 15-Dimensional Ecka-**Veca** System. They're in an adjacent system. To understand what that

Page: 37

 of the Ecka-**Veca** system. Then, we went from them into the upgrade of

 to the Ecka-**Veca** system, and then over into the other side of the

Page: 38

 was an Ecka-**Veca** system there that fell 450 billion years ago, and they

Page: 55

 their entire Ecka-**Veca** system where it went black hole fall, and then they

 center of our **Veca**. And because of that, this entire history ... this was

Page: 61

 and the Ecka-**Vecas** birth inside of the Eckashas at this point. And here

 of the Ecka-**Vecas** that birthed here. Each Ecka-Veca quadrant births four Density

 here. Each Ecka-**Veca** quadrant births four Density E-Luman-Yanas, all right, which

 each of the **Vecas**. So, if you have one Kathara Grid structure, which you

 you an Ecka-**Veca** structure all right. We're just dealing with one Kathara Grid

Page: 66

 on the Ecka-**Veca** level can a fall occur at all. When you get

 a little Ecka-**Veca** is really quite a small area that has the potential

 called the Ecka-**Veca** systems, that sometimes explore the will of opposite expression to

Page: 118

 their entire Ecka-**Veca** system did that. So, they are actually fall-proof because

Page: 150

 forms an Ecka-**Veca** System. So when we talk about an Ecka-Veca System,
 about an Ecka-**Veca** System, wherever you see the Kathara Grids, we call them

Page: 159

 ... the Ecka-**Veca** systems of 3 different Eckasha Matrices and the Eckasha level

Page: 166

 of 4 (**Vecas**) plus 2 (Eckas) at the center of the Eckashas. And
 with the Ecka-**Vecas**. So in all of the Eckashas, this is where the
 where the Ecka-**Vecas** are born. And you have 4 Vecas and 2 Eckas
 you have 4 **Vecas** and 2 Eckas which is the 4 plus 2 again.

Page: 167

 was 4 (**Vecas**) plus 2 (Eckas) at the center E-Luman-Yana.
 in the upper **Veca** Quadrants it would be where the Eiros Grid is, and then

Page: 179

 get their Ecka-**Veca** system. So there's a progressive expansion of quantum that's gone

Page: 181

 we had four **Veca** and two Ecka in each Eckasha. So the outer Light
 in each Ecka-**Veca** Eckasha, Eckasha-A and Eckasha-Aah. So God got really

 in the natural **EckaVeca** system, that was our system. So, this is where we

 a Universal Ecka-**Veca** system, science here, when they point at the M31 Galaxy,
 calling a Universal **Veca**, or Ecka-Veca system. With the M31 what you are
 Veca, or Ecka-**Veca** system. With the M31 what you are seeing is the
 seeing is the **Veca** Quadrant. There's other things connected to that and I don't
 as the universal **Veca** system that would be connected to the Ecka by its
 set, right, Ecka-**Veca** set. And each of these aren't just little invisible balls

Page: 168

 seeded into this **Veca** by the ElorA Ecka races. So, in that period, that's
 history of our **Veca** system started-our Ecka Veca system started. And 480 BYA
 started-our Ecka **Veca** system started. And 480 BYA the Borenthasala races now
 not just a **Veca** level race. They decided to find out the cause of
 go into the **Veca** and they were going to solve this problem about falls
 density system-the **Veca** densities from the Ecka systems and they had a good
 natural coding into **Veca** density the other two would incarnate on what's called a
 called a bi-**veca** code where they didn't have the third unifying element. So
 on a bi-**veca** as opposed to a natural tri-veca light configuration. Because
 a natural tri-**veca** light configuration. Because they wanted to explore polarity extremes and

Page: 169

 parallel Eckasha Ecka-**Veca** systems And they began the victim/victimizer drama. That's where
 Eckasha's entire Ecka-**Veca** system. So it took out the entire Ecka-Veca system
 the entire Ecka-**Veca** system in our parallel Eckasha. And at this point the
 the whole Ecka-**Veca** system and cause it to fall into black hole status
 own Ecka -**Veca** system. They didn't make their Eckasha fall, but they made
 made their Ecka-**Veca** within their Eckasha fall, and that's our parallel Eckasha. From
 of our Ecka-**Veca** system, they ripped through into our side then. At that
 neighboring Eckasha, Ecka-**Veca** systems for the purpose of re-establishing the quarantine on
 the Bourgha Ecka-**Veca** system-the parallel Eckasha-to prevent the Bourgha from using

Page: 170

 Eckasha fallen Ecka-**Veca** to our Ecka. Our Ecka would go into space dust
 which the Ecka-**Veca** races of our Eckasha would have time to evolve sufficiently
 of our Ecka-**Veca** out of density before our Ecka-Veca fell, if fall
 before our Ecka-**Veca** fell, if fall could not be avoided. So the "

 that is the **Veca** grid where you have Urtha and Sala? So, they do

 not a full **Veca** level, but there was a smaller density level Starfire cycle

Page: 341

 of a tri-**veca** configuration, or a Taurentype shape, and the two that phase

Page: 368

 the Ecka, the **Veca** ... all of that So these are huge. There are

Page: 370

 little simple Ecka-**Veca** system in one outer domain. It's like, oh boy! Good

Page: 398

 our little Ecka-**Veca** systems inside of an Eckasha and we have our Eckasha

 ... its Ecka-**Veca** system was where the trouble started 480 billion years ago

 but the Ecka-**Veca** system within it did and that is the system that
