to the vertical axis of your body, to a distance of about 1 inch

Page: 17

to the vertical axis of your body). 4 Breathe the 6 breaths. Note: in

Page: 19

the 6-point axis marks the beginning of a breath, and the following INHALE

the 6-point axis as far as you can, then quickly and forcefully INHALE

the 6-point axis BACK to the AzurA and COUNT #1. HOLD Inhale

the 6-pont axis, then quickly and forcefully INHALE back to the AzurA and

the 6-point axis, and again draw the 3rd INHALE back to the AzurA.

on a vertical axis. Use this Heliotalic Shield-disc Action Breath to PUSH the

Page: 37

with the Ecka axis. So, they made the 13 reversed planetary seed atom. Then

Page: 40

w called the vertical axis of the Solar Cross. I'll show you what that is,

Page: 44

votates on its axis the way it"s supposed to. Here, we"re supposed to have

on the D2 axis of this planet. We have that. We have the earth

Page: 45

is the Ecka axis. Now, The Solar Cross vortex alignment - first I'll explain

on a vertical axis. So, it takes you through this process, where they used

into a horizontal axis, forming the seed atom, and they became the vortex set.

Page: 46

is the vertical axis of the Solar Cross. This is the horizontal axis of

is the horizontal axis of the Solar Cross, and it runs diagonally to our

b to our natural axis. If you think about kathara grids in our bodies- we"re Page: 49 them into this axis alignment. So, the natural merkaba spirals would no longer be be at this axis alignment. They"d be dragged into that axis alignment, and phase dragged into that axis alignment, and phase locked in. You have the DI3 reversed, and once the axis alignment was pulled in here, it would fully reverse the Here"s your vertical axis for the natural pcm universe. Here"s your gate 11 and Page: 50 the vertical arc axis, arc 8 and arc 5, and squashing them together in the vertical arc axis. They were shifted here, 90 degrees, over to the horizontal to the horizontal axis, to the arc axis. Remember, the arc axis is the to the arc axis. Remember, the arc axis is the diagonal that runs between Remember, the arc axis is the diagonal that runs between the horizontal partike and was at the arc axis, which is the diagonal in the veca now. That's forced Page: 51 had the horizontal axis -then the vertical axis of the Solar Cross was then the vertical axis of the Solar Cross was activated through the seed atom, Page: 52 central big fat axis in the center, and once that happened, this would come Page: 56 by down the arc axis. It breaks the link of the metatronic seed atom, so Page: 59 of the vertical axis of the Solar Cross and think of the horizontal axes with our Phantom axis, which is the axis of the Phantom matrix kathara grid, which is the axis of the Phantom matrix kathara grid, which is a natural Page: 60 ware the horizontal axis of the Solar Cross. So, this is what happened to Solar Cross horizontal axis, and the Blue Fire Sword initiation activated the parallel 3 through connection, the vertical axis. So, the Blue Fire Sword Initiation that we went through Page: 61 That"s the vertical axis of the Solar Cross, or what used to be the

2003. That the axis we'd be at, the natural axis. The axis of the at, the natural axis. The axis of the veca started to shift here. Now w natural axis. The axis of the veca started to shift here. Now in Hethalon, vcle. When the axis shifts, it"s not just our axis shifting like theirs broke when it is not just our axis shifting like theirs broke off and shifted. This is the meet at this axis, and the parallel light fields do the opposite up here Page: 63 the 6 point axis of the Lotus Petals grid through all the Densities to Page: 64 DUrA etrah (Axis III) We"re being asked to do a guiet chant of on a VERTICAL **AXIS** from Chakra-14 36" above your head, into the AzurA Page: 65 on its vertical axis, rapidly reaching critical mass spin speed and blurring until the Page: 68 on a VERTICAL AXIS from Chakra-14 36" above your head, into The AzurA Page: 72 be your north axis, where your head it. This would be your left/right vour left/right axis, that would be south. When we get into The Beast The natural vertical axis over to The metatronic axis. What it does with The b to The metatronic axis. What it does with The kathara grid, once it splits, Page: 73 be your vertical axis. Well, The vertical axis, it shifted over this way, and Well, The vertical axis, it shifted over this way, and The top spiral is Page: 81

vicearing, this off axis metatronic merkaba field. The energy of ourselves that went in

- by you have this axis, as The Solar Cross, that implies something. That implies you
- what The natural axis was supposed to be. You already know that you have
- ind The natural axis that"s supposed to be there, The vertical and horizontal, and
- showed The Phantom axis coming down through The AzurA, and The Wesedak axis coming
- and The Wesedak axis coming down, crossing through The AzurA, and making an X

vertical cross. That's The axis of The cross. That implies this was The natural vertical

That"s The Wesedak axis. This is where they cross through The center of The

Page: 94

would follow Phantom axis, and it would literally move around Earth, and come between

stop on its axis, and go back into The opposite spin. Earth is gate

Page: 98

The Solar Cross axis that"s running across and holding The mess together in here,

Page: 56

w "Zero Point **Axis"**. This is the Zero Point Axis because when Partiki 1

the Zero Point Axis because when Partiki 1 is born it"s there in the

far as its axis- where is up? Where is its top axis, that kind

is its top axis, that kind of thing. So, we are seeing the Partiki

is at this axis. That is called the "Zero Point Axis" because that

"Zero Point Axis" because that is where the action starts. And, from that

Page: 61

gets born on axis 4 down here in the Starborn Cycle, the Inner Light.

you get from axis 5, this is where the AmarA 48 cell cluster is

here, at the axis 6, you have birth of the Adon 144 Partiki at

w up to here, axis? ... now we"re coming into full rotation here, there"s

Page: 64

wp to the axis 7 all right. And that was where the Edon 1728

Page: 115

what is called **Axis** 6, this is where the 1st attention and focus is

<section-header> to what"s called Axis 7, and it actually starts at the Zero Point Axis,

the Zero Point **Axis**, right, where you start the 0, 1, 2, 3, brings

way around to **Axis** 7. This is where we entered the Partiki 2 Cycle

Page: 133

on the same axis and expands out that way. So, you have the six

Page: 169

wat the vertical axis at the end ofthe SEd a Cycle, this is the

Page: 170

Page: 179

the Zero Point **Axis** where the whole Spiritual Body was being born during the

it"s on this axis. But it was way down in here, and that little

blace at this axis. The lauren was born here and then its Key Cycle,

So it"s between axis 0-axis ... This is Axis-1, the T auren

between axis 0-axis ... This is Axis-1, the T auren axis. This

w ... This is Axis-1, the T auren axis. This is Axis-2, the

the T auren axis. This is Axis-2, the Diad axis. So here we

waxis. This is Axis-2, the Diad axis. So here we are at Axis-

 $^{\triangleright}$  2, the Diad **axis**. So here we are at Axis-1 where the T

we are at **Axis-**1 where the T auren is, and that"s the lauren

Page: 180

be on this axis, and see, it expanded. So you"re watching the expansion rates

we"re already at Axis-6 here-that"s where the Adon 144 Partiki is born.

to here, from Axis-7 to 8, is where you have what they have

Page: 182

that Day-9 axis ... that is when all of the Domains birth their

Page: 186

still at this axis, which is the Zero Point axis, and that"s the axis

the Zero Point axis, and that"s the axis that that was birthed on. And

and that"s the axis that that was birthed on. And then there"s something called

Page: 187

聄 the Zero-Point Axis which is when we get here ... right there ...

weet, Zero-Point Axis, merging EtorA and AdorA Elemental Adjugate Twins Spark Currents. [

Page: 221

through here (Axis-2), and there would be four trimesters (between Axis-

trimesters (between Axis-1 and 2)-each with three harmonic key cycles in

would be the natural point for the birth of

Page: 266

its natural vertical axis. It would also have these, and these become key, because

Page: 279

the central vertical axis as opposed to natural 45. So, there is one smaller

Page: 280

Here"s the natural axis and here is the axis of the host. There are

here is the axis of the host. There are certain places ... notice their

being the natural axis, rod axis, of the Aquious Matrix and the AquA"elle Host.

natural axis, rod axis, of the Aquious Matrix and the AquA"elle Host. And then

Page: 287

be a vertical axis ... it actually creates this situation, of our shield is

Page: 288

on the tilted axis, and then be able to be gently pulled back around

Page: 55

the zero-S axis alignment in what is called a key cycle, or a

Page: 56

little bit of axis 1 on day 1, of the Tauren inside the Partikl

Page: 86

know what its axis relationship is, but I bet I could guess, to the

bolding its natural axis alignment with the universal Kathara grid- that"s falling but at

it"s holding its axis. Sol is inside of Sala, just like Earth is inside

Page: 91

there on that axis, another one there, another one there ... these are the

Page: 98

sight on this axis- when I try and help you set-up I will

Page: 185

represent the zero axis and then it does one increment... I won"t go into

Page: 187

to get to Axis-7 and birth of the Edon and we"re aiming for

would be the Axis-9 or return to Axis-1, which is the straight

vor return to Axis-1, which is the straight up and down axis of

w up and down axis of the Tauren-that the T auren is on. And

 $^{ ilde{ to}}$  to the 9 **Axis**, which is really the 1 Axis on the second round,

really the 1 **Axis** on the second round, alignment And that"s the point where

Page: 190

be on this axis as the triad-Partiki 1 and Partiki 2-that"s where

this would be Axis-1. That little dot with the line? ... .The

is on the axis ... where its North point would be, or its 12-

is the Tauren's axis. The next one, now what happens is, first the Tauren Page: 191 births out on Axis-7, when we get to the Edon, 1728 Partiki units starts at this axis and when it finishes its seeding cycle, that"s the Triad by degree shift in axis going clockwise, which means coming outward. So, when this Tauren the Diad on Axis-2. This is its top axis. It"s pointed this way. is its top axis. It"s pointed this way. And it"s a little bit bigger. which is on Axis-6. When that completes its Takeyon Cycle, when this is Page: 192 withis was Axis-7 over here following the rotations. Axis-8, that was following the rotations. Axis-8, that was birth of the Edon-1728. Axis-8 the Edon-1728. Axis-8 is here. It"s the zero axis, so you"re back it"s the zero axis, so you"re back to where zero point was ... zero And back to Axis-9, which is actually the same as Axis-1, you"re the same as Axis-1, you"re going back into the second rotation. It"s at votation. It"s at Axis-9 that the 20,736 unit, the RaSh ala Unit, phases, Cycles plus the Axis-7-8 Reuche T A Cycle plus the RaSh ala you have the Axis-7 to 8 layer of the Edon. That would give Page: 203 our natural North axis so our North is actually pointing over this way except Page: 307 verystals on one axis ... I mean, there's this whole thing. This stuff is Page: 309 these is an axis, by the way ... a spin. Remember how I said are to the axis that that particular part of the cluster of Partiki is we are at axis eight Now, what there are in this ... there are get line zero, axis one, axis two, axis three, axis four, axis five, axis vero, axis one, axis two, axis three, axis four, axis five, axis six, axis one, axis two, axis three, axis four, axis five, axis six, axis seven, axis wo, axis three, axis four, axis five, axis six, axis seven, axis eight/zero. three, axis four, axis five, axis six, axis seven, axis eight/zero. You"re back four, axis five, axis six, axis seven, axis eight/zero. You"re back to zero

ive, axis six, axis seven, axis eight/zero. You"re back to zero again So six, axis seven, axis eight/zero. You"re back to zero again So when we we"re talking about Axis nine is back to one. You"re on your second rotation, Tauren. So, between axis one and two, you have a Takeyon cycle. Between two Page: 310 we get to axis eighLand remember, every one of these is key generation cycle vcle one, between axis one and axis two, etc it hits the flashpoint, goes waxis one and axis two, etc it hits the flashpoint, goes in, replicates and is ... on axis nine, so when it comes back around finally on axis around finally on axis nine, it creates the 30 cells. Now, if you take the first little axis one thing inside of the Reuzhetta inside of the Yunasai. Page: 314 from the Tauren-axis one-through axis nine, which is back to axis one axis one-through axis nine, which is back to axis one again, which leads is back to axis one again, which leads to birth of the seed atom Page: 316 SEda cycle, between axis zero and one, and this is the process of the its series from axis one ... now zero to one is called the seed takes place between axis zero and one. When we get to axis one, this we get to axis one, this is where the Tauren is. This is the Page: 318 your South/North axis, so that you can establish your own witnesses in each Page: 321 the North/South axis as this here. They want us to use the witnesses, Page: 324

we call it axis nine, which is actually revisiting axis one on the second

Page: 327

you get to axis seven, you have cycle seven here, and this is where

SEda cycle between axis zero and one. So that"s a SEda cycle, that"s not

Then you have axis one, where the Tauren would be, and this would be

 and you have axis one, axis two, axis three, and axis cycle, axis cycle, 🗫 have axis one, axis two, axis three, and axis cycle, axis cycle, axis cycle, one, axis two, axis three, and axis cycle, axis cycle, axis cycle, axis four axis three, and axis cycle, axis cycle, axis cycle, axis four cycle four, axis and axis cycle, axis cycle, axis cycle, axis four cycle four, axis five cycle cycle, axis cycle, axis cycle, axis four cycle four, axis five cycle five, axis vycle, axis cycle, axis four cycle four, axis five cycle five, axis six cycle four cycle four, axis five cycle five, axis six cycle six. Then you get ive cycle five, axis six cycle six. Then you get to the seventh cycle, Page: 339 have our tilted axis. At least 23.5 degree tilt We'll get into that too Page: 340 it, and the axis tilt, the beginning of seeing the axis tilt on Earth, of seeing the axis tilt on Earth, compared to if this were North, the b of that tilted axis of Earth, and the mess that our Earth grids are Page: 356 the Kathara grid axis of this universal system So, I just wanted you to Page: 460 the zero point axis alright, with the formation of the Triad sparking to form at the next axis and an expansion to the size that we give you are where the axis, the top is, alright for each of these. So if the zero point axis. Because zero point was right here, right. So you did Page: 461 call it the axis 9- 1, we had the, when we came back to been the 8th axis, if you are counting how many axes you went through the zero point axis which would be the 8th one in the rotation but vero point, same axis as the 1st zero point axis that the Triad was 1st zero point axis that the Triad was on. And then I call it the 9-1 axis. Then you go back again to the 1-axis that to the 1-axis that was the vertical one. Same one as the Tauren is the same axis as that of the Tauren, alright So it is important

Bodies. So the axis stuff .. there is a lot of detail on it,

Page: 487

spinning on their axis like this, right? And that actually forms the shields that

Page: 491

so its central axis would be here where the central axis of the Eukatharista

where the central axis of the Eukatharista would be here. And of course the

Page: 498

won the vertical axis we have been looking at the Rash a Hub Bodies.

Page: 516

by so its top axis is going this way ... this is the concept that

Page: 518

b direction. Our North axis is off; even science tells us that, alright? Compared to

Page: 545

Page: 13

like a vertical axis through the Astura, and they actually empower the Astura, and

Page: 51

would be their axis. That would be the zero point axis. And that little

the zero point axis. And that little tiny Kathara Grid down in there, that

born on this axis. That"s the 1 axis. You have zero axis, 1 axis.

That"s the 1 axis. You have zero axis, 1 axis. See the size difference

Vou have zero axis, 1 axis. See the size difference between this one? That

vero axis, 1 axis. See the size difference between this one? That was the

the zero point axis, they form the flame, and inside of the flame it

Page: 78

is the top axis of the staff of Urtha, say ... remember how Urtha

Page: 97

one of these axis, and they are trying to hijack the Astura passages, they

one of these axis. There's only 6 on the axis because they go through

because they go through the core and they hit, with

Page: 138

is the Center **Axis** for Cousha 1. Here's the Creation Point Door, the Zero

Page: 204

Tauren at this axis, so there is a 450 CW rotation in each expansion

Page: 242

wone that the axis over at this way would be the zero point axis,

the zero point axis, all right, that would be where the triad was. And

 $^{f t\! b}$  born on this **axis**. So, axis 1 would be the Tauren axis. And it

this axis. So, axis 1 would be the Tauren axis. And it went from

be the Tauren axis. And it went from being this size to the Tauren Page: 244 started with the axis on which the triad was formed, that Partiki one that was at the one axis again, right. So, you have like axis zero, which becomes vou have like axis zero, which becomes the 8th revolution and then the 9th is back to axis one. So, this one spins up this way and this Page: 274 with their vertical axis pointed up, right, where their top is up. Well this here ... this axis goes to the 9 point right, of the Kathara Grids Page: 306 the full 12 axis, and they will begin first the pulsing of the Aquafereion Page: 342 wand that"s its axis, right. And that"s the size of the Tauren and the Page: 343 Unit at this axis, with it"s top here, that little knobby thing refers to where the North **Axis** for that one would be, it's top. So if you  $^{\triangleright}$  on the 3 **Axis**. So, you actually have 1, 2, 3, 4, 5, 6 Page: 344 Point. Zero Point **Axis** was here where the Partikl1 and Partik12, you know, Partikl2 the Zero Point **Axis**, right in here is where we get the 20,736 size Page: 345 when you hit **Axis** 7, while this is happening in Light Body, this is the Zero Point Axis, and that"s where Partikl 2 splits Partikl 1 and starts the wat Zero Point Axis and that"s where Partikl1 gets split by Partik12, and it Page: 346 that is on **Axis** 6, I believe here, that would be the 144. That"s Page: 347 that would be **Axis** 6, this is born at Axis 7, this is born is born at **Axis** 7, this is born at the Zero Point and then Page: 349

 $^{\clubsuit}$  is born at **Axis** 1, remember the Axis 1 with the axis straight up,  $^{5}$  1, remember the **Axis** 1 with the axis straight up, to Axis 9 which  $^{\textcircled{$\psi}}$  1 with the **axis** straight up, to Axis 9 which is back all the straight up, to Axis 9 which is back all the way around, full set to the 1 Axis, which would be birth of the Seed Atom with the Page: 380 144 and then axis-7 would be over here, right, going this way. But Page: 381 be the 6-axis to the 7 right and then there is the NaVAthe 0-point axis right, where Partikl1 is split by Partikl 2, birthing into the Tauren on axis-1 and that starts the 1st Takeyon Cycle. So what Page: 382 where the 7- axis would be on a Takeyon Cycle grid, right We'll just the 0-point axis. Partikl2 is born, it splits Partikl1 into a Particum and Page: 384 bown on this axis. So there is already an atmic backflow return spark on that 0-point axis. So when this back-flow return spark comes out-the Page: 385 on the up axis. So when this one comes together, Partikl2 comes together and Page: 391 one on this axis, that is Spirit side over there, that is Manifest side Page: 410 get that other axis coming through, where you have 3 balls on this axis. balls on this axis. 2 here ... and a 1/3rd ... so you Page: 411 the zero point axis finally to the one where the Tauren is born on  $^{\textcircled{$\psi}}$  is born on **axis**# 1, that is the axis that that is birthed on. that is the axis that that is birthed on. So the Spirit Body and Page: 442

be Urtha"s north axis, right? And that would be its south. And that would

Page: 444 tilted on its axis. Its rnerkabas are tilted. It creates artificial vortices that work Page: 447 offsets the twisted axis angle of Earth, and it's from there that you can Page: 449 its upside-down axis and its left and right twisted and all of that, Page: 500 the Central Vertical axis instead of the natural 450 that you would have in Page: 503 Earth"s merkaba and axis that"s actually 180° and 23.5°. So its 180 then 23.5, Page: 508 we get my axis straight in there ... here we go. That"s technically a Page: 511 in the natural axis alignment, and this is how all. .. these are the Page: 520

- waxis, the natural axis of the gate alignments of M31 Aquinos Matrix, our PCM

Page: 77

- was the original axis that Earth was set into the Amenti host And in
- it"s like 11.75 axis, that would be the axis of Ash aLA. So, the
- would be the axis of Ash aLA. So, the first step would be to
- would be Earth"s axis here, 11.5 backshift, and then do some things in AshaLA

Page: 80

to synchronize their axis alignment, so they can pick it up. They have to

Page: 81

on a natural axis remember, so they don"t have all these weird shifts of

Page: 82

the 7-1 axis, because that would be the Resolute Twin level of the,

with crossing this axis, which is not an Allurean Chamber. The Allurean Chambers actually call-it"s 8 axis but it"s the 6 clock-how that actually fits in

Page: 105

on the 4 axis, this would be our KaLE-Hara Body. And the stuff

Page: 168

both have our axis upside down ... our North is South. And both of

Page: 251

is at this axis relationship. Its 12 is here. It's in a normal position,

is on this axis here, another Kathara Grid. But this Kathara Grid is actually

Page: 6

those, that eight axis. They call it a six-cycle, though, because you have

was the sixth axis ... axis six. All right? So this starts the cycle

sixth axis ... axis six. All right? So this starts the cycle of Partiki

Page: 50

would follow this axis, where its top would be here, and that"s what will

von this natural axis, and they still are. This is the Milky Way. We'll

Page: 51

at that Conjugate axis, 90 degree. It was our Parallel Eckasha. Over here, we

Page: 53

this type of axis. There"s one main one that is the prime one that

Page: 56

with its north axis, going in the same direction as Urtha"s. And, originally it

Page: 57

having its north axis aligned with the north axis of Urtha, no, Earth, Earth

with the north axis of Urtha, no, Earth, Earth is 180 degrees upside down

Page: 59

World, because its axis is between the Milky Way tilt and the natural one

Page: 71

37] Earth"s Tilted **Axis** & Wobble, Planetary Clock & Star-Gate Misalignment Copvtight A"shavana

Page: 75

have its north axis norlh. Its top merkaba spiral norlh. Its 12 gate norlh.

Do the same axis, North is North but vertical at the moment. You are Page: 81 that tilt, its axis actually goes-this is the Milky Way tilt here. This which makes are the interest of the interest o was natural Time Vector axis and back into the Living System. Copyright A"shavana & A"zahvana Page: 84 and the natural axis. So when we begin to get to the point where to that 11.75 axis and that would be our fastest way to Home because Page: 89 stayed at this axis, or the stuff that almost made it to the alignment alignment of this axis will fall back, and it will go into its own Page: 90 the 11 .75 axis that way, and Earth was put in, in alignment with Page: 91 a really weird axis through the Solar Plane. We"ve got Nibiru out where we Page: 92 iust have the axis. I think I have them, yah I have it in Page: 108 inice little 8-axis. It shows them being split. This one isn"t, all the

the eight-pointed axis of the- what are they called?Octants that we introduced

Page: 53

one having its axis tilted to where it creates an offset in the split,

Page: 54

where the natural axis for Meta-Galaxy-6 should be from here, its top,

Page: 55

was if this axis split and shifted into that angle. But we have the

directly into this axis, that runs up-now here you would have Meta-Galactic-

Page: 58

them on that axis, which means our Milky Way is directly connected to them.

Page: 60

valled the Sextant Axis that happens down around in here. That goes back to

Page: 64

to hit this axis, it should come down here and this way, but it

Page: 70

be the natural axis that coming from the Ecka, frequency would flow in, and

Page: 72

out on this axis out the right eye, They actually bend here. So these

Page: 106

whatever axis you want to put it on, right So we put

Page: 113

of the normal axis. So that"s how we got the rotations to see where

Milky Way 3 axis and here is the M-31 number 3, so you
is the Essential Axis that was needed to do something that can stop that
made it to Axis-3 but we still needed to make it to 6.

Page: 116
we were on Axis-1 it was our Galactic Core that came on this

Page: 121
with the wrong axis of things. And if we do, that"s where we end

Page: 125
here, in this axis. And I believe it is right here, actually it is,

Page: 126

basically, those 8 axis that come off the Kathara Grid. This Spiral here, this

Page: 46

of the Earth''s axis, which has something to do with what they did in

Page: 47

where the axis actually stays there, but the crust rolls all over the

Page: 72

on the natural axis for that So, learning about the Encryption Lattices is going

Page: 84

have its vertical axis that it spins on. You also have what would be

in the same axis as we are. But it evolved differently from much further

Page: 86

shift the whole axis and shift the whole thing, it still stays at 23.5

they need that axis alignment to keep the poles aligned with the misalignments that

Page: 99

showing the different axis things that are happening, where our wobble is, where the

the Light Body axis. Our atoms should be over here and our Light Body

was at the same axis of the Sun. The north/ south should line up. We'll

Page: 159

has its little axis tilt- the 23.439 or whatever, but 23.5- that"s what its

what its geographical axis is tilted, and it wobbles on its axis and that"s

ightharpoonup wobbles on its **axis** and that"s what gives you the larger cycle of the

same common solar axis North - right; we"re tilted this way, looking at it

around at its axis tilt in a clockwise rotation, which means they pass each

Page: 169

vof the Solar Axis, which also runs the full Milky Way line. So it's

wat the 23.5 axis-but there's a wobble effect So the pole actually points

shift the planetary axis literally and the magnetic fields this way to make that

Page: 181

- aligned on this axis but it actually took our 2 Ah-VA"-yas, the
- b do on this axis, on the natural axis they are going to accelerate this.
- von the natural axis they are going to accelerate this. They are going to

- be the atomic axis, right, with our Light Body axis over there, right. Now,
- <section-header> our Light Body axis over there, right. Now, we"re pulled up more up. Now,
- iust shifting the axis of the rotation of your atoms and your Orb body
- the Light Body axis, once this shifts over into that axis, then it goes
- over into that axis, then it goes from being what was called the AahJhA"
