 we have 6 **Takeyon** Cycles that brings us up to the axis 7 all

Page: 65

 that sets the **Takeyon** Cycles for the next domain and again there will be

Page: 115

 cycles, which are **Takeyon** Cycles, and there are others which, over here we have,

 are actually called **Takeyon** Cycles. But, at the same time, it births what is

 phasing, its first **Takeyon** Cycle, which is its first cycle of twelve Harmonic Key Cycles,
 doing its first **Takeyon** Cycle, the Tauren Cycle. And then, at that point, they

Page: 137

 referring to a **Takeyon** as a group of, a group of twelve Harmonic Keys,

 these are a **Takeyon** Cycle, a set of 12 Harmonic Key Cycles or Quantum

Page: 166

 you have the **Takeyon** Cycle or 12 Harmonic Key Cycles that would go with

 this would be **Takeyon** Cycle 3, yea, 1, 2, 3 ... yea. Then you

 Takeyon cycles. A **Takeyon** cycle, I believe, is 12 Harmonic Key cycles so there
 to create one **Takeyon** cycle and one Flashpoint cycle. So we have one of

Page: 111

 eventually go through **Takeyon** cycles and pop in and then re-birth and that

Page: 114

 that is where **Takeyons** fire, and that kind of thing. So they are here,

Page: 148

 in relation to **Takeyon** cycles and the PartikE and the geleziac layers of a

 set of 6 **Takeyon** Cycles, plus 2 Amplification Cycles, that occur in the Starborn

Page: 187

 we had six **Takeyon** Cycles, then Cycle-7 to get to Axis-7 and

 set of six **Takeyon** Cycles, which is its first Starborn Cycle. And we're moving

Page: 188

 there is the **Takeyon** Cycle of quantum building and replication that the Tauren Light

 Harmonic Keys form **Takeyons** and sets of Harmonic Takeyons go through several phases. They

 sets of Harmonic **Takeyons** go through several phases. They hit a flash point where

 back out again **Takeyon** Cycles, at some point we will probably deal with more

 the technicals on **Takeyon** Cycles are there. But basically we end up with one

 up with one **Takeyon** Cycle goes through a set of manufacturing 144 Harmonic Keys,

Page: 189

 you go through **Takeyon** Cycles to generate keys and the keys come together and

 together and form **Takeyons**, they go through this whole series of transformations and eventually

Page: 190

 will do a **Takeyon** Cycle, hit a flash point, the whole Tauren will flash

 these represents a **Takeyon** Cycle which means 12 sets of Harmonic Key Cycles that

 those is a **Takeyon** cycle, harmonic key generation, that generates **Takeyons**, quantum building cycles,

 harmonic key generation, **Takeyon** formation, and sets of **Takeyon** cycles. What we'll see in

 and sets of **Takeyon** cycles. What we'll see in a minute is the **Takeyon**

 minute is the **Takeyon** cycles ... one **Takeyon** cycle has within it 12 harmonic

 cycles ... one **Takeyon** cycle has within it 12 harmonic key cycles. Twelve harmonic

 cycles in one **Takeyon** cycle are broken into four sets of three, and they're

 trimesters for each **Takeyon** cycle. And at the end of each set of three

Page: 327

 those has a **Takeyon** cycle set. One **Takeyon** cycle, as I had mentioned before,

 cycle set. One **Takeyon** cycle, as I had mentioned before, is a set of

 cycles, but a **Takeyon** six cycle is a set of six **Takeyon** cycles, each

 set of six **Takeyon** cycles, each with 12 harmonic key cycles, and the seventh
 of six of **Takeyon**-six cycles. When you see this little shape ... it
 same as a **Takeyon** cycle. It works differently but it's part of the set.
 this would be **Takeyon** cycle one, then Takeyon cycle two, Takeyon cycle three ...

 expansion through the **Takeyon** cycles of the core? After that, after we get the

Page: 204

 form to build **Takeyons** so there are sets of Takeyon cycles. And each Takeyon

 are sets of **Takeyon** cycles. And each Takeyon cycle whatever quantum has been generated

 cycles. And each **Takeyon** cycle whatever quantum has been generated by the Tauren forming

 called a full **Takeyon** cycle or a full set of Key cycles, the Tauren

 the sets of **Takeyon** cycles or Harmonic Key cycles that progressively build quantum and

 goes through its **Takeyon** cycle and makes the Miad. Then that goes through its

 goes through its **Takeyon** cycle, pops out again, replicates, makes the Monad. And the

Page: 205

 first set of **Takeyon** cycles. And I always wondered, what happens after that? Because

Page: 238

 is called a **takeyon** cycle, all right. Starts with the sparks. You have 144

Page: 239

 begin to form **takeyons**, all right, where you have a set of 12 harmonic

 and form a **takeyon**, but that will happen in a set of 12 where

 set of 12 **takeyons**. I explain that much better because it's all in little

 up with a **takeyon** cycle, understanding the basics of how spark generation builds quantum

 bigger and form **takeyons** and then- which is the process of a takeyon cycle,

 process of a **takeyon** cycle, and then at a certain point of quantum generation

 generation of the **takeyons**, they all pull together and there's enough quantum there to

 spark generation creates **takeyon** cycles by which the creation point door opens and whatever's

 where you understood **takeyon** flash point. A takeyon flash point is when you've got

 you've got the **takeyons** formed, they've reached a certain quantum after the keys build

 to form the **takeyons**, reach a certain quantum that's when the flash point happens.

 that's what a **takeyon** flash point is. So you have all these things that

Page: 241

 sparks and creates **takeyon** cycles. So the first takeyon cycle of spark generation creates
 So the first **takeyon** cycle of spark generation creates the first takeyon flash point,
 creates the first **takeyon** flash point, pulls in, the Tauren pulls in and comes
 goes through a **takeyon** cycle, its pulsing cycle and it builds more quantum because
 these is a **takeyon** cycle which is a key gene ration cycle which generates
 certain point called **takeyon** flash point, pulls in, allows for replication of that quantum,

Page: 242

 the, of the **takeyon** cycles, ya, I'm doing that one. I won't go into

Page: 243

 and two is **takeyon** cycle one. That would be the takeyon cycle of the
 would be the **takeyon** cycle of the Tauren, and then the takeyon cycle of
 and then the **takeyon** cycle of the diad, so takeyon cycle one, takeyon cycle
 the diad, so **takeyon** cycle one, takeyon cycle two, takeyon cycle three, takeyon cycle
 takeyon cycle one, **takeyon** cycle two, takeyon cycle three, takeyon cycle four, takeyon cycle
 takeyon cycle two, **takeyon** cycle three, takeyon cycle four, takeyon cycle five, and takeyon
 takeyon cycle three, **takeyon** cycle four, takeyon cycle five, and takeyon cycle six takes
 takeyon cycle four, **takeyon** cycle five, and takeyon cycle six takes you up to
 cycle five, and **takeyon** cycle six takes you up to access seven which is

Page: 244

 this is a **takeyon** 6-cycle, where there are 6 takeyon cycles. Remember one
 there are 6 **takeyon** cycles. Remember one takeyon cycle is a set of harmonic
 cycles. Remember one **takeyon** cycle is a set of harmonic key cycles that end
 up in a **takeyon** flash point which is a replication which allows for replication
 replicated. And a **takeyon** 6-cycle would look like this. These are how the

Page: 245

 each of the **takeyon** cycles, and there is a whole set somewhere in one

 what are called **Takeyons**. They're called Takeyons because it has to do with theTa
 Takeyons. They're called **Takeyons** because it has to do with theTa layer, theTa 7
 the PartikE the **Takeyons** hit a critical mass where there"s enough of them. And
 they create a **Takeyon** Field which allows for the layers in the PartikE to

 through their **Takeyon** Field of Flash Point, where they flash into Source and
 these as a **Takeyon** Cycle, one full Key Generation Cycle where the PartikE pulses,
 build up to **Takeyons** and eventually Takeyons build up, and all that until you
 Takeyons and eventually **Takeyons** build up, and all that until you get to what's
 what's called the **Takeyon** Flash Point and that's when there's enough quantum, where the
 quantum, where the **Takeyon** triggers the opening of the Creation Point Door, or the
 Door, or the **Takeyon** Field does, and the whole thing pulls in for replication.
 would be one **Takeyon** Cycle. So if you have right here your Tauren Light
 here so that's **Takeyon** Cycle 1. At the end of Takeyon Cycle 1 the
 the end of **Takeyon** Cycle 1 the Tauren pulls in and does a times
 here. So then **Takeyon** Cycle 2, the Cycle of the Diad, would be here.
 or the second **Takeyon** Cycle the Diad is done. The Diad will pull back
 4, 5, 6 **Takeyon** Cycles. Then there's these two other weird things. Now we've

Page: 344

 Cycle of 6 **Takeyon** Cycles, so you had first one would be the Tauren

Page: 345

 there are 6 **Takeyon** Cycles. And then there is what is referred to as
 part where the **Takeyon** Cycle of the T auren takes place. When I think
 it be a **Takeyon** Cycle? You understand what I'm trying to . Ash Yeah.
 would be a **Takeyon** Cycle for each one of these And in a Takeyon
 And in a **Takeyon** Cycle you do have the fire Lines that are characteristic.
 there are 12 **Takeyon** Cycles. 6 CW and 6 simultaneously CCW. This .. Participant

 they can form **Takeyons**, and then x amount of Takeyons have to be made before
 then x amount of **Takeyons** have to be made before they form enough quantum to

 finally there's enough **Takeyons**, and they build up enough quantum to open the Creation

 from the CW **Takeyon** Cycles. These would be the CCW ones from the CCW

 from the CCW **Takeyon** Cycles. The CW Takeyon Cycles are referred to as the
 Cycles. The CW **Takeyon** Cycles are referred to as the ElorA system ones. They

 domains constitutes a **Takeyon** 12 Cycle actually, a full Takeyon 12 Cycle, which looks
 actually, a full **Takeyon** 12 Cycle, which looks like 6, but it also has
 way, and that **Takeyon** 12 Cycle for that system is referred to as an

 be on a **Takeyon** Cycle grid, right We'll just leave it at that And
