 heck is a **Prana** Exchange. It has to do with core breathing. It has
 with the core **Prana** Seed of Urtha. Not Earth, but Urtha. So, Indigos -
 Urtha begins its **Prana** Exchange cycle, which it is beginning, the Indigo Shield is
 next of engaging **Prana** Exchange through Urtha. It is a hosted Prana Exchange. Then,
 is a hosted **Prana** Exchange. Then, once that happens, once we get to Peru,
 who are actively **Prana** Exchanging in their cores, we can do the same -
 give a hosted **Prana** Exchange capacity to Earth. Which means Earth can temporarily breathe
 can get its **Prana** Exchange going - and you'll see what that is by

Page: 26

 a condition called **Prana** Exchange can once again occur, first within the Indigo Shield,

 do with the **Prana** Exchange. It's going to be something we're fully setting in

 there's something with **Prana** Exchange that has to do with 13. The 13th contraction

 of what's called **Prana** Exchange. Next one please. I'll show you where you get

 you get the **Prana** seed first. Oh yeah, this is another layer before you

 you get to **Prana** Exchange. Now, here's where the Prana Exchange happens. Now, we're

 here's where the **Prana** Exchange happens. Now, we're still at the Life born cycle,

 planes and the **Prana** seed. These are formed/created by the first ASKO conception

 is called the **Prana** Ki, and one is called the Prana Chi. Now if

 is called the **Prana** Chi. Now if you put these two Prana Ki and

 put these two **Prana** Ki and Prana Chi back together, you'd end up with

 Prana Ki and **Prana** Chi back together, you'd end up with a Prana- in

 to be the **Prana** Chi, which would be the negative charge one, and the

 would be the **Prana** Ki as far as quantum goes, and I don't have

 $\frac{2}{3}$ **Prana** unit. When they come together and spark - just like

 - they make **Prana** sparks. And those Prana sparks are backflow sparks. They go

 sparks. And those **Prana** sparks are backflow sparks. They go back to Source. They

 goes from the **Prana** seed Eiron point, back in, and it creates something called

 creates something called **Prana** Exchange. Prana is exchanged for a Mana outflow. Mana

 outflow

 called Prana Exchange. **Prana** is exchanged for a Mana outflow. Mana outflow starts the

 the flow of **Prana** in, Mana out, Prana in, Mana out. And that creates

 in, Mana out, **Prana** in, Mana out. And that creates all sorts of neat

 phasing of the **prana** seed since 15400BC. And what has just happened on the

 three of their **prana** seed, which are the core gates on the Sol level,

 planet, when the **prana** seed completely closes, it closes the Eiron point, which separates

 bodies and the **prana** seed, from the seed atom behind it. And at that

 breaks when the **prana** seed phase locks and closes, and that is what has

Page: 53

 planes and the **prana** seed. We are still dealing with the 15 rings and

Page: 54

 begin the first **Prana** Exchange, the first phase of the prana seed ... it

 phase of the **prana** seed ... it will activate within the part of your

 atom where your **prana** seed is. So, it will begin that process. That means

Page: 55

 point of the **prana** seed. As the rings and orbs span open in the

 center of your **prana** seed. And you will have it. And at that point.

 body and the **prana** seed formation, and next we'll go into the Rashes. We'll

Page: 57

 to do with **Prana** Exchange, and what it means to begin to get that

Page: 58

 have done a **Prana** Exchange, which is core breathing, since 15400 BC when certain

 the PartEkE body **prana** seed. So the first time the prana seed at the

 first time the **prana** seed at the core of the one before goes (

 ... sparks a **prana** unit and sends that as backflow, then there's a (

Page: 59

 engaged by the **prana** seed at the core of the PartEkE body. It creates

 Krystallah with one **prana** seed that has its Eiron point at the core, and

 layers, and that **prana** Page59of 151

Page: 63

 compaction of the **prana** seed at the core of the PartEkE body. So, if

 you have your **prana** seed open and it's able to phase, it means you

Page: 65

 It allows for **Prana** Exchange to occur. It's also where you get the core

 you get the **prana** seed. So, the PartEkE body and the five elemental density

 where the core **prana** seed is formed, and the Eiron point hole that leads

Page: 68

 gates, or its **prana** seed, closes and compacts, and then we will simply, at

Page: 71

- planes and the **prana** seed. That was the number three, Life born cycle, stage
 - do with the **prana** seed. It has to do with the Alons, KAlous and
 - some degree of **Prana** Exchange within its outer fields. What is going to happen
 - units of the **prana** seed in our planetary or stellar level, have compacted. There
-

Page: 77

- shut off the **Prana** seed and initiated bardoah fully on the planet. That's not
-

Page: 86

- that too. It's **Prana** Exchange. We'll explain toward the end what Prana Exchange is,
 - the end what **Prana** Exchange is, and why it is significant. We'll also go
 - it is initiating **Prana** Exchange within the Indigo Shield, we will begin to see
-

Page: 87

- AnshatAsa Passage, the **Prana** Exchange within the planetary core. What the Indigo Shield, they
 - actually begin the **Prana** Exchange for Earth, because the Beloveds are on Urtha. That's
 - to do the **Prana** Exchange, to begin that process in the indigo shield, and
-

Page: 88

- to the core **Prana** seed of the planet. There was something done in that
 - process of planetary **Prana** seed activation. While those gates were reversed, it phase-locked
 - phase-locked the **Prana** seed. It actually phase-locked and opened, where it was

-

Page: 117

- Bardoah means the **prana** seed is separating from the seed atom, and the core

Page: 121

 connect to the **Prana** Exchange process, that has to do with phasing of the

Page: 128

 cores, where the **prana** seed is, and inside the prana seed - remember the
 and inside the **prana** seed - remember the prana seed is inside of the
 - remember the **prana** seed is inside of the Nada 1 core crystal. The
 core crystal. The **prana** seed has at its core the Eiron point, which is
 between the outer **prana** seed and the seed atom of the planet, but they
 time, because the **prana** seed of Earth has not been able to phase because
 now start experiencing **Prana** Exchange. I don't why to go through every little detail

Page: 129

 core, through the **prana** gate. Once you can phase, you'll be able to get

Page: 131

 the beginning of **Prana** Exchange and other things, even better, after that. They haven't

Page: 135

 with activating the **prana** seed. I don't know what it is yet. It's going

Page: 136

 which means the **prana** seed is one this axis, right? Then when you get

Page: 137

 with something called **Prana** Exchange. (Dialogue with Az) We talked about the Krist
 and activating the **prana** seed. It has to do with Prana Exchange. The easiest
 to do with **Prana** Exchange. The easiest way to describe Prana Exchange to you
 way to describe **Prana** Exchange to you - without going through about 40 diagrams,
 I can explain **Prana** Exchange ... remember, we were looking at the Rashalae body,

Page: 138

 lips. Let's try **Prana** Exchange. Without having a million graphs, I'll try to explain
 will have your **prana** seed. The prana seed looks just like the Tauren. It
 prana seed. The **prana** seed looks just like the Tauren. It has one ball
 now, to understand **Prana** Exchange. With Prana Exchange, there's a prana seed at the

 Prana Exchange. With **Prana** Exchange, there's a prana seed at the center. There is
 Exchange, there's a **prana** seed at the center. There is a little thing called
 its center a **prana** seed that looks in the same configuration as the Tauren
 Now what the **prana** seed does ... it's called a prana seed because it's
 it's called a **prana** seed because it's made of- one of the reasons its
 its called a **prana** seed is ... I don't have one here to show
 and two half **pranas**. They are not really half; their quantum is like two
 they are a **Prana** Ki and a Prana Chi. When the Prana Ki and
 Ki and a **Prana** Chi. When the Prana Ki and Prana Chi phase together,
 Chi. When the **Prana** Ki and Prana Chi phase together, or come together and
 Prana Ki and **Prana** Chi phase together, or come together and spark, they form
 they form a **prana** spark. When that prana spark occurs, it's just like when
 spark. When that **prana** spark occurs, it's just like when you go back to
 thing. When the **prana** seed phases, it makes its prana spark, it sparks open
 it makes its **prana** spark, it sparks open the Eiron point doorway, that would
 a spark of **prana** gets sent back, it opens the aperture, and when the
 and when the **prana** spark is sent back the exchange happens, when the prana
 happens, when the **prana** is exchanged. Prana is the backflow to Source. It releases
 prana is exchanged. **Prana** is the backflow to Source. It releases a flow of
 of mana energy. **Prana** is the stuff that has a base 11 2/3
 exchange where a **prana** spark goes in and it allows a mana flow to

Page: 139

 process by which **prana** sparks occur. That process has to do with these tubes.
 joule is the **prana** carrier. The joule is embedded in Ma Ta Or, and

Page: 140

 spark triggers the **Prana** Exchange to happen. So, Prana Exchange gets its spark to
 to happen. So, **Prana** Exchange gets its spark to make it happen because of
 up sparking the **prana** seed at the center, which opens the Eiron point, sends
 point, sends a **prana** unit through, and as backflow to Source, and then the
 atom receives its **prana** spark, and releases its mana spark, there's stuff that happens
 gets hit with **prana**, but we don't have to go there. Just know that
 know that the **prana** goes in from sparking out here and makes a prana
 and makes a **prana** spark that goes back in, and it triggers the release

you have 12 **prana** sparks coming out and they all go into the center

Page: 141

-  core, sparking another **prana** phase, another prana spark is made, so the ManU rides
 -  prana phase, another **prana** spark is made, so the ManU rides in on the
 -  in on the **prana** spark, into the seed atom, and at that point, with
 -  we don't do **Prana** Exchange on the outer because we can't do Prana Exchange
 -  we can't do **Prana** Exchange on the partikE body levels because this planet has
-

Page: 142

-  to activate the **prana** seed with the support of the AnshatAsa Host coming in.
 -  spark the core **prana** seed. The prana seed is in the same place as
 -  prana seed. The **prana** seed is in the same place as your seed atom,
 -  also have a **prana** seed that goes with your inner domain body, or your
 -  one is the **prana** seed. That would be at the AzurA point. It would
 -  before. With the **prana** seed being triggered - I don't know how they are
 -  allows for the **prana** phase. That's what allows the 13th, 14th and 15th core
 -  is what the **prana** seed is on a planetary level; in your own self
-

Page: 143

-  and make a **prana** spark. That will open the Eiron point. That I believe
 -  spark it with **prana**. And that's going to start the mana flow coming back.
 -  doing by initiating **Prana** Exchange is allowing for the prana spark to be formed,
 -  allowing for the **prana** spark to be formed, building the charge first, allowing the
 -  first, allowing the **prana** spark to be formed, and doing something specifically that will
 -  will allow the **prana** spark to go back through the way it's supposed as
 -  going to initiate **Prana** Exchange in our bodies, where prana is exchanged for mana,
 -  our bodies, where **prana** is exchanged for mana, and then mana makes ManU, and
-

Page: 144

-  not been a **prana** spark that has happened yet. So, the next stage in
-

Page: 145

-  AzurA, or the **prana** seed. That white spot there you see? (on the
-  to phase the **prana** seed. So, that will be the first time that the
-  Ruta of the **prana** seed come together and spark with the Shala. That will
-  create the first **prana** spark. So, when we're exhaling, anyway, they want us to

 when the first **prana** spark will be made with the Ruta and the Urta
 exchange, where the **prana** went in, and it was exchanged for mana. That's why
 why it's called **Prana** Exchange. So you have the prana going in on the
 you have the **prana** going in on the 13th inhale, and then the first

Page: 146

 you will do **Prana** Exchange. Your inhale will go all the way back through
 the planet, the **prana** seed, and you will get prana going in and mana
 you will get **prana** going in and mana flow coming out. So, you are
 by initiating the **Prana** Exchange. We are learning this too. We're learning this with
 those inhales with **prana**, the prana inhales, to remember to try to feel that
 with prana, the **prana** inhales, to remember to try to feel that you're contracting
 that is is **prana** going in and mana coming out. We'll really get the
 far as the **Prana** Exchange. Az: Inhale ... hold ... contraction, exhale, expand. Inhale,
 that you're inhaling **prana** and exhale mana on all the breaths from now on,

Page: 147

 you will inhale **prana** back from your own Rashalae body, back to your seed
 possible once the **prana** breath is a natural force within your body. The prana
 your body. The **prana** breath will bring the healing frequencies of prana through the
 healing frequencies of **prana** through the body. The body has its certain level of
 level of stored **prana**, but when the prana seed cannot phase, they cannot restore
 but when the **prana** seed cannot phase, they cannot restore those, so they become
 become depleted. Because **prana** is the key to opening the Eiron point as a
 the body becomes **prana** depleted, it becomes mana depleted, because you do not get
 give first the **Prana** Exchange. So, we have opened up potentialities now of renewing

Page: 148

 and return of **Prana** Exchange. This response will be - and we'll let you
 response to the **prana** that you sent back to the seed atom. There will
 opened, or the **prana** seed is not phasing, the Antakarana can't regenerate itself, so

 the Tauren. The **Prana** Seed receives the energy coming from these things phasing, where
 sparks. Sparks of **Prana**. Because at the center here, something called the Prana Seed,
 something called the **Prana** Seed, and at a certain point of quantum build up
 build up of **Prana**, the Prana Seed itself will phase, and it will create
 of Prana, the **Prana** Seed itself will phase, and it will create a big
 create a big **Prana** spark and open the creation point center to what is
 known as the **Prana** Exchange cycle. This happens when we start to activate Rasha

 to restart the **Prana** Exchange cycle that has been dead here for a long
 able to do **Prana** Exchange. Prana Exchange is the process by which a planet
 do Prana Exchange. **Prana** Exchange is the process by which a planet replaces its

 But when the **Prana** Seed compacts and closes, it starts the process of the
 this is the **Prana** Exchange cycle, the process by which the Alons, KAions and
 thing called the **Prana** Seed at the center generates a big Prana spark, that
 generates a big **Prana** spark, that opens, allows that all the Prana that was
 that all the **Prana** that was generated from here to go into the center,

Page: 57

 way up. The **Prana** Exchange is a necessary process in that. Just like the
 level. So, the **Prana** Seed is connected directly to the Seed Atom is connected

 point in the **Prana** Seed that opens the door going back into the Seed
 to return the **Prana** breathing cycle, which we have done- that"s already set in
 there is a **Prana** Exchange cycle, and that Prana Exchange cycle is called the
 cycle, and that **Prana** Exchange cycle is called the NaVAHo cycle. There are four

Page: 59

 there is this **Prana** Exchange cycle that occurs, and creates a NaVAHo cycle. A
 is a NaVAHo **Prana** Exchange cycle, which is a Rasha body activation cycle. It
 and through that **Prana** Exchange cycle, we will literally capsulize everything that we are

Page: 60

 and we do **Prana** Exchange by the phasing of the Alons, KAions and ShAions,
 those, talked about **Prana**. That"s just showing you where the Alons pull up and
 a spark of **Prana**, and then Prana eventually builds up, goes into the center,
 Prana, and then **Prana** eventually builds up, goes into the center, and when it
 when it sends **Prana** into the Seed Atom, this makes the Seed Atom phase,
 released. Instead of **Prana**, it becomes ManU, and the ManU sparks, 12 of them,
 start off with **Prana** going in to Seed Atom, Seed Atom sending back Mana.
 Mana in the **Prana** Exchange. Then you have the ManU-Ec Exchange, the Rasha
 than just the **Prana** or any of the others alone. When the ManU sparks
 center of the **Prana** Seed, down to the Seed Atom and sparks the center
 together what these **Prana** Exchange things have to do with that all connects back
 these cycles of **Prana** in, Mana out, and then The MCEO Freedom Teachings®

Page: 62

 are not doing **Prana** Exchange process from their cores. So, we shouldn"t need an

Page: 63

 what carries the **Prana**, what carries ManU. Those kind of things. But, this is
 center of the **Prana** Seed. You remember it's at the center of the Rasha
 ethers, the two **Prana**, the Prana-kei and the Prana-chi, that's the Eira,
 two Prana, the **Prana-kei** and the Prana-chi, that's the Eira, and at
 kei and the **Prana-chi**, that's the Eira, and at the center of that,
 center of the **Prana** Seed. That would connect the Prana Seed and the Rash
 would connect the **Prana** Seed and the Rash a body dark matter template back

 is that the **Prana** Seed closed, and that begins the process of these gamma

Page: 66

 you have the **Prana** Seed, or the core gates The Sun has the same
 here, if the **Prana** Seed was cycling naturally in our planet, but it hasn't
 point, when the **Prana** Seed compacts completely, and there's only one more time that

 Seed, holding its **Prana** Seed open, so it doesn't take the signal from the
 compaction of the **Prana** Seed, following what has happened to the Sun. The
 force Earth into **Prana** Seed compaction as well That didn't work. The An-Sha-

Page: 79

 has an open **Prana** Seed which is 250 years until they have to pull
 that point its **Prana** Seed will close and it will follow the sun at

 also where Urtha's **Prana** seed would be because they're linked, right They're both ...
 Earth and Urtha's **Prana** seeds would be here. This is where we had the
 that's stopping Earth's **Prana** seed from going into compaction and starting her Bardoah
cycle.

Page: 122

 the Cycling of **Prana** Exchange with the RaSha Bodies, it is actually, you know,

Page: 129

 we talk about **Prana** joules, they're a positive force They're actually a stored positive

 we store up **Prana** Joules in the Body, in the atoms, in order to
 do with the **Prana** Cycle, which is the NaVAHo Cycles. So when you have
 NaVAHo Cycle, the **Prana** Exchange Cycle. And it is The MCEO Freedom Teachings®

Page: 130

 through the **Prana** Exchange Cycle that enough Quantum is built where this occurs

Page: 138

 we have the **Prana** Seed and the Seed Atom and they all end up

Page: 169

 closing of the **Prana** Seed and progressive detachment between the Outer Lightbody and the

Page: 170

 of the Sun's **Prana** Seed, its Core Prana Seed, its Bardoah cycle has unfolded

 Seed, its Core **Prana** Seed, its Bardoah cycle has unfolded Its 1st Ring Wave

 forced, when the **Prana** Seed that is at the Core- the Core Gates are

 are called the **Prana** Seed- when they close and compact it begins a very

Page: 176

 Core Gates with **Prana** Seed are activating It is sending up this golden tube

Page: 180

 from the Core **Prana** Seed that compacted, it temporarily shatters and opens a door

 Point, through the **Prana** Seed all the way back to Source. If a consciousness

Page: 182

 which are our **Prana** Seeds, are connected to each other. And if you take

 you have the **Prana** Gates going up past the Outer Core Liquid Aquifers. You

Page: 205

 Elemental Planes, the **Prana** Seed and the AmourA RaSha Bodies. So this is where

 EirA which is **Prana**. They are all different types of geleziac radiation with different

Page: 207

 that are called **Prana** Exchange breathing techniques, that are the beginning of learning that

Page: 208

 are called the **Prana** Seeds, that go back all the way to the first

Page: 209

 Atoms and the **Prana** Seeds between, or what is called- in the centre of
 centre of the **Prana** Seed there is a point called the Eiron Point and

Page: 212

 show you the **Prana** seed. When we refer to core gates, like the Core
 to as the **Prana** Seed. This is because they generate Prana Sparks. There"s a
 because they generate **Prana** Sparks. There"s a natural process that after a Eyugha cycle,
 and it generates **Prana** Sparks. It generates Prana Sparks as a backflow to what
 Sparks. It generates **Prana** Sparks as a backflow to what was before it And
 So, there"s a **Prana** in, Mana out cycle that begins, and then that builds

Page: 213

 activating, engaging a **Prana** Exchange cycle, and through the Prana Exchange cycle, the
RaSha
 and through the **Prana** Exchange cycle, the RaSha Body and therefore the Lightbody built
 will begin generating **Prana** and doing Prana & Mana and Prana & Mana Exchange
 Prana and doing **Prana** & Mana and Prana & Mana Exchange as a breathing
 & Mana and **Prana** & Mana Exchange as a breathing rhythm, and then that

Page: 214

 that there"s a **Prana** Seed at the center When you take this structure into
 will have a **Prana** Seed, and the Prana Seed connects back into the Seedatom
 Seed, and the **Prana** Seed connects back into the Seedatom for that domain, and

Page: 221

 blocked because its **Prana** seed is compacted. So, this is opening a whole new

Page: 232

 planes, and the **Prana** seed and the RaSha Amour A RaSha body and that"s

Page: 238

 Mana and the **Prana**. So when we talk about the word Prana, what you"ll
 about the word **Prana**, what you"ll see later in relation to Prana seeds, this
 in relation to **Prana** seeds, this is where this type of energy first starts

Page: 239

 the form of **Prana**, and when that ManA releases, becomes mana, it releases the
 itself to become **Prana** which has a positive charge. Later somewhere in this cycle,

 this cycle, the **Prana** breaks down into Prana Ki and Prana Chi so we
 breaks down into **Prana** Ki and Prana Chi so we have, this is the
 Prana Ki and **Prana** Chi so we have, this is the beginning of breakdown
 have understood where **Prana** came from The MCEO Freedom Teachings® Series Presented

 to form the **Prana** and the Prana and the Mana actually. So ManA becomes
 Prana and the **Prana** and the Mana actually. So ManA becomes Mana and Prana.
 becomes Mana and **Prana**. All right, and then we jumped up to here. Then
 carriers of the **Prana**. They would be the things that once upon a time
 what's called the **Prana** exchange cycle that begins the process of being able to

Page: 248

 a process called **Prana** exchange which is the, the Prana exchange allow for the
 is the, the **Prana** exchange allow for the currents that come out to form
 there is a **Prana** exchange cycle that takes place in the The MCEO Freedom

 and about the **Prana** exchange cycle. But, first is knowing that the template formed
 that hold the **Prana** joules, all right. ShAions that hold the Eira frequency, which
 you have the **Prana** equilibrium unit of 11 2/3rds positive charge, and then

Page: 250

 is called the **Prana** seed. It has what is called the Eira unit and
 has a split **Prana** unit where it has Prana-Kei and Prana-Chi. Prana-
 where it has **Prana**-Kei and Prana-Chi. Prana-Kei carries a positive charge
 Prana-Kei and **Prana**-Chi. Prana-Kei carries a positive charge and its, it

 you have one **Prana** unit and the Prana unit breaks down, 2/3rds of
 unit and the **Prana** unit breaks down, 2/3rds of its quantum goes to
 goes to the **Prana**-Kei and 1/3rd goes to the negative charge Prana-
 the negative charge **Prana**-Chi. And this is where we get the kei and
 part of the **Prana** seed and the Eira is the top one that holds
 that opens the **Prana** seed and the RaSh a structure and whatever's built outside
 of things. The **Prana** seed, and this has to do with Prana exchange, at
 to do with **Prana** exchange, at certain points with the phasing of the A

 So, the two **Pranas** come together, the two Prana, partial Prana units come together
 together, the two **Prana**, partial Prana units come together and they spark a full
 two Prana, partial **Prana** units come together and they spark a full Prana unit
 spark a full **Prana** unit So, they make a full, remember Prana has a
 a full, remember **Prana** has a positive $1\frac{2}{3}$ base, so they spark
 each of the **Prana-Kei** and Prana-Chi. So, when they spark a Prana
 Prana-Kei and **Prana-Chi**. So, when they spark a Prana unit that is
 they spark a **Prana** unit that is enough to open the Eiron point or
 there's this whole **Prana** exchange. When Prana backflow goes back through the Eiron point
 Prana exchange. When **Prana** backflow goes back through the Eiron point into the seed
 happens at the **Prana** seed, and that will cause the seed atom to go
 we're actually going **Prana** in, Mana out and eventually you'll have ManU in to
 breathing, but the **Prana** exchange cycle is the breathing cycle. This is what is

Page: 251

 door at the **Prana** seed center, opens and closes by the generation of quantum
 when you have **Prana** in it's a Prana in back flow and Mana out
 in it's a **Prana** in back flow and Mana out into manifestation This also
 it out of **Prana** or Mana or what stages of this you have to
 we do the **Prana** in, Mana out, at a certain point there are breathing
 there are specific **Prana** breathing rhythms that we have used to activate RaShaLAe body
 certain amount of **Prana**, **Prana**-Mana breathing, then you do ManU in, Eck out,
 These are the **Prana** exchange breathing cycles and they also are the cycles that,
 the NaVA-Ho **Prana** exchange cycle. When that is done there's this thing called

 units form the **Prana** seed and in a planetary system or a large stellar
 that's the stored **Prana** charges, all right There's all sorts of things that plug
 plus 1 breath **Prana** exchange is a RaShalon cycle. It's called a NaVA-Ho-
 process of this **Prana** exchange, it starts with the contraction, or the inhale, of

Page: 254

 you have the **Prana** joule or the, what was it, the blood krystal coming
 marrow through the **Prana** exchange breathing when we begin to do this. And this

Page: 255

 breath sparks the **Prana** seed at the center and the Eiron point opens, and
 it receives the **Prana** spark back flow So, the back flow sparks out of
 point in the **Prana** seed and it opens the Eiron point and that Prana
 point and that **Prana** spark that was made goes back in to the seed
 out, ok, the **Prana** spark when in, the Mana spark comes back out, flies
 center through the **Prana** seed and goes out into the seed atom, and the
 after this whole **Prana** exchange process, just one round of it This is just
 point of the **Prana** seed all the way through back to Source, comes back

Page: 256

 we set the **Prana** breaths in motion in the shield as we were doing
 by just remembering **Prana** in, Mana out, Prana in, Mana out, ManU in, Eck
 in, Mana out, **Prana** in, Mana out, ManU in, Eck out, ManU in, Eck
 from changing from **Prana** in, Mana out to, even if I'm not keeping count
 as you're doing **Prana** in, Mana out, ManU in, Eck out, these start phasing
 way beyond the **Prana** seed, ya know, so they're little tiny compared to this

Page: 257

 4 plus 1 **Prana** exchange breaths you would have these pulling in phase, and

Page: 259

 is blocked and **Prana** exchange is not occurring It means it is not breathing.

 down to a **Prana** Exchange that occurs between all of these layers of the

 is joule force, **prana**-joule force and that comes in with a different thing

Page: 334

 what's called the **Prana** Seed in the center of a Stellar Body or of

Page: 341

 be reminded where **Prana** comes from. Because when we're dealing with the Rasha Body,
 what is called **Prana** Exchange, where Prana goes in and it sends Mana out
 Prana Exchange, where **Prana** goes in and it sends Mana out And this is
 of things. But **Prana**, the first time we actually got into Prana, it was
 actually got into **Prana**, it was when we talked about the Keys. The reason
 positive charge, and **Prana**, that has 11 2/3 positive charge energy. So it
 it is the **Prana** that comes from what is called Key Resolution or Quantum

 Spirit Body yet **Prana** Seed becomes important because it is ... when the Lons
 occurs between the **Prana** Seed-the little thing at the Corewhere the center in
 center in the **Prana** Seed called the Eiron Point opens, allows the Backftow to
 side of the **Prana** Seed, like behind the Prana Seed. And that will allow
 like behind the **Prana** Seed. And that will allow the Orons to phase and
 showing you the **Prana** Seed a little bit more closely. It is a Phase

 It is the **Prana** Seed that is crucial to the concept ofBardoah or the
 Body, through the **Prana** Seed out into the Light Body structure, and stretches itself

 mana, prana-mana, **prana**-mana--and then the 13th. And that leads you to
 it's not just **Prana** in, Mana back out-the Lons create ManU, sparks which
 right through the **Prana** Seed. It would hold the Eiron Point open and just
