 at least we're **Probability-G**. We started out in Probability-1. If we hadn't

 started out in **Probability-1**. If we hadn't leaped, this would have been a

 mess in those **probabilities**, so we'll be able to see a little bit of

 structure of what **Probabilities** look like. But that is the base structure When you

 see how these **probabilities** interlay with each other, or embed within each other, that's
 that's when the **Probability** Structure starts to become Probability Maps. So, I just wanted
 starts to become **Probability** Maps. So, I just wanted to bring us back to
 the spheres, the **Probability** Spheres, without all of the other flows and things around
 levels of these **Probability** structures, that start with the Eckasha-Aah level, that we
 to understand what **Probability** we are in, where we need to go, what we
 working with, with **Probabilities**. Next one please. In the Sarasota workshop we also explained
 Actuality Dominions. The **Probability** field that's here-you have 12 of them on each
 set of 12 **Probability** Dominions. And these are Domains, little circles, but the larger

Page: 38

 is how these **Probability** structures start to embed within each other, and how they
 talk about the **Probabilities**, some of them we won't see because of the difference
 looking at the **Probability** structures, and saying, "OK, we understand that these are
 pictures of the **Probability** Fields. Science just doesn't see the underlying structure that unites
 maps become the **Probability** Map, but in an interesting way as we progress. But

Page: 40

 put in a **Probability** structure that we saw from the Elum-Eiradhona Spirit Body

 more in the **Probability** structures Next one please. Now, this we're seeing-first of
 structure, and the **Probability** framework that is part of the Elum-Eiradhona Spirit Body
 to understand the **probability** cycles as time cycles when we plug in the eight-
 tomorrow But the **Probability** Alignments we will begin to learn about this evening, or

Page: 42

 see what the **probability** numbers are, right-every set of twelve spheres like this
 relation to the **Probability** maps that are beginning. Again, here we have the Eckasha-
 5, which means **Probability** #5 within the Eckasha. That is how the structure

Page: 43

 to see these **Probabilities**-we can say, Ok, well, here's our PCM Veca-5,
 taking into the **Probability** map structure, now that we see how that is built
 A. And that's **Probability**- 12. Our Eckasha is, I believe, Eckasha-11. And there's
 that, that the **Probabilities** ... if you popped up on, like, Earth-144, it

-  been making these **Probability** leaps that we've talked about. We've been actually moving Probabilities
 -  been actually moving **Probabilities** on a Meta-Galactic level. Here on these maps, we
 -  be Meta-Galactic **Probabilities**, alright? So, we're going to take it from there, down,
 -  have been doing **Probability** leaps. We have been literally leaping Probability Alignments, because we
 -  been literally leaping **Probability** Alignments, because we started out in 2000, when the Stellar
 -  what was called **Probability-1**. That would be Meta-Galaxy-1 Alignment. If we
-

-  those Meta-Galaxy **Probability** Fields are directly interfacing with the Parallel Black Hole system
 -  We leaped from **Probability-1**, where we started when the gates opened, to Probability-
 -  gates opened, to **Probability-3**, which was in, I think that was in August
 -  don't see a **probability** we do not want to see. So, we leaped from
 -  4 to finally **Probability-6**, or MetaGalaxy-6 during the Sarasota workshop. We made
 -  get here, to **Probability-G**. As we start to see what the other things-
 -  one of these **Probabilities** or Metagalaxies would have a set of twelve within them.

-

-  there, he's shifting **probabilities**, running around. (audience laughing) So, we have one Meta-
 -  be the twelve **Probabilities**. Actually, this would be the Actuality Dominion of the Meta-
 -  Galaxies, which are **Probability** Dominions of a Meta-Galaxy. So, you have the twelve
-

-  rotates through the **Probability** structures We are right now in alignment with the M31
-  Galactic level of **Probabilities**, we will lose the Host And there's only a certain

 Time Cycles where **Probabilities** and Octants-we can time that, and they've given us

Page: 58

 can trace the **Probabilities**. And that's just looking at one Meta-Galactic-level Probability.

 Meta-Galactic-level **Probability**. There would be ones all over the place, but science

Page: 59

 at all the **Probabilities** together, that would give you-this part of each of

Page: 60

 structure of the **Probabilities** in alignment with the 8-point Octant structure, so we

Page: 61

 the structure of **Probabilities** and the alignments of Probabilities in relation to the Cosmos,

 the alignments of **Probabilities** in relation to the Cosmos, and it is also the

Page: 65

 all of these **Probability** Domains on the Meta-Galactic level, and then the smaller

Page: 68

 those other Galactic **Probabilities**-or Meta-Galactic Probabilities-it's amazing we didn't fall then.

 or Meta-Galactic **Probabilities**-it's amazing we didn't fall then. The system didn't fall

Page: 79

 of the other **Probabilities**. Actually, you're getting little fragments of them coming in. So

Page: 80

 in the different **Probabilities** in pieces, so don't let it scare you if that

Page: 81

 the leap to **Probability**-6 or the shift to Probability-G. And looking at

 the shift to **Probability**-G. And looking at stuff at the kind of Meta-

 which is the **Probability** Set relating to the Spirit Body. That's a set of

 into Meta-Galactic **Probability** 6. And these leaps are ... we're not like watching

 moving through these **probability** fields, these fields blend together so you don't see a

 on any other **probability** vector That's why we had to get into the Meta-

Page: 101

 talked about the **Probability** Alignments and cycles in our universe. We started with- yeah,
 rotations of the **probability** lines, where our actually PCM Universal Veca is, and then

Page: 103

 each of these **Probability** Lines ... that they are still in their natural order
 are all different **Probabilities** of the same set-up- each one of these Vector

Page: 112

 which changes our **Probability** Alignments a little bit. The Probability Alignments that change them
 little bit. The **Probability** Alignments that change them on a huge level require a

Page: 119

 happen in those **probabilities** that involve wars and a bunch of other mess. It

Page: 121

 will leave the **Probability** Alignment from MetaGalactic-6, Galactic-3, Solar System-3, and

Page: 122

 with its actual **probability** that is over there, and then it will begin pulling

Page: 124

 leaps through these **Probabilities** connect into time? What you're looking here at first, notice,
 relation to the **Probabilities**, it means you get in one probability; if this is
 get in one **probability**; if this is like Line-1, Probability Line-1, this
 like Line-1, **Probability** Line-1, this is where Probability-1 starts It goes
 this is where **Probability**-1 starts It goes to here, then Probability-2, I
 to here, then **Probability**-2, I believe, no, that's 12 up there, here, this
 where it starts **Probability**-1 starts here, and then Probability-2 starts here but
 here, and then **Probability**-2 starts here but then Octant-1 ends. So you
 you get 1 **Probability** and a half in each Octant So that means the
 you from one **Probability** to the next Those Probabilities are, literally, they fall within
 the next Those **Probabilities** are, literally, they fall within the Octant Cycle; the sets
 frequencies of this **Probability**, **Probability**-1 finish where we are, also Probability-2 and
 we are, also **Probability**-2 and also Probability-3. But that's where we want

2 and also **Probability**-3. But that's where we want to stay with our

Page: 125

or maybe the **Probabilities** of the Planets, I'd have to find out But the

1 through 12 **Probability** Fields, that is the Time Cycles. Usually these are very,

one of those **Probability** circulations, would equal that So this is how what we're

we're learning about **Probabilities**, actually plugs into the timescales that we ... they told

now we're jumping **probabilities**. We're moving them quickly because we're in a StarFire
