would go together, because they are actually

 programs of the **Milky Way** system, which means we are stuck in the Milky  
 stuck in the **Milky Way** system still. Even though we've opened up all these  
 stuck in the **Milky Way** system In order to be able to get ourselves  
 not with the **Milky Way** system. We need to align with the Andromeda system,  
 to become the **Milky Way** system So, it's literally completely changing our alignment back  
 Say, if the **Milky Way** was pointed this way, your Ah-VE"-yas would

---

Page: 47

 shift from the **Milky Way** set of coordinates into the M31 set of coordinates.  
 say "and **Milky Way**" yet This is just showing the alignments that are

---

Page: 49

 structure of the **Milky Way** Galaxy, because it has a tilted-its whole Kathara  
 that, where our **Milky Way** is in relation to that. So, we have the

---

Page: 50

---

 arm of the **Milky Way** Galaxy, and they are actually part of our more

---

Page: 51

---

 progress into the **Milky Way** Galaxy. Next one please. Now, I'm going to keep

 now with the **Milky Way**. So, Meta-GalacticG. Here we've got Galactic -12,

---

Page: 52

---

 very close, our **Milky Way** alignment is extremely close to this one. And there's

 Not in the **Milky Way** I (laughing) Oh boy. Next one please. Now

 not even doing **Milky Way** yet, just the M31 system It is still holding.

 bit more about **Milky Way**. We'll see how much more fun the backgrounds become

 each have a **Milky Way** system, because this one has split. So what we're

 is where the **Milky Way** comes in. And it changes the relationships between all

 yet with the **Milky Way** on this side. And we're not seeing what is

 shift into the **Milky Way** alignment and into the Black Hole alignments. The MCEO

---

Page: 54

 Once we see **Milky Way**, we'll understand where Parallel Earth is as well, because

 are called the **Milky Way** Meta-Galactic Numbers, where all these numbers on the

 relation to the **Milky Way** Meta-Galaxy. Here is Urtha, still over in the

 here, in our **Milky Way** system, where the natural axis for Meta-Galaxy-6

 So, this was **Milky Way** Meta-Galactic-1. So that was Milky Way Meta-

 So that was **Milky Way** Meta-Galactic-12 over here. And check out where

 Hole system Our **Milky Way** is actually running this line right here, when it

 Galaxy-6, but **Milky Way** Meta-Galaxy-6, because we're still caught in the

 here too, a **Milky Way** version over in the Parallel Veka, which means more

 here is our **Milky Way** system, that's at that different angle-its 12 should

 existing in the **Milky Way** Galaxy, no in the Andromeda Galaxy, but is actually

 pictures of the **Milky Way** that are drawn like this, they are-this is

 actually plot the **Milky Way** in relation to our Meta-Galactic Shield, that implies

 Galaxy than the **Milky Way** Galaxy. It's close. It's our closest neighbor and it's

 to eat the **Milky Way**, according to science-kind of like, it already kind

---

Page: 57

---

 here is the **Milky Way**. This is our Meta-Galaxy-6, Milky Way Galaxy-  
 Meta-Galaxy-6, **Milky Way** Galaxy-6, Meta-Galaxy-6, Galaxy# 1, Solar System-  
 center of the **Milky Way** would be the center of the Meta-Galactic Procyak  
 heart of the **Milky Way**. Now these were excerpts that were from a book  
 heart of the **Milky Way** and this over here-where they talk about Sagittarius-  
 arms to the **Milky Way** Galaxy. The outermost one is the Perseus, I believe,  
 arms of the **Milky Way** system, spinning around the Core. Now, this shows them  
 heart of the **Milky Way**, it's there, that little box. If we're talking about

---

Page: 58

---

 galaxies, where the **Milky Way** is here. There's a couple of little guys around  
 relationship between the **Milky Way** Galaxy and Andromeda Galaxy. What that is showing you  
 which means our **Milky Way** is directly connected to them. I imagine, hmmm, if  
 relation to our **Milky Way** and Andromeda and that kind of thing. But this

---

Page: 59

---

 center of our **Milky Way**. That's where you've got the Sagittarius star systems and  
 core of the **Milky Way**. And then progressively working out, it would give you  
 center of the **Milky Way** system. Over here is the still natural structure, which  
 -we're in **Milky Way**, so the Milky Way Meta-Galactic #1 alignment...  
 Way, so the **Milky Way** Meta-Galactic #1 alignment... No, its number is

---

Page: 60

---

 It is the **Milky Way** set, those extra twisted balls that come off each  
 rest of the **Milky Way** entirely into the alignment that will ultimately lead into  
 Galaxy-6 into, **Milky Way** Meta-Galaxy-6, into M31 Meta-Galaxy-6 alignment-

---

Page: 61

---

 We have the **Milky Way**, it's off-kilter and we happen to live there,

---

Page: 63

---

 coming from the **Milky Way** Galaxy. We have some ... we have begun to

---

Page: 64

---

 down in the **Milky Way**, there's collections of Suns. This would just be in  
 way through. The **Milky Way** is twisted basically, because it should be getting information  
 down into the **Milky Way** System. And this is the system that interfaces directly

---

 we're in the **Milky Way**, there's all sorts of twists and blockages. Here would  
 have of the **Milky Way** System. So this you could say is our Living  
 is our Living **Milky Way** Memory Matrix happening over here. And over here is  
 they're tilted the **Milky Way** way, and that's not the way they need to

---

 locked into the **Milky Way** System. It's also why the Mind is phase-locked  
 in to the **Milky Way** System. Where the neuro-networks that would normally go  
 because of the **Milky Way** block. So as we open the connections and begin  
 this would be **Milky Way** Meta-Galactic-12 would be over here. We're The

---

 but because the **Milky Way** is split off from the Meta-Galactic-6, we  
 down into the **Milky Way**. But the Meta-Galactic Shield should align at 15  
 Shield. So instead, **Milky Way** Galactic-1 aligns, placing this point, Veca 58 in  
 head, and the **Milky Way** Meta-Galactic-58 Procyon Black Hole connection, in the

---

 center of the **Milky Way** one. So 6A. I believe MG-6A is up  
 us, is the **Milky Way** one. So we're literally phase-locked in to the  
 in to the **Milky Way** structure It's controlling our Living Memory Matrix and what

---

 is where the **Milky Way** one would be with its twist And here the  
 with putting the **Milky Way** right at the center where it's controlling the Pineal

---

 got the from **Milky Way** Meta-Galactic-12. Now this interfaces directly. This goes  
 68, which is **Milky Way**. "8" refers to the Milky Way one. So  
 refers to the **Milky Way** one. So they come out here, and they actually  
 which would be **Milky Way** Meta-Galactic-5 encryption, and Milky Way Meta-Galactic-  
 5 encryption, and **Milky Way** Meta-Galactic-6 encryption, they actually exist as certain

---

 which is the **Milky Way** one. Corresponds with the right side of the brain.

---

 is this the **Milky Way** here? Wait a minute. This is the way it's  
 where we have **Milky Way** Galactic-1 Alignment over here. It's a shift, a  
 the center, the **Milky Way** Shield. And the natural one is back here behind  
 it's literally, the **Milky Way** Shield is controlling the entire apparatus of the tool

---

Page: 75

---

 center of the **Milky Way** Galaxy-or Milky Way Meta-Galaxy-which is the  
 Way Galaxy-or **Milky Way** Meta-Galaxy-which is the Procyak Black Hole System.  
 here, is the **Milky Way** Galaxy. This one here. Now, what this red one  
 and through the **Milky Way** Black Hole. The Procyak Black Hole at the center  
 center of the **Milky Way**. They can then also simultaneously beam it through Andromeda-
