 before the Aqualene **Sun** field is activated to buffer it. So, I imagine there's

Page: 96

 in the Aqualene **Sun** activation of the Rashalae body, it means turning on these

coming off the **Sun** because of it going to its barboah stage with compaction

 happening on the **Sun** ... it's like, at this point it's not something we're

 with the Aqualene **Sun** it will progressively help our bodies to transmute that stuff

 a host Our **Sun** that we see is called Sol, and it is hosted

 just on the **sun**-side, which scientists place at about 60,000 km up. That

 which is our **sun**. Which means this system will no longer be an ascension

Page: 266

 between Sol, our **Sun**, and Sala-4 which is the larger host body of

 matrix that our **Sun**, Sol, is hosting into. So literally, this is for our

Page: 270

 Earth and our **Sun**, which means the entire Solar Plane, so the other planets

 called the Aqualene **Sun**. And we will talk about that part tomorrow, because that

Page: 280

 the "Aqualene **Sun**" which is a certain set of Radial Body Activations that

 of the Aqualene **Sun** Host that is needed to get Earth through Starfire So,

Page: 281

 into the Aqualene **Sun** which makes it even stronger, which means anything that bounces

 levels on Sol, **Sun** and Sala. So, we are participating in an event that

 star or a **sun**, certain reality fields that have to do with the coronasphere
 that means the **sun** is inhabited too The The MCEO Freedom Teachings® Series

Page: 295

 which was our **sun**-was hosted into Sala gate-4 So, that's some of

Page: 296

 called the Aqualene **Sun** that forms through, first the Krystal River has to activate,
 suns. Ok? The **sun** levels-these have to do with currents that have to

Page: 297

 .. it's our **Sun** that is hosting in Sal a. And from there it

Page: 324

 calling the Aqualene **Sun** activations that have to do with the activations that weren't

Page: 327

 known as the **Sun** of God body, and it is a large sun. But
 is a large **sun**. But it's a fascinating thing that's built on this. I

Page: 328

 domain of the **Sun** of God or Krystar body. That, I believe, is where

Page: 337

 sons to the **Sun** of God, or the seven sisters. Even though they're both

Page: 339

 orbiting around our **Sun**. What is our Sun doing in relation to the Kathara

 What is our **Sun** doing in relation to the Kathara grid that is the

Page: 343

 like on the **Sun**, there are beings that live in those bands on the

 bands on the **Sun** and they do communicate with us and not all of

Page: 345

 from under the **Sun** and Earth, once Urtha and Sal a go in for

Page: 349

 in the Aqualene **Sun** So now we're going to, we've got our keys, we

 in the Aqualene **sun** of the Aquious Matrix to assist in the host that

 of the Aqualene **Sun** into the stream that's running in the center of the

 some point our **Sun** would get to be an old star and it would

 when the Aqualene **Sun** was activated in response to that for protection, we have

 around Sol, the **Sun** in relation to Shala-14 where it will create a

 of the Aqualene **Sun** already, you know, activating So they haven't said there is

 in what the **Sun** cycles are doing that science knows already that there is

 know why the **Sun** is going to be doing strange things. You will be

 with the Aqualene **Sun** Field activations that are happening in the Indigo Shield. Once

 of the Aqualene **Sun** if we are going to be able to help anybody

 protect people from **sun**-burn in the next 50 years for sure. There will

 off by the **Sun** cause the type of radiation is going to change. And

 It's in the **Sun** and it goes out into our universal matrix, our Veca

 because when the **Sun** starts to go into its Nova phase, it will progressively

 as a central **sun**, and then maybe as a star, where you know yourself
 the four inner **sun** bodies of the Rasha body. When it expands out in

Page: 72

 we call our **sun**, down here. Um, because that was set in 550 million

Page: 74

 gates of our **sun**, all right They didn't fully succeed but they ended up

Page: 75

 on the Aqualene **Sun** activations of the Rasha bodies to just simply go in.

 a big bright **sun** that color. We just go in and do a projection

 to like Aqualene **sun** and what it will do is, well, I had to

Page: 78

 for, when the **sun** does its thing in about 250 years where it's going

Page: 79

 will follow the **sun** at that point And the ... anything that is left

Page: 80

 wrong with the **sun** and it's going to probably be before that they realize

 wait until the **sun** starts throwing spots at us. We'll wait until people are

 very big Aqualene **Sun** that turns into a ball of spinning LaVa, love ...

Page: 162

 radiation from a **sun** light into usable Joule energy. This is just the beginning

Page: 169

 burst from the **Sun**. This has to do with the fact that on the
 Bodies. So our **Sun-** and this was a big change in the entire drama

Page: 170

 have enough Aqualene **Sun**. Now Aqualene Sun is a frequency that has been progressively
 Sun. Now Aqualene **Sun** is a frequency that has been progressively activated through

 cycle of this **Sun** occurs. Science here knows about star death, as they call
 some day our **Sun** was going to die. Well if it didn't, if this
 centre of a **sun** and that has to do with how much mass the
 much mass the **sun** has etc, etc What science doesn't recognize yet is, when
 wasn't forced Our **Sun** was forced into a Bardoah cycle by the Bourgha of
 from hitting the **Sun** and going right through into Mercury-Venus-Earth. Because what
 place between the **Sun** and any of the planets or stars that are in
 that point our **Sun** is going to enter what is called the Nova cycle.
 to that Central **Sun**, if the Central Sun is going Nova. And during that
 if the Central **Sun** is going Nova. And during that period the gamma bursts
 coming from the **Sun-** there were different types of gamma bursts- and they will
 cycle where the **Sun** plumps out, or expands, to like a red giant and

Page: 171

 showed the Aqualene **Sun** image- they want me to shift gears cause they said

 period before our **Sun** enters its Nova stage where it will send frequencies that
 burst that the **Sun** would be emitting, and that would actually back trail up

Page: 180

 it knows its **Sun** is going into Nova cycle at the end of the

 but it's our **Sun** that is going, you know finishing Bardoah in 250 years.

 enough when the **Sun** is beaming at you but when you're sitting on a

Page: 182

 that became our **Sun**, and our Solar System was hosted in through those two-

Page: 183

 form an Aqualene **Sun** Field, they open up a Slide Zone. The first level

Page: 187

 updated on the **Sun**, and those kind of things, we are not going to

Page: 190

 Not Sol our **Sun**, the bigger one that our Sun is hosting in which

 one that our **Sun** is hosting in which is Sala, which is also still

 into a large **Sun** Field of energy, like Living Light energy. And when that

Page: 210

 about when the **Sun** finishes its Bardoah cycle, there is that last Bardoah Wave

Page: 213

 Sol, our Central **Sun**. So, it's not like ... the, that Earth communication was

Page: 214

 such as a **sun** or planet, you have four sets of these 15-geleziac

Page: 217

 here. The Aqualene **Sun** Gyrodome fields that we're activating will hold Earth from going

Page: 218

 come from the **Sun**. So, anyway, we jump the Aurora Platforms The activations we're

Page: 220

 we do Aqualene **Sun** activations, RaSha body progressive activations, what we're doing is the

Page: 221

 center of a **sun**, and coming out into what look like Aquifer fields, and

 and that's the **Sun** that goes with Urtha. Not the Sol window, because Sol's

Page: 229

 about what Aqualene **Sun** activation levels are, "cause that just has to do

Page: 252

 gates of the **Sun** or our Sun, Sol, we're talking about the Prana seed

 Sun or our **Sun**, Sol, we're talking about the Prana seed and we have

 gates of our **Sun** have compacted and closed, right Which means they cannot open

 is, and the **Sun** has just entered that compaction and that's what we're talking

 talk about the **Sun** entered Bardoah. What does that mean? It's dying, what does

 point within the **Sun**, where it will start to actually burn its hydrogen much

 with the Aqualene **Sun** fields that are being built through the Gyrodome and the

 body that our **Sun** is connected to So, they are putting a field around

 field around the **Sun** to absorb those gamma rays as much as possible too

Page: 259

 where the flaming **Sun** part should be. Planets should have it too, and if

 stuff but the **Sun** is on fire, right? So, they would have to be,

 the Sala-4 **sun**. It's not hot, hot heat, but you can feel the

Page: 321

 again Sala-4 **Sun** Spanner-? Krystar Krystal elevator space, which is that halfway point

 of Sala-4 **Sun**, and we've moved from the center of Sala-4 Sun

 of Sala-4 **Sun** up into the atmospheric layers, where the heat would be

 be of the **Sun**, and that is where the Krystar Krystal capsule is for

 you, your Aqualene **Sun** Orb around you, and watch that there's some other Orbs

Page: 324

 and where that **sun** shape was, in the center of that sun shape. We're

 center of that **sun** shape. We're going to come in from the pool, and

 shield an Aqua **Sun** Orb with gold flecks floating all through it, activates around

Page: 332

Page: 333

 And in the **sun**, because it links the sun and the planet, and it

 it links the **sun** and the planet, and it links into what's called Density

 a system whose **sun**, whose central sun has entered the Bardoah Cycle, the Bardoah

 sun, whose central **sun** has entered the Bardoah Cycle, the Bardoah Cycle means there's

 coming from the **sun** would just destroy everything on the planet They are going

 planet and the **sun** and those kind of things too, because the same structure,

 still is the **sun**, which means it still has its Coronasphere, its Vapors turned

Page: 358

Page: 359

 up the Aqualene **Sun** Flame Field in your field and it makes stuff trying

Page: 368

 from like the **Sun** [popular magazine title] or some magazine, you know those

Page: 377

 And the Aqualene **Sun** activations go with each of the Aurora Platform layers. Eventually

 happening with the **Sun**- now that it's in its Bardoah Cycle- we'll not only

 considered the 7 **Sun** sets So you have one 7 Sun set in AdorA

 have one 7 **Sun** set in AdorA and the other 7 Sun set in

 the other 7 **Sun** set in ElorA and you also have the 7 Suns

 had the 7 **Sun** little ones and then you had the 7 fields around

 creating the 7 **Sun** sets--I didn't put them on here cause you wouldn't

Page: 402

 their little 7 **Sun** Sets, will keep ... create Transfiguration Waves that, as they

Page: 406

 over with the **Sun**, there is that one point where that window of the

 Symbiosis with the **Sun**, that is called Sala/Sira, and that is the Density
 with our own **Sun**. We can transmute and use the transmuted energy from the
 organisms circulate. Our **Sun** has entered Bardoah. It is a dying organism now. We
 of our falling **Sun**, or our dying Sun, and turn that quantum into usable
 or our dying **Sun**, and turn that quantum into usable energy as well. So,
 as our host **Sun** throughout this process of the 223 years, which means there's

Page: 479

 cyus was a **Sun** in the Rajhna lock of the Aquinos Andromeda system, in
 to what the **Sun** was originally a part of, which technically was Alycone. So,
 was the original **Sun** in the Andromeda Galaxy in M31 that would sit in

 is a Central **Sun** Galaxy around which 12 Primary Systems or Solar Systems orbit
 A Central Galactic **Sun**- aka Star gate- in its context is called a JhA"-
 a JhA"-ia **Sun**, OK. Each Universe, aka Veca Quadrant, also contains a Density-

 big Dark Fallen **Sun** that they were talking about. And the spawn of them

 the Dark Fallen **Sun**. We are going to release the 666 where the arcs

 with the Aqualene **Sun** - Sun-1 --and also what is beyond that

 Aqualene Sun - **Sun**-1 --and also what is beyond that which has

 the Hidden 8th **Sun**. And that's what we'll get ... so when we talk

 the Hidden 8th **Sun** and that kind of thing. Because that's where the Plus-

 we basically have **Sun**-1 is the Aqualene Sun and that one holds all

 is the Aqualene **Sun** and that one holds all of the imprints of all

 have the Aqualene **Sun**-1. You have the White Sun, Sun-2. And then

 have the White **Sun**, **Sun**-2. And then you have the Aqua Sun, Sun-

 have the Aqua **Sun**, **Sun**- 3. When we talk about the White-Blue Councils

 have the White **Sun**, **Sun**-2 and Aqua Sun, Sun-3- the White-Blue

 2 and Aqua **Sun**, **Sun**-3- the White-Blue Councils and technically, the White-

 the Blue-Green **Sun**, Number-4. And that's Density-3 Sun. These are Density-

 that's Density-3 **Sun**. These are Density-4 That's Density-5, alright, and the

 okay? The Green **Sun**-5 is also Density-3. And we come down ...

 of them is **Sun**-6, the Indigo Sun. And the Sun-7 is the

 6, the Indigo **Sun**. And the Sun-7 is the Amethyst Sun. When we

 is the Amethyst **Sun**. When we talk about the Dark Fallen Sun, it isn't
 the Dark Fallen **Sun**, it isn't this Violet Sun. It's not these. The ones
 isn't this Violet **Sun**. It's not these. The ones in Core don't fall It's

 kind of went **Sun** 1, 2, 3, 4, 5, 6, 7. And I was

 circle -a **sun** circle- you will have a set of AL-Hum-Bhra

 the number 1 **Sun** would be here. So this is when you put these
