- 📌 **Partiki** phasing is a very fundamental process in creation through which
  - 📌 process involved in **Partiki** phasing. We have the Original PKI, which manifests as a
  - 📌 creation (PKA). **Partiki** phasing, in simple terms, is how these three units,
  - 📌 three units, the **Partiki**, the PartikA and the Particum interact with each other. Basically

 15 Manifestation Fields. **Partiki** Phasing Process There is a very interesting correspondence between the

 one Partiki, another **Partiki** of the same quantum came through the same place, split  
 one. The one **Partiki** first splits, but it's linked together because of the type

 Partiki 1 and **Partiki** 2 carry. When it splits it stays linked through the

 quantum equivalent to **Partiki** 1 that is called a spark, and they also reassemble  
 reassemble the first **Partiki** 1. That triggers opening of creation point door at the  
 center, inside of **Partiki** 2 now, the backflow spark and Partiki 1 go back  
 backflow spark and **Partiki** 1 go back into the creation point door and in  
 quantum with the **Partiki**. So, it sends a Backflow Return Spark out and it  
 back the original **Partiki** 1. When the original Partiki 1 comes back out with  
 When the original **Partiki** 1 comes back out with the spark, the Partiki 1  
 the spark, the **Partiki** 1 splits the Partiki 2 that had split it in  
 1 splits the **Partiki** 2 that had split it in the first place and  
 "down-phase", **Partiki** 1 split "down-phase". This has to do with  
 So, we have **Partiki** 2 splits ... Partiki 1 is now at the center  
 2 splits ... **Partiki** 1 is now at the center and the 151 Backflow  
 have a split **Partiki** 2. Now, that does the same thing, but an Up-  
 a Particum from **Partiki** 2 ... they come together and make an Etheric Spark,  
 into center with **Partiki** 2 sends out, Source sends out a backflow return Etheric  
 spark and sends **Partiki** 2 back out, which of course splits Partiki 1 again,  
 of course splits **Partiki** 1 again, right. So this is where the perpetual motion  
 come in, where **Partiki** 1 and Partiki 2 continually split each other and send  
 Partiki 1 and **Partiki** 2 continually split each other and send backflow in, and

 phase we're seeing **Partiki** 2 is now holding the center position and Partiki 1  
 center position and **Partiki** 1 is split, which means it's going to make another  
 3 forms by **Partiki** 1. Spark 3 is also Atmic because it's a down-  
 phase, makes another **Partiki** 1 Atmic spark. Partiki 1 and Spark# 3 go back  
 1 Atmic spark. **Partiki** 1 and Spark# 3 go back into Source, Creation Point  
 and see, the **Partiki** at the center doesn't split until the backflow return comes  
 of the reassembled **Partiki** and its spark to pass through. The spark actually acts

 splitting the other **Partiki** at the center. (1:00:18) So, they go

---

Page: 71

 have 2 times **Partiki** 1 has split and made Atmic Sparks, and 1 time  
 and 1 time **Partiki** 2 has split so far. The next natural thing would  
 thing would be **Partiki** 2 in the delivery of the Jd Spark, which would  
 Return Spark and **Partiki** 1. Partiki 1 "s at the center again, Partiki  
 and Partiki 1. **Partiki** 1 "s at the center again, Partiki 2 splits  
 the center again, **Partiki** 2 splits and Partiki 2"s split comes back together  
 2 splits and **Partiki** 2"s split comes back together and makes another Etheric  
 Crystal with the **Partiki**. Now the portions that form the Cousha with a "

 of Partiki 1, **Partiki** 2 and Spark 4. Now, all of those, the sparks,  
 pieces of a **Partiki** coming back together have the same quantum as a Partiki.

 a ... 1 **Partiki** has a quantum of 360 Ek. And so, we have  
 we have 3 **Partiki**, so it has 360 Ek times 3 would be the  
 quantum of 3 **Partiki**. 360 Ek is 1 Partiki, so you have that times  
 Ek is 1 **Partiki**, so you have that times 3, would give you how  
 power of 3 **Partiki**-all right, the electrical power of 3 Partiki. When we  
 power of 3 **Partiki**. When we get to what happens next, we"re going to  
 was formed by **Partiki** 1 and Partiki 2 and the sets of sparks all  
 Partiki 1 and **Partiki** 2 and the sets of sparks all right, so Partiki  
 all right, so **Partiki** 1, Partiki 2 and Spark 4 that are inside, they  
 so Partiki 1, **Partiki** 2 and Spark 4 that are inside, they come together  
 power of 3 **Partiki** or 360 Ek times 3, all right. So, this is

-  power of 3 **Partiki**, with 1J3rd power of 1 Partiki in front of creation
  -  power of 1 **Partiki** in front of creation point door and the other part,

-  which means 1 **Partiki** power all right, times 360 Ek, and it's positive charge
  -  held in the **Partiki**'s. And here you have 2/3rds on the Spirit side,
  -  you have 2 **Partiki** power on the Spirit side and it's 2 times the

  -  Partiki 1 and **Partiki** 2 are formed and then this whole thing emerges from
  -  units inside-the **Partiki** inside-rub together and spark, it allows them to pull
  -  power of 3 **Partiki**, all right. So, # 2, it's times 2 replica, so you
  -  power of 3 **Partiki** ... or, 1 Cousha ... now, it's the power of
  -  Cousha or 3 **Partiki** is the power of 6 Partiki, all right, that's a
  -  power of 6 **Partiki**, all right, that's a quantum of 6 Partiki power. This
  -  quantum of 6 **Partiki** power. This one has 2/3rds manifest and 1/3rd
  -  that means 4 **Partiki** power would be moving forward and you'd have Partiki power
  -  and you'd have **Partiki** power of 1J3rd of 6, which is 2 ... 2
  -  2 ... 2 **Partiki** power, pulling back. So, you'd have a quantum of 4

 Partiki. The 1st **Partiki** is looked at as the intention to create, but it

 the split of **Partiki** 1 by Partiki 2, to form what is called the  
 Partiki 1 by **Partiki** 2, to form what is called the Triad. And it  
 of the 1st **Partiki**. And what's neat is, every time a fertilization of a  
 is where the **Partiki** 1, pre-Partikis, pre-Partiki Cycle, where we 1st start,  
 Partiki 1, pre-**Partikis**, pre-Partiki Cycle, where we 1st start, pre-Partiki creation,

 the NaVE-Na **Partiki** Creation Cycle. The 1st part in which part...which results  
 the birth of **Partiki** 1 is called the NaVA-Na Cycle and ends in  
 in birth of **Partiki** 1. And then there is the NuVA-Na Cycle which  
 in birth of **Partiki** 2. And at the birth of Partiki 2, is when  
 the birth of **Partiki** 2, is when Partiki 1 is split and it begins  
 2, is when **Partiki** 1 is split and it begins the process ... we  
 So, we have **Partiki** 1 born here, started here, born here. Partiki 2 is  
 here, born here. **Partiki** 2 is born there and that sets, that creates the  
 is formed by **Partiki** 2 taking the place of Partiki 1, and Partiki 1  
 the place of **Partiki** 1, and Partiki 1 breaking into a PartikA and a  
 Partiki 1, and **Partiki** 1 breaking into a PartikA and a Particum phase set.  
 hooked together by **Partiki** 2 and they come together and they spark. And that  
 is called a **Partiki**. So, a Partiki actually becomes the measurement, the 1st quantum  
 Partiki. So, a **Partiki** actually becomes the measurement, the 1st quantum that can be  
 a quantum a **Partiki** has, what kind of energy Partiki 2 has compared to  
 kind of energy **Partiki** 2 has compared to 1. You'll see how the quantum

 which had three **Partiki**, a power of three Partiki, it takes that and doubles it,  
 a power of three **Partiki**, it takes that and doubles it, so the Diad is  
 power of six **Partiki**. But, at the same time, it gives birth to the

  -  has 6 (**Partiki**)-so it's like a times 2 replication or quantum building.
  -  has 12 (**Partiki**). So it's another times 2,  $6 \times 2$ . That's 12
  -  2 is 24 **Partiki** power ...  $24 \times 2$  is 48. Then we have
  -  3 is 144 **Partiki** power, so just so you know what those numbers refer

 by the first **Partiki** is always open. It opens and closes so it allows

 layers of the **Partiki** form and outside of those you have the six outer,

 the first three **Partiki** backflow return sparks of the Tauren. So, the nine inner

 together when those **Partiki** units rubbed together through the natural geleziac layers that are

 and its three **Partiki** units and its PartikE, where the nine layers form Now

 you without the **Partiki**, that this is the nine inner geleziac layers of the

 you have the **Partiki** templates and then they form the ParTE"-KEi templates and

 you go from **Partiki**, to Par-TE"-KEi to Particle. And particles arrange themselves  
 that is composed of **Partiki** units. So, this is all part of the progression of  
 started with one **Partiki** and we went through the Tauren, we went through key  
 is the 20,736 **Partiki** units of the Ra-Sha-La unit And that is

---

Page: 190

 from the 1st **Partiki** which would be on this axis as the triad-Partiki  
 as the triad-**Partiki** 1 and Partiki 2-that"s where Partiki phasing begins forming  
 Partiki 1 and **Partiki** 2-that"s where Partiki phasing begins forming a triad. This,  
 2-that"s where **Partiki** phasing begins forming a triad. This, what they refer to  
 Tauren had three **Partiki**, this one has six Partiki with the three as the  
 one has six **Partiki** with the three as the Tauren in the center So,  
 go with the **Partiki** numbers are on each side and if you put them  
 full number of **Partiki** in that cluster. This is the Starborn process. So it  
 from the 1st **Partiki** one and two to the Tauren, to Tauren"s Flash Point  
 which has three **Partiki** units and its PartikE in the center .. that goes  
 as its 3 **Partiki** plus its PartikE ... its "times 2" replica comes  
 the outside-the **Partiki** numbers-become ... three doubles becomes six ... the other

 the Edon, 1728 **Partiki** units birth out At that point there is a 15-  
 with the two **Partiki** that split and form the first three backflow sparks that  
 of clusters of **Partiki**, these are before you get to the Par-TE"-KEi  
 you had 48 **Partiki** times 3 equals 144. That"s the number of Partiki units  
 the number of **Partiki** units in the A don, which is on Axis-6.  
 you had 144 **Partiki** times 12, you get 1728 Partiki. So you have 1728  
 you get 1728 **Partiki**. So you have 1728 Partiki here and that"s where you  
 you have 1728 **Partiki** here and that"s where you also end up with the

 has a 20,736 **Partiki** unit-it"s called the Starshine Unit. So, this is the  
 layers, clusters of **Partiki** Light Cells in the Light Structure, form what is called  
 set of clusters, **Partiki** Clusters, are the Reuzhetta. All right, so you have the

 of the first **Partiki** unit and the second Partiki unit and that's where natural  
 and the second **Partiki** unit and that's where natural first creation mechanics start. Now,

 from the 1st **Partiki** and the 2nd Partiki and how they came through and  
 and the 2nd **Partiki** and how they came through and how they make the  
 the interactions and **Partiki** phasing of Partiki 1 and Partiki 2 of first creation.  
 Partiki phasing of **Partiki** 1 and Partiki 2 of first creation. At the start  
 Partiki 1 and **Partiki** 2 of first creation. At the start of the creation  
 have the 3 **Partiki** units inside of the Tauren and this thing in the  
 Tauren has 3 **Partiki** units and this is where we get Atomic matter levels  
 different than the **Partiki**. It has a full geleziac structure Now, we'll look at  
 cell, its 3 **Partiki**, and its PartikE photo-generator cell in the center [  
 rubs these three **Partiki** together through the PartikE geleziac layers and this is where  
 is here, the **Partiki** are these three here and the whole thing is the

 as the other **Partiki** balls. So 10, 11, and 12 are still inside of  
 start with a **Partiki**1, **Partiki** 2 that forms a Tauren for that level that

---

Page: 307

 there was a **Partiki** in the consciousness of God Source. How did creation emerge  
 these things, that **Partiki** ... there was one other Partiki that was put through  
 was one other **Partiki** that was put through the center of the first one  
 that started the **Partiki** phasing and Partiki phasing started the process of Partiki sparking  
 Partiki phasing and **Partiki** phasing started the process of Partiki sparking and making a  
 the process of **Partiki** sparking and making a spark of their quantum that goes  
 which has three **Partiki**, not two like a vesicapisces artificial light or artificial finite  
 ... from the **Partiki**, **Partiki** phasing, to Tauren, to Takeyon cycles-which are spark

 is how, from **Partiki** 1, all the way up to the formation of the  
 keys, that from **Partiki** 1 we end up with Objectification of the Keys-Key  
 from the first **Partiki** in Source all the way through the body structures, all  
 which is the **Partiki** 1 and Partiki 2 and they split.. the Tauren, that's  
 Partiki 1 and **Partiki** 2 and they split.. the Tauren, that's the light seed

 of how many **Partiki** you have now. You started out with three Partiki in  
 out with three **Partiki** in the Tauren. Now we're up to 144. This shows  
 numerical progression of **Partiki**, and how they build on the Krist code. You have  
 goes with a **Partiki** in the core template. Then you have ... and each  
 the cluster of **Partiki** is on. By the time we get up here, we  
 or the first **Partiki** set, would be. From there, you get line zero, axis

---

Page: 310

---

 the numbers of **Partiki** in the first. So by the time we're down here,  
 RaShALae. These are **Partiki** of the RaShALae. And then this one goes again and  
 far as the **Partiki** counL but what it gives you is ... on axis  
 whatever whatever whatever **Partiki**, you can divide how many Partiki are in each of  
 divide how many **Partiki** are in each of the cells, except there is a

---

Page: 311

 you went from **Partiki** bodies, to Par-TE"-KEi bodies. The Partiki were smaller,  
 KEi bodies. The **Partiki** were smaller, and now you're into larger light cell structures-  
 into the first **Partiki** creation, and pre-Partiki creation, which I'm not even going  
 creation, and pre-**Partiki** creation, which I'm not even going to touch off the  
 consciousness. The first **Partiki** was a unit of the consciousness of God Source. So,

---

Page: 312

 from the first **Partiki** all the way up through the Par-TE"-KEi templates,

---

Page: 314

 had the first **Partiki**, second Partiki to the birth of the Tauren. We already  
 first Partiki, second **Partiki** to the birth of the Tauren. We already did that

 from the first **Partiki** unit, the second Partiki unit, all the way up through  
 unit, the second **Partiki** unit, all the way up through the creation of the  
 we had the **Partiki** bodies. From that point, we go into the Par-TE"-

 Lightborn ... well **Partiki**, Lightborn, Starborn, Lifeborn, where life is born, then we have  
 back to first **Partiki**. There's a whole series of these, and let's just touch  
 after the pre-**Partiki** creation stuff in the conscious field of God/Source, the  
 Source, the first **Partiki** was created, then the second Partiki was created in the  
 then the second **Partiki** was created in the same place, and it creates a  
 configuration. That's three **Partiki**, and at the center, there's this magical thing called the

 triad, which was **Partiki** one and Partiki two, and one spliL they come back  
 Partiki one and **Partiki** two, and one spliL they come back together with that  
 with its first **Partiki** and its second Partiki, its Tauren, and then after the

from the first **Partiki**. The first expansion level was the Tauren cycle that was  
 was the three **Partiki**. We won't count the PartikEs in the center right now,  
 but the three **Partiki** went from three. That does a whole Takeyon cycle of  
 with the three **Partiki** and the third that comes out from the Tauren. This  
 we have three **Partiki**, and it goes 3x2 is 6, then 6x2 is 12,  
 12x144 is 1728 **Partiki**, and 1728 Partiki, they are the 1728 cells or keys  
 Partiki, and 1728 **Partiki**, they are the 1728 cells or keys to Edon that  
 much bigger than **Partiki**. I don't even have the quantum breakdowns on all of

 first Partiki second **Partiki** came through the same place as the first Partiki split  
 as the first **Partiki** split the first Partiki created the Particum and the Partika,  
 split the first **Partiki** created the Particum and the Partika, hooked onto the second  
 onto the second **Partiki** and that creates what's called the triad. That's the triad

 power of three **Partiki**. We're not going to count the PartikE on these, right,

 base was three **Partiki** was its divine constant, all right, that becomes what"s called

 with its 3 **Partiki** but it also has a times 2 replica so you

 went from 3 **Partiki** to 6 Partiki. Power of 3 Partiki to power of 6 Partiki

 Partiki to 6 **Partiki**. Power of 3 Partiki to power of 6 Partiki and it expanded

 Partiki. Power of 3 **Partiki** to power of 6 Partiki and it expanded from this size  
 to power of 6 **Partiki** and it expanded from this size to this size. This  
 It has 6 **Partiki** so as they rub together they're making more sparks or  
 them, more electrical **Partiki** thrust in them. When they go in and birth back  
 of how many **Partiki** it carries and each Partiki, which we won't get into  
 carries and each **Partiki**, which we won't get into right now, has a very  
 and form a **Partiki**, so it's all mathematical. So, when we get to here  
 power of 48 **Partiki** and it gets bigger, right? Come down here, there's a

---

Page: 242

 and becomes 20,736 **Partiki** of what is called the Rashallah, all right Then there's

---

Page: 244

 was formed, that **Partiki** one that got broken down by Partiki two and started  
 broken down by **Partiki** two and started to phase. That's where the Tauren was

 the first 3 **Partiki** back flow sparks being born from the triad when Partiki  
 the triad when **Partiki** two came through Partiki one, Partiki one split, Particum Partika

 is where the **Partiki** one and the Partiki two for the next domain out  
 one and the **Partiki** two for the next domain out are born. We're at  
 be like the **Partiki** one and Partiki two of the first creation, but on  
 Partiki one and **Partiki** two of the first creation, but on the level that

 back into the **Partiki** state, where the seed atom is and those kind of  
 back into the **Partiki** level where the seed atom is, right, and then pop

---

Page: 279

 of, you have **Partiki** one and you have Partiki two coming through Partiki one,  
 and you have **Partiki** two coming through Partiki one, splitting Partiki one into the

 two coming through **Partiki** one, splitting Partiki one into the Particum and the Partika,  
 Partiki one, splitting **Partiki** one into the Particum and the Partika, and that where  
 what is now **Partiki** two, was here, right, because we have Partiki one that  
 because we have **Partiki** one that split. Partiki one actually went back into Source  
 one that split. **Partiki** one actually went back into Source with its spark, and  
 spark comes out, **Partiki** one comes back out and Partiki two splits, so there'd  
 back out and **Partiki** two splits, so there'd be and up split, I don't  
 this way from **Partiki** one, form what are called the atmic sparks or what  
 up here from **Partiki** splitting this way, all right, that means that Partiki two  
 that means that **Partiki** two would have its Partika and Particum and they'd come  
 here. So, when **Partiki** two does its first split, and makes its first etheric  
 it, as the **Partiki** two had gone back together and came back into the  
 came out, again, **Partiki** one that was here split again so Partiki one was  
 split again so **Partiki** one was going to go into a down phase again.  
 then again splits **Partiki** two. So, Partiki two ends up split up here and  
 Partiki two. So, **Partiki** two ends up split up here and again making the

---

Page: 280

---

 phase with the **Partiki** two is split, it makes its spark, it's getting ready  
 atmic sparks from **Partiki** one, the back flow return sparks out and one etheric  
 return spark from **Partiki** two, and at that point they all pull into Source  
 in the original **Partiki** one and the original Partiki two, ok, each with their  
 and the original **Partiki** two, ok, each with their quantum of one Partiki, right,  
 quantum of one **Partiki**, right, and we'll get into that in a minute, they  
 quantum of one **Partiki**, because when you split either one of them, Partiki one  
 one of them, **Partiki** one or Partiki two, you end up with two halves,  
 Partiki one or **Partiki** two, you end up with two halves, you know, like  
 quantum of one **Partiki** again So, you have now a quantum of 3 Partiki. You  
 a quantum of 3 **Partiki**. You have Partiki one original, Partiki two original of the  
 Partiki. You have **Partiki** one original, Partiki two original of the original triad, and  
 Partiki one original, **Partiki** two original of the original triad, and you have got

---

Page: 281

---

 quantum of three **Partiki**, and the quantum of one third of a Partiki is  
 third of a **Partiki** is the UM flame So, this is where we get  
 where the first **Partiki** thought forms before the first Partiki was born came from.

 before the first **Partiki** was born came from. And on this side of the  
 where the first **Partiki** came from, this is where the manifest side takes place.  
 we have one **Partiki**, so the energy content of one Partiki, the quantum it  
 content of one **Partiki**, the quantum it holds, is equal to 360 what are

---

Page: 282

 think, in a **Partiki**. What it comes out to is you have a quantum  
 of how many **Partiki**, and that would mean that could be translated into Ohms,  
 start in the **Partiki**, and they're held within the encryptions of the Partiki. We've  
 encryptions of the **Partiki**. We've talked about the first encryption's, I think that was,  
 of, and how **Partiki** one and Partiki two were created, and all that stuff  
 Partiki one and **Partiki** two were created, and all that stuff that I don't  
 1-2-3 **Partiki** and 1/3rd of a Partiki, condensed into a krystallization  
 3rd of a **Partiki**, condensed into a krystallization called an Ecousha krystal. These become  
 triad was made, **Partiki** one and Partiki two were made, all of that memory  
 Partiki one and **Partiki** two were made, all of that memory imprint is held  
 quantum is 3 **Partiki** so 360, a quantum of 360 Eck times 3 plus the  
 add up the **Partiki**, the 3, the quantum of the 3 Partiki. It's in  
 of the 3 **Partiki**. It's in this that begins the process of being able

---

Page: 283

 power of 3 **Partiki** which is one Cousha times one equals the power of  
 power of 3 **Partiki** is its quantum, so that it would have the power  
 the power of 3 **Partiki** times 1 equals three Partiki, that's its quantum. You have  
 1 equals three **Partiki**, that's its quantum. You have 1 /3rd of it,  
 power of one **Partiki** in manifestation and 2/3rds of it, 2/3rds of  
 power of 2 **Partiki** in Spirit. Now, to get the differential between these two  
 do a one **Partiki** minus 2 Partiki gives you a negative one Partiki would  
 Partiki minus 2 **Partiki** gives you a negative one Partiki would be the g-  
 a negative one **Partiki** would be the g-force, so you have a negative  
 and its 3 **Partiki** times one, power of three Partiki as its quantum and  
 power of three **Partiki** as its quantum and one third of its out in

---

Page: 284

 again, its 3 **Partiki**, which is the quantum of one Cousha times 2 equals  
 quantum of 3 **Partiki** times three gives you a quantum of 9 This one,
