 when the Procyus **Star** was attacked. And that's the core star between the two,  
 that's the core **star** between the two, so it affected both sides and part  
 portions of the **star** clusters from all these systems, down in to form an

 big stuff with **Star** Gates and all that kind of big drama, it is

 involved in running **Star** Gates or saving the planet from being sucked down a

 call the 12 **Star** burst, it has 12 lines like you have on the

 to be a **star**, or like a comet, that is coming toward us. It

 looked like a **star** coming in from this side, and that is why they

 there is a **Star** around us, we are inside of a Star that we

 inside of a **Star** that we don"t see because it is at a different

Page: 164

 what's called Lone **Star** Fall A Lone Star Fall means that it will go

 Fall A Lone **Star** Fall means that it will go black hole status, but

 of the Universal **Star** Gates of this system. Because our sun and Earth are

 into a Lone **Star** Fall, which means they can, even though they can't Starfire

 stable in Lone **Star** Fall Which means it won't self destruct. Which means it

---

Page: 165

 but if Lone **Star** Fall didn't happen for this system, it would have been

 so the Lone **Star** Fall probability could exist, could happen. What it would also

 of the larger **star** that was Tara before Tara was almost disintegrated. So we

---

Page: 172

---

 It is the **star** called Telos. I don't think they've identified exactly where that

---

Page: 174

---

 or the host **star** They've been wanting to take out Urtha for a long

---

Page: 181

 to its host **star** of Urtha around it, but the only viable one left

 Urtha's natural Planetary **Star** Gate 7, which is one that runs the Urtha rod

 in a Lone **Star** Fall situation. And that process begins 2047-2051. And what

---

Page: 198

---

 you see a **star** or a planet, if it is in a natural Kristiac

 a natural living **star** that protects the layers below it so those life fields

 this larger planet **star** called Urtha. And our Sun is in a similar position,

---

Page: 206

 is actually a **star** out there and I think it is connected to Belletrix,

 planet or a **star** And coming up from the crust is the Rha light

 to be a **star** that is inside a larger living star But this is

 a larger living **star** But this is our Rha light field and that would

 manifest in a **star** or planetary body. Like here, between 6 and 7, between

 once the Urtha **star** goes into it's Starfire process and re-births. But it

 a "Lone **Star** Fall Quarantine System " Sirius B System is also eligible

 going into Lone **Star** Fall. Those are the Earth System (and Sol System)

 in its Lone **Star** but if they are able, if after Starfire, this planet

---

Page: 274

---

 as a Lone **Star** Fall Planet System and from there, there is still an

---

Page: 294

---

 that is a **star** that is Urtha. Now, stars are living planets, basically. When  
 you see a **star** or a sun, certain reality fields that have to do

 are also the **Star** Gates on the planetary level? They run the rod of  
 into the planetary **Star** Gate 7 of Urtha. And I wouldn't doubt there's a

---

Page: 337

---

 Starlight body, the **Star** whatever it was body over there. I'm trying to remember

---

Page: 338

 relationship to the **star** planet Urtha. There's one more thing that I wanted to

---

Page: 339

 into certain natural **Star** Gates in our Veca system Those Star Gates were Urtha-  
 Veca system Those **Star** Gates were Urtha-3 and Sala-4 and from there,  
 USG 3- Universal **Star** Gate 3 is Urtha ... in between these two, there

---

Page: 340

 the natural planetary **Star** Gates and the ones of Urtha. So, the Aurora Field  
 had natural Urtha **Star** Gate 7 over here, running the Rod. Spanner-? will link  
 of that larger **star** body. But Urtha's body is still intact It's still a

---

Page: 341

 go through a **star** gate and then come back again all of this is

---

Page: 343

---

 look like a **star** This also gives you a clue when you see stars

Page: 344

 its support planet/**star** went back into Starfire, it's not going to stay where

 hosted into Lone **Star** fall, and then potentially being out of Bourgha's reach, it

---

Page: 356

---

 look at a **star** gate as a tunnel, and you've got one planet they're

---

Page: 373

---

 remember what a **star** gate is, you're not gonna worry about the fact that

---

Page: 392

 place when a **Star** or a Planet goes into its Bardoah phase. What happens

 planetary level or **star** level is, there are 3 Core Gates that make up

 that Planet or **Star** body. When they compact it closes what is called the

---

Page: 393

 that on a **star** level leads to a Nova which is a space dust

 be an old **star** and it would eventually, you know go into Nova or

 conditions occur. Living **Star** Systems and Living Stars don't go through Nova. When science

 been a Host **Star** for a very, very long time. It has held Earth  
 inside of the **Star** Urtha, so we are actually as if we were coming  
 of the larger **Star**, Urtha. Urtha has a surface, it is much bigger, Urtha  
 much bigger, Urtha **Star** is much bigger than this small planet that we have  
 levels of a **Star** like Urtha. So in RashaLAe Body activation we are progressively

 is a Living **Star** Planet. I know it is really funny, it would look  
 as our central **Star** in our Solar System. Stars are supposed to circle around

 circulating around a **Star**, you don't need- a natural configuration is not a magnetosphere

 means once that **star** goes Starfire, we're still hanging here. What's going to hold

 doesn't go through **star** death. It doesn't have to What it does is go

 shining like a **star** When you see hunks of rocks orbiting around a star

 orbiting around a **star** that don't look like stars themselves, it means they are

 burning like a **star**, and yes you can live under it without being burned,

 a natural living **star** would be. Our Sun still has some life to it.

---

Page: 68

 maybe as a **star**, where you know yourself as that identity. But we're still

---

Page: 78

 of this larger **star** that itself would have its atmosphere going up and out

---

Page: 79

 a planet or **star** will simply activate their own RashaLae bodies in with the

 in with the **star**. So you just kind of all go together and you

 Urtha. Urtha, the **star**, will not be there any more as far .. when

 These stars, these **star** configurations that some people can see, they're actually Spanners.  
And  
 they form, literally, **star** configurations where the star gets more distinct in the eye  
 configurations where the **star** gets more distinct in the eye and it grows. And

 look more "**star**-like " Well, there's a band around them that is

 Urtha is a **Star**. It has its Corona sphere turned on. But that doesn't

 to be a **Star** too, it is supposed to have a Corona sphere and

  -  is Sagittarius A **star** That, in science books, you'll find is the closest thing
  -  have Sagittarius A **star** that is OberYon, and then going further in, you have
  -  it the Lone **Star**, cause it's like the only star in that system There's
  -  like the only **star** in that system There's other things in that system, but
  -  qualify as a **star** it's like the Lonestar. And if you put what science
