 that show where **Seeding-1** was and where that ended with the Electric Wars,  
 5.5MYA, then when **Seeding-2** was and that ended with the Thousand Years War.  
 War. And then **Seeding-3** where it started and ... here we go ...

 5.5 MYA Human **Seeding-1** was destroyed by Electric Wars. 3,700,000 Human Seeding-2

 birth of the **seed** atom, the Lifeborn cycle which encompasses six cracks, six pops,

 is called the **seed** cycle ... actually the first part of the SED a

 cycle, that's the **seed** cycle, yeah. Now, this is referred to as the seed

 to as the **seed** domain. That's before the core domain. That's where you have

 cycle, or a **seed** cycle. This is the structure of all the cycles. These

 the inner Yunasai **seed** atom, deep in the center there ... at the center

 next level; the **seed** atom that would be born at the end of that

-  the middle UmShaddEi **seed** atom, and after you get through its six cracks, six
-  the outer YanA"sa **seed** atom, which would be in the center here, and then

-  You had a **seed** domain there. Then you had the core domains here, and

-  creation of the **seed** atom, through the creation of the bodies that emerge through
-  Yunasai, or the **seed** atom level in any of the domain cycles, then you
-  Up to the **seed** atom, we had the Partiki bodies. From that point, we

 Humans were even **seeded** here, before they got a chance to seed them over  
 a chance to **seed** them over here. They wiped out the Seeding 1, and  
 wiped out the **Seeding** 1, and 2 I think, over on Parallel- of the  
 they hadn't even **seeded** them here yet, you know the Amenti Angelic Human Races.

 after we were **seeded** there 250 million years ago, the Angelic Human Races -

 So Angelic Humans **Seeding** first 1 could take place here as we know from

 first Tauren Light **seed** and all of that. So it is really complicated information  
 of the Prana **Seed** in the physical bodies. That has already occurred in the

 is when they **seeded** the Turaneusiam-2 Race which are the Angelic Humans on  
 after we were **seeded** over in Parallel, after the Humans were seeded over in

 separation of the **Seed** atom from the Prana Seed of the outer structures, then  
 from the Prana **Seed** of the outer structures, then there is a phase of  
 the compacting Prana **Seed**. And that is when it starts to give off gamma  
 in the Prana **Seed** that leads right into the Seed atom and then back  
 right into the **Seed** atom and then back further all the way back to  
 block the Prana **Seed**, it blocks the Eiron Point-that doorway-so any energy  
 when the Prana **Seed** closes or when the Core Gates close. On Earth, the  
 by the Aquafereion **Seeding**-1 Races and the Aquari Races of Urtha and that

 they hadn't been **seeded** here anyway since Tara, but 25 million years ago is

-  the Tauren Light **Seed** is formed. And we covered the Tauren Light Seed information
-  the Tauren Light **Seed** information in Tenerife as well I believe and we also
-  the Tauren Light **Seed**. You had the 3 E-Na"s which are Partiki and
-  configuration. The Light **Seed** of the Tauren is a Tri-Veca configuration made of
-  just the Light **Seed** at this point but this is the structure that you
-  whole Tauren Light **Seed**, but here you are seeing the 9 inner proto-geleziac

---

Page: 456

---

-  the Tauren Light **Seed**. You have your 9 inner geleziac layers and then you

---

Page: 457

---

-  the Tauren Light **Seed**. So what you have here are, I will list the
-  the Tauren Light **Seed** generates its own quantum and at a certain point in
-  Tauren little Light **Seed** creates, generates quantum. It is the Photo-Generator Cell capable

---

Page: 458

-  tiny little Light **Seed** that has the PartikE at the center ... and we"ve
-  the Tauren Light **Seed**. The Tauren expands and contracts, makes its Key Generation Cycle

---

Page: 459

-  is born the **Seed** atom, alright. So this is how the first Seed atom-
-  how the first **Seed** atom-the Yunasai-is formed. This Yunasai is the Seed
-  Yunasai is the **Seed** atom for the Inner Domains right. This is way before
-  Flame Cycle and **Seed** atom is the next expansion. But we never had, until
-  learned from the **Seed** atom, what happens next? Alright we"ve got a Seed atom,
-  we"ve got a **Seed** atom, great. How do we get from the Yunasai Seed
-  from the Yunasai **Seed** atom all the way up to the Light Body structure

---

Page: 460

---

-  From the **Seed** atom, what you end up with when you see all
-  with is the **Seed** atom and what is called the Rosetta, right. The Rosetta
-  into the 1st **Seed** atom. Now there is something that happens after this and
-  we"ve got the **Seed** atom. The Seed atom is again at the same top,
-  Seed atom. The **Seed** atom is again at the same top, where its top
-  of the Light **Seed** of the Tauren in the Planet that has caused so
-  the Tauren Light **Seed** is born; then the cycling of the Tauren to create

 Rosetta in the **Seed** atom is called the StarBorn Cycle. Then from there we  
 next after the **Seed** atom because it is after the Seed atom and its  
 is after the **Seed** atom and its Rosetta that are created . . . The

---

Page: 461

 alright, where the **Seed** atom cycles and makes Sparks and generates quantum in itself  
 to even the **Seed** atom. Now the Seed atom just went 6 cracks and  
 atom. Now the **Seed** atom just went 6 cracks and got ... you know,  
 to just the **Seed** atom, compared to the Light Seed that the Seed atom  
 to the Light **Seed** that the Seed atom was huge compared to. So Light  
 Seed that the **Seed** atom was huge compared to. So Light Body structure is

---

Page: 462

---

 up to the **Seed** atom, then you have the Life Born Cycles that take  
 not including the **Seed** Cycle. So this is big. Creation is not like just,  
 your little Light **Seed** that is in here, and with its Fire Chambers that  
 where the Prana **Seed** is born at the center alright. So you've got the  
 you've got the **Seed** atom back here and then up here as things are  
 got the Prana **Seed** being formed and the Prana Seed is configured like a  
 and the Prana **Seed** is configured like a Tri-Veca, like a phase set  
 back into the **Seed** atom. So there is an open exchange of energy between  
 As the Prana **Seed** phases it opens what is called the Eiron Point. The  
 Tauren and the **Seed** atom. It is the connection from the Par-TE"KEi  
 Templates into the **Seed** atom where that would take you back to the connections  
 formation of the **Seed** atom. This is where the RaSha Bodies begin at the  
 birth of the **Seed** atom and the Rosetta. This is the Life Born Cycle

 back into the **Seed** atom and then comes back out expanded again and it  
 back into the **Seed** atom and would replicate. These, I call them A.S.

---

Page: 464

 forms from the **Seed** atom. Then Par-TE-KEi Template does its expansion thing  
 a 15-cell **Seed** atom all on its own but there is a huge  
 you had a **Seed** atom that got created from the Tauren created the Seed  
 Tauren created the **Seed** atom, Partiki created the Tauren, the Tauren created the Seed

 where the Prana **seed** is born. We had the Krystallah in the other one,  
 Planes and Prana **seed**, you end up with a .. . you still have  
 forms the Prana **seed**. The Prana seed, we'll talk more about the Prana seed  
 seed. The Prana **seed**, we'll talk more about the Prana seed because I don't  

about the Prana **seed** because I don't even have any diagrams with it on

-  of the Prana **seed** that is in the Par-TE"-KEi Body once it
-  when the Prana **seed** sparks close where it's 2 little balls come together, make

-  whatever"s behind the **seed** atom going all the way back to the Tauren, going
-  and the Prana **seed** in the Par-TE"-KEi Body. And what happens next

-  by the Prana **seed** that was at the core of the ParTE"-KEi Body,

-  through into the **seed** atom back through all the way back to Source, right

Page: 491

---

-  your Tauren light **seed** and all of those kind of things, alright. That took
-  flow between the **seed** atom and the Eiron point of the Prana seed and
-  of the Prana **seed** and it has to do with the phasing of the

-  that creates the **seed** atom for the outer domains and creates the Rash aLAe

-  the UmShaddEi middle **seed** atom, here would be the Yon-A-sa outer seed
-  A-sa outer **seed** atom, alright? Now, these here are referring to the cycles,
-  of the Yunasai **seed** atom and the Rosetta. Alright, so that"s where we are
-  actually the Star **Seed** Cycle which is the first part of what becomes the
-  that"s the Star **Seed** Cycle that has its own little StarBorn Cycle within it,
-  through the Yunasai **seed** atom going into the Life Born Cycles where you end
-  have the Yunasai **seed** atom, it goes through this cycle, these cycles are referred

 with the prana **seed** - but when bardoah occurs, with compaction of the core

 be the prana **seed** that compacted, and they would become like a gamma wave

 of the prana **seed**, and then explosion, which would be ... from the outside

 of the prana **seed**, and it would build frequency and start radiating itself until

 the tauren light **seed**. We introduced these from Tenerife workshop so if anybody wants

 tauren living light **seed**. The only reason we are going back to tauren is

 little tauren light **seed** all the way out through to what becomes eventually the

---

Page: 38

 the first light **seed** of the tauren. Later these will become much bigger structures.

---

Page: 39

 where the prana **seed** comes into being, and why it is important, and what

 creation of the **seed** atom. It gets interesting, because it doesn't just happen once. It

 just little tiny **seeds** here. When you get them both activated, it really expedites

---

Page: 46

 Rheuzhetta and the **seed** atom. From the first triad that was on that line,

---

Page: 47

---

 you get into **seed** atoms and things - not seed atoms, light seeds. The

 things - not **seed** atoms, light seeds. The difference between the Metatronic ones -

 seed atoms, light **seeds**. The difference between the Metatronic ones - because the Metatronic

 is called the **seed** atom. Inside the seed atom you have the Rhuzetta, which

 atom. Inside the **seed** atom you have the Rhuzetta, which is this entire cluster.

 that is the **seed** atom. It has 30 cells of the seed atom. These

 cells of the **seed** atom. These are the first PartEKE cells. So, we went

---

 inside of the **seed** atom. This seed atom is called the Yunesai seed atom.

 seed atom. This **seed** atom is called the Yunesai seed atom. It is the

 called the Yunesai **seed** atom. It is the first of three seed atoms that

 first of three **seed** atoms that form in something called the Krist Star cycle.

 So, there's a **seed** cycle before when the Tauren is created. Then you have

 9? After the **seed** atom is created, what happens next? I always knew that

 creation of the **seed** atom. Then, the seed atom phases. It's 30 little balls,

 atom. Then, the **seed** atom phases. It's 30 little balls, just like the Tauren

 happens with the **seed** atom. It makes sparks. They didn't say how many, but

 center of the **seed** atom. And, I have a feeling it's at the 131

 had the Star **Seed** cycle, the Seda cycle, where the Tauren was created -

 -the light **seed** cycle. Then we had the Starborn cycle. Now we have

 in, once the **seed** atom and everything pop in, then they call it the

 you have your **seed** atom, it goes in to Source, it replicates its quantum,

---

 get the Prana **seed** first. Oh yeah, this is another layer before you get

 and the Prana **seed**. These are formed/created by the first ASKO conception pulse.

---

 next to the **seed** atom, on the next level? Well, you go through the

 that into the **seed** atom, and that of course goes all the way back

 from the Prana **seed** Eiron point, back in, and it creates something called Prana

 of the prana **seed** since 15400BC. And what has just happened on the Sun

 of their prana **seed**, which are the core gates on the Sol level, have

 when the prana **seed** completely closes, it closes the Eiron point, which separates the

 and the prana **seed**, from the seed atom behind it. And at that point,

 seed, from the **seed** atom behind it. And at that point, the flows of

 out of the **seed** atom, directly from Source, can no longer come. Those flows

 when the prana **seed** phase locks and closes, and that is what has happened

---

 and the prana **seed**. We are still dealing with the 15 rings and the

---

 of the prana **seed** ... it will activate within the part of your seed

 part of your **seed** atom, the next level out from your seed atom where  
 out from your **seed** atom where your prana seed is. So, it will begin  
 where your prana **seed** is. So, it will begin that process. That means the

---

Page: 55

---

 of the prana **seed**. As the rings and orbs span open in the Indigo  
 of your prana **seed**. And you will have it. And at that point. ..  
 and the prana **seed** formation, and next we'll go into the Rashes. We'll see  
 you had the **Starseed** cycle and the Starborn cycle. Now we're on number three

---

Page: 58

---

 PartEkE body prana **seed**. So the first time the prana seed at the core  
 time the prana **seed** at the core of the one before goes (makes

---

Page: 59

---

 by the prana **seed** at the core of the PartEkE body. It creates the  
 up to the **seed** atom. Then you have the PartEkE template, the PartEkE body,  
 with one prana **seed** that has its Eiron point at the core, and it

---

Page: 60

---

 **seed**, and its Eiron opening. That opening connects to the seed  
 connects to the **seed** atom of the partiki level of creation. Pulse one creates

---

Page: 63

---

 of the prana **seed** at the core of the PartEkE body. So, if you  
 have your prana **seed** open and it's able to phase, it means you can

---

Page: 64

---

 one was the **Starseed** cycle. The Tauren light seed is born at the end  
 The Tauren light **seed** is born at the end of it. That was partiki  
 Tauren living light **seed**. Way back, we started that in Tenerife. Number two is  
 cycle. The PartikE **seed** atom and Rhuzetta are born. And that was the Tauren  
 Rosetta and the **seed** atom. These represent the partiki anatomy of first creation. Page

---

Page: 65

---

 get the prana **seed**. So, the PartEkE body and the five elemental density planes  
 the core prana **seed** is formed, and the Eiron point hole that leads back  
 back to the **seed** atom, because what was the core Eta-Or is split

 of the first **seed** atom. Stage 4 of the Life born cycle was the

---

Page: 66

---

 of the first **seed** atom which is the Yunesai, and then all this other  
 a Tauren light **seed** for the next domain out, and that goes through a  
 that forms its **seed** atom for the next domain out. Here"s where we get  
 we get the **seed** atom layers. We have the Yunesai seed atom that is  
 have the Yunesai **seed** atom that is the seed atom to the inner. You  
 that is the **seed** atom to the inner. You have the UmShadE which is  
 which is the **seed** atom to the middle, and then you have the Y  
 which is the **seed** atom to the outer domains. So, this whole thing basically  
 is considered the **seed** cycle, which brings you up to the seed atom. Then  
 up to the **seed** atom. Then you have the inner, the middle and the  
 It says, "**Starseed** cycle, cycle 1." That"s the RashaA body of the core  
 the Yunesai inner **seed** atom. So, that gives you the seed atom for the  
 gives you the **seed** atom for the inner domains. There is another six cycle  
 creation cycle. The **Starseed** cycle corresponds to Eyugha 1. Somewhere, I don"t know if  
 to the Yunesai **seed** atom. From there, the seed atom cycles ... and this  
 From there, the **seed** atom cycles ... and this is where you get all

---

Page: 67

---

 will form the **seed** atom of the next layer. This domain here is called  
 cycle. You have **Starseed** cycle, Starborn cycle ... this is the cycle of the  
 of the middle **seed** atom, or actually the first two partiki that create the  
 the middle UmShadE **seed** atom for the middle domains, which are called the Edon  
 YonAsa, outer domain **seed** atom, and from there that goes through its six cracks,  
 starts this way: **Starseed**, Starborn, Starflame, Starburst... RashaA, Rashala, Rasha!E,  
Rashalae. Core, inner,

---

Page: 68

---

 back to the **seed**, and when it goes back into, the whole thing goes  
 time a new **seed** is set. So, a new set of Eyughas begins. And  
 We have the **Starseed** cycle, Starborn cycle, Starflame cycle, Starburst cycle. At the end  
 go back to **Starseed** cycle again. And it recycles. So, this is where we  
 or its prana **seed**, closes and compacts, and then we will simply, at the

---

Page: 69

---

 again. Again, the **Starseed** cycle, the Starborn cycle, the Starflame cycle, Starburst cycle, which

 with the prana **seed**. It has to do with the Alons, KAlous and ShAlons

 of the prana **seed** in our planetary or stellar level, have compacted. There will

 off the Prana **seed** and initiated bardoah fully on the planet. That's not happened

 the core Prana **seed** of the planet. There was something done in that week,

 of planetary Prana **seed** activation. While those gates were reversed, it phase-locked the

 locked the Prana **seed**. It actually phase-locked and opened, where it was like

 to bleed the **seed** atom, where it would like let energy hemorrhage out of

 out of the **seed** atom, but no backflow going back. They want us to

 separating from the **seed** atom, and the core gates have closed, and there is

 It was before **Seeding** One of the Angelic Humans on Earth. There was a

 Angelic Humans weren't **seeded** until 25 million years ago. That's an awful big span

 big span between **seedings**. This was why. Because the Angelic Humans from parallel Earth,

 Earth, the first **seeding**, were wiped out by the Thetans and the Borja who

 means the prana **seed** is one this axis, right? Then when you get back

 activating the prana **seed**. It has to do with Prana Exchange. The easiest way

---

Page: 138

---

 have your prana **seed**. The prana seed looks just like the Tauren. It has

 seed. The prana **seed** looks just like the Tauren. It has one ball on

 there's a prana **seed** at the center. There is a little thing called the

 them, from the **seed** atom all the way down to the tauren. This goes

 center a prana **seed** that looks in the same configuration as the Tauren did

 what the prana **seed** does ... it's called a prana seed because it's made

 called a prana **seed** because it's made of- one of the reasons its called

 called a prana **seed** is ... I don't have one here to show you

 When the prana **seed** phases, it makes its prana spark, it sparks open the

 back to the **seed** atom. When that occurs ... now something happens first before

---

Page: 140

---

 sparking the prana **seed** at the center, which opens the Eiron point, sends a  
 released, after the **seed** atom receives its prana spark, and releases its mana spark,  
 itself so the **seed** atom spits mana back out when it gets hit with  
 release from the **seed** atom of a mana spark. The mana spark comes back

---

Page: 141

---

 spark, into the **seed** atom, and at that point, with all of that ManU  
 happens between the **seed** atom and all the way back to the Tauren, at

---

Page: 142

---

 the Tauren light **seed**. That's the first part for the first creation cycle, if  
 have the first **seed** atom forming. That's way deep down in our creation. Yes,  
 activate the prana **seed** with the support of the AnshatAsa Host coming in. What  
 the core prana **seed**. The prana seed is in the same place as your  
 seed. The prana **seed** is in the same place as your seed atom, they're  
 place as your **seed** atom, they're linked through that little doorway called the Eiron  
 have a prana **seed** that goes with your inner domain body, or your middle  
 to your UmShadE **seed** atom, as we've talked about. This time we are working  
 is the prana **seed**. That would be at the AzurA point. It would be  
 the Tauren light **seed** would be. So, you have the Tauren light seed way  
 the Tauren light **seed** way back in the less densities, then you would have  
 bit bigger sized **seed** that's still in the three ball configuration, just like the  
 the Tauren light **seed**. But its top ball would have an axis coming in  
 With the prana **seed** being triggered - I don't know how they are going  
 what the prana **seed** is on a planetary level; in your own self it

 or the prana **seed**. That white spot there you see? (on the screen  
 phase the prana **seed**. So, that will be the first time that the Urta  
 of the prana **seed** come together and spark with the Shala. That will create  
 return to the **seed** atom will happen then. Then on the 13th exhale, that

---

 planet, the prana **seed**, and you will get prana going in and mana flow

---

 back to your **seed** atom. Every time you exhale, there will be a small  
 forward from the **seed** atom. There will come a time before too long on  
 through your own **seed** atom, being able to build charge in the seed atom.  
 charge in the **seed** atom. There will be journeys that are possible once the  
 when the prana **seed** cannot phase, they cannot restore those, so they become depleted.  
 outflow from the **seed** atom unless you give first the Prana Exchange. So, we

 and from the **seed** atom behind it, comes, it will bring a burst into  
 back to the **seed** atom. There will be a very specific tone there. You  
 it is the **seed** atom, behind it the Rosetta. The Rosetta is the manufacturer  
 or the prana **seed** is not phasing, the Antakarana can't regenerate itself, so it

 the Tauren light **seed**. We'll see that in a minute. That is a part  
 the Tauren light **seed** up into the formation of the first Seed Atom, and  
 of the first **Seed** Atom, and what is called the Rosetta. The first Seed  
 Rosetta. The first **Seed** Atom is called the Yunasai and that is the Seed  
 that is the **Seed** Atom of the inner domain. After this, for a long  
 We've got the **Seed** Atom. How does that connect to the Ecka Maps of

---

 the Tauren light **seed**. Right in between there and there, there is something called  
 the Tauren light **seed**, and that is its configuration. That's three Partiki, and at  
 the Tauren light **seed**, and the PartikE is what is called a photo generator

---

 in the light **seed**. What's interesting is each level of the domains has one.  
 the Tauren light **seed** with the PartikE in the center with the 15 geleziac  
 the Tauren light **seed** and its PartikE in the center, the PartikE has the  
 the Tauren light **seed**, looking at its PartikE, a closer look at the nine

---

 little tiny light **seed**. You can also look at this and know you are  
 the Tauren light **seed** and the PartikE that would have its 15 layers in  
 grow from that **seed**, by the process of the seed contracting and expanding, and  
 process of the **seed** contracting and expanding, and when it contracts, it takes those  
 the Tauren light **seed**, we've got the sparks building quantum, forming what are called  
 the entire light **seed**. So the Tauren, that had three Partiki, and one PartikE,

---

 called the Yunasai **Seed** Atom, the first Seed Atom, and it is the first  
 Atom, the first **Seed** Atom, and it is the first Seed Atom for the  
 is the first **Seed** Atom for the inner domains. That's where we make the  
 called the Prana **Seed** closed. That means the outer domain is closed to its

 is called the **Seed** Atom, and after that is where we get into the

- 📌 the Yunasai, the **Seed** Atom, right? So, it opens an exchange between the dark

 they were the **Seeding** 3 Passages. These were the bigger ones from Seeding 2.  
 bigger ones from **Seeding** 2. This is the Gyrodome, but it is also what

---

Page: 124

---

 of the Light **Seed**, there are these other things birthing. I don't know exactly

---

Page: 126

---

 time that a **Seed** Atom is born in one of those Domains ... right  
 starts, births the **Seed** Atom through the Outer Light Body process, Seed Atom goes  
 Light Body process, **Seed** Atom goes through its Eyugha Cycle, which is the Outer  
 will be the **Seed** for the next Domain out. It is a Memory Krystal

Page: 134

 have the Prana **Seed** and the Seed Atom and they all end up going

 Seed and the **Seed** Atom and they all end up going you know, sending

---

Page: 138

---

 the Light Body **seed** and the RaSha seed birthing out simultaneously. So there's some  
 and the RaSha **seed** birthing out simultaneously. So there's some huge diagram that would

---

Page: 139

---

 Krystal is the **Seed** for the next Domain out. So we have other Cousha's  
 that was the **Seed** Krystal for the Outer Domain. The Seed Krystal. .. and  
 Outer Domain. The **Seed** Krystal. .. and I'm doing as best as I can  
 one is the **Seed** for the Outer Domain, which corresponds to the 10, 11  
 or the . **Seed** Krystal for the Adashi 1 Cycle, all right. So this

---

Page: 140

---

 behind their Cousha **Seed**, so there is this layer that needs to activate and  
 which is the **Seed** for the Outer Domains. Then we have our d-2,

---

Page: 141

---

 the thing they **seeded**, all right. So these are bands that are in our

---

Page: 142

---

 This shows where **Seed** Atoms pop up in this process, where the Yunasai is,  
 Krystals and the **Seed** Atoms run in a similar place, they link chakras. These

 be the Edon **Seed**, this is our Radon Seed ok. Now the space between  
 is our Radon **Seed** ok. Now the space between the Cousha from the Edon,  
 that is our **Seed** here. Here we have our d-1 Etheric that corresponds  
 Adashi 1 Krystal **Seed** Krystal, at that point. .. and when you can start

 Aquaferion Races were **seeded**. They are the Ascension Passages out to Urtha and they

 ... the Partikl **Seed** Atom and the Rosetta were born. This is where we

 that Rosetta and **Seed** Atom that were created through these, going into their phase

 Tauren births the **Seed** Atom, the Yunasai Seed Atom and the Rosetta, and then  
 Atom, the Yunasai **Seed** Atom and the Rosetta, and then from the Seed Atom  
 then from the **Seed** Atom and the Rosetta phasing we end up with the

 the Tauren Light **Seed**. Well, when the Yunasai gets done with its phasing thing,

 have the Yunasai **Seed** Atom that is the Seed Atom for the next cycle  
 that is the **Seed** Atom for the next cycle which is the Inner cycle.  
 UmShaddEi Middle Domain **Seedatom**. And then you have the cycles that go with here.  
 Yon-A-Sa **Seed** Atom that would give birth to the Ka-LA Eyugha

 called the Prana **Seeds**, that go back all the way to the first Creation

 progressively open the **Seed** Atoms and the Prana Seeds between, or what is called-  
 and the Prana **Seeds** between, or what is called- in the centre of the  
 of the Prana **Seed** there is a point called the Eiron Point and that  
 which is the **seed** for the Light Body and Source, and this is- they"d  
 be considered the **seed** for the Spirit Body. So there is a whole other

---

Page: 205

---

 that creates the **Seed** Krystal, or the 1st Partikl set that are the Krystar  
 in which the **seed**, the Ecousha Seed which is like the Triad of Partikl  
 seed, the Ecousha **Seed** which is like the Triad of Partikl 1 and Partikl  
 where our Krist **Seed** is formed. So we are in a very important point  
 of the Kryst **Seed** we begin the process of what are called the Three

Page: 206

 you the Prana **seed**. When we refer to core gates, like the Core Gates  
 as the Prana **Seed**. This is because they generate Prana Sparks. There"s a natural

---

Page: 208

---

 there"s a Prana **Seed** at the center. When you take this structure into the  
 have a Prana **Seed**, and the Prana Seed connects back into the Seedatom for

 and the Prana **Seed** connects back into the Seedatom for that domain, and the  
 back into the **Seedatom** for that domain, and the Seedatom connects back into the  
 domain, and the **Seedatom** connects back into the Tauren for that domain, and the

---

Page: 209

 brought here to **seed** the Aquafereion lineage of Aquari human on Earth. So, they

---

Page: 213

---

 go out in **Seeding-2**. We used to be able to do that a

---

Page: 214

---

 of both the **Seeding-2** Astura Passages. This is how they are formed. You  
 by itself the **Seeding-2** -the Asturias were from Seeding-3 -from  
 Asturias were from **Seeding-3** -from Seeding-2 were the larger NaVA-Ho  
 3 -from **Seeding-2** were the larger NaVA-Ho Passages, the Krystal Heart

 because its Prana **seed** is compacted. So, this is opening a whole new set

---

Page: 225

 the Tauren light **seed** born and that has the, the PartikE, in the middle  
 to where the **seed** atom, the first seed atom of the Yunasai is born,  
 atom, the first **seed** atom of the Yunasai is born, with the Rosetta cluster  
 and the Prana **seed** and the RaSha AmourA RaSha body and that"s the 4-

---

Page: 227

---

 or to the **seed** atom behind it, you will then be able to pull

---

Page: 228

 of the light **seed**. So, we have the spirit seed that birthed first that  
 have the spirit **seed** that birthed first that they didn"t even talk about "  
 the Tauren light **seed**. That"s the beginning of the light body structure, all right.

 the Tauren light **seed** back in Tenerife. We had the 15 geleziac layers and

Page: 231

 relation to Prana **seeds**, this is where this type of energy first starts to

Page: 232

 becomes the Yunasai **seed** atom. So I'll show you that in a minute. So

---

Page: 234

---

 where the spirit **seed** forms before this births out but it's on the other

---

Page: 235

 or the first **seed** atom births out. The Yunasai is the seed atom for

 Yunasai is the **seed** atom for the inner domains, all right. This is just

 was the first **seed** of the core, out to the first seed atom of

 to the first **seed** atom of the inner domains, all right. There's also a

 be considered the **seed** cycle and through that seed cycle the Tauren was born

 and through that **seed** cycle the Tauren was born on this axis. So, axis

 the Yunasai inner **seed** atom. Within the Yunasai, there are the flames. Now these

 of the Yunasai **seed** atom and the Rosetta. The Rosetta is the current generator

 of which the **seed** atom is a little tiny thing, all right. So, these

 create in the **seed** atom a Mana out flow return or a back flow

 AdorA and EtorA **seeds** are formed, and then there's expanding and contracting and then

 the Spirit body **seed**. They haven't shown me exactly what this looks like, but

 the Tauren Light **Seed**, and it's actually quite small. Well, it depends on if

 Tauren Living Light **Seed** with its three Ena, which are Partikl. Those Partikl are

 the Tauren Light **Seed**. But the most important part when we're going to learn

 of the Yunasai **Seed** Atom and that's the Inner Domain Seed Atom. The Inner

 the Inner Domain **Seed** Atom. The Inner Domain Seed Atom then goes through something

 The Inner Domain **Seed** Atom then goes through something that actually gives birth to

 end, after a **Seed** Atom was formed through the Starborn Cycle, then the Rasha

 that is the **Seed** Atom for the Inner Domain. So this was associated with

 the Living Light **Seed**, the Tauren Light Seed and this is where the Spiritual

 the Tauren Light **Seed** and this is where the Spiritual Body is born. And

Page: 336

 the First Inner **Seed** Atom. Now, there is a Core Seed Atom that we

 is a Core **Seed** Atom that we didn't know about before and I had

 the Inner Domain **Seed** Atom. Where's the Core Domain Seed Atom? Is it the

 the Core Domain **Seed** Atom? Is it the Tauren? Is it the PartikE inside

 the Yunasai Inner **Seed** Atom and this would be the Reuzhetta that goes with  
 in the Yunasai **Seed** Atom. Just to give you an idea and remember that

Page: 339

 birth of the **Seed** Atom with the Rosetta-the Yunasai Seed Atom with the  
 Rosetta-the Yunasai **Seed** Atom with the Rosetta. So that would be the second  
 got the Yunasai **Seed** Atom. What happens next? What happens next is the Yunasai  
 the Inner Domain **Seed** Atom and now the Inner Domain Rasha Body will emerge  
 of the Yunasai **Seed** Atom. And I have a feeling that phasing has to  
 Body and the **Seed** Atom that occurs, that allows for this next phase to  
 well, the Yunasai **Seed** Atom is phasing. The Yunasai has 30 cells and it's

---

Page: 340

 birthed from the **Seed** Atom, the Yunasai doing its pulse cycle, generate enough quantum,

---

Page: 342

---

 we have Prana **Seed** yet? Yes. At the center here when this Rasha Body  
 called the Prana **Seed**, and that is simply a little set of three things.  
 Body yet. Prana **Seed** becomes important because it is ... when the Lons phase,  
 between the Prana **Seed**-the little thing at the Core-where the center in  
 in the Prana **Seed** called the Eiron Point opens, allows the Backflow to go  
 of the Prana **Seed**, like behind the Prana Seed. And that will allow the  
 behind the Prana **Seed**. And that will allow the Orons to phase and they

---

Page: 343

---

 you the Prana **Seed** a little bit more closely. It is a Phase Set,  
 So the Prana **Seed** works in the same way. It is the Prana Seed  
 is the Prana **Seed** that is crucial to the concept of Bardoah or the  
 through the Prana **Seed** out into the Light Body structure, and stretches itself out  
 When the Prana **Seed** closes, the Spirit is actually still. .. if it's still  
 body. The Prana **Seed** is at the center of the Rasha Body, and if  
 if the Prana **Seed** closes and the Eiron point can "t open and  
 of the Prana **Seed** opening, because actually this begins to de-polarize and the

---

Page: 344

---

 back to the **Seed** Atom, the Seed Atom will send that back to the  
 Seed Atom, the **Seed** Atom will send that back to the Spirit Body and  
 by the Prana **Seed**. At a certain point with phasing of the Rash a  
 Body, the Prana **Seed**, the whole thing contracts and makes a big Prana spark  
 damage to its **Seed** Atom. So, anyway, this is the process we're involved in,

---

Page: 345

---

 through the Prana **Seed**. It would hold the Eiron Point open and just hold  
 through the Prana **Seed** into the Domains before, into the Spirit Body, and then

---

Page: 353

 smaller is the **Seed** Atom, the Yunasai Seed Atom. We're still in the Inner  
 Atom, the Yunasai **Seed** Atom. We're still in the Inner Domain. We haven't even  
 points the Prana **Seed** phases and pulls it in and gets a replicate of

Page: 360

 the Tauren Light **Seed** was birthed here- this is without even getting into the  
 Tauren to its **Seed** Atom and goes through into its Eyugha Cycle. The Eyugha

 would have the **seed** crystal for that domain, so what creates the domains that

 Domain is the **seed**, or holds the seed atom for that Domain. So, if

 or holds the **seed** atom for that Domain. So, if you're in the Outer

 would hold the **seed** atom for the Outer Domain. Now, at the same time,

 would hold the **Seed** Atom for the Domain that grows from it, ok. This

 would be the **seed** for the next one. So around our ... once we

 TA is the **seed** for the next domain. The MCEO Freedom Teachings® Series

 that are the **Seed** Crystals for our domain and then the E-LUma-Eterna

 would be the **seed** for the Outer Domain all right. "Cause you got

 ... that's the **seed** for the Outer Domain. It's also the E-LUma-Eterna

 the Adashi 1 **Seed** Crystal would be, which means it will actually manifest around

 . where our **seed** would be with our Seed Atom. That's where our Cousha

 be with our **Seed** Atom. That's where our Cousha Seed would be, and that

 where our Cousha **Seed** would be, and that would be between chakras 4 and

 Domain from its **Seed** Crystal, or Its Ecousha-TA. And which means it disconnects

---

Page: 402

---

 that is the **seed** for the Middle Domain. And there'd be another one that's

 ... there's a **seed** for the Inner Domain ... and the Core one. So,

---

Page: 403

---

 That is the **seed** crystal that corresponds to the Adashi 1, all right. So,

 that is our **seed** for our Outer Domain .. . that one is located

 before, that's the **seed** for the Edons, that's the one that connects to the

 the Um-Shaddhi **Seed** Atom of the Edons, and that one is located down

 this is the **seed** for Adashi 1, that would be our E-LUma-Eterna

 cause where the **seed**, where the Ecousha Band is, it implies it's the seed

 implies it's the **seed** for what's out from it. And it implies ... it's

---

Page: 404

 they would have **seeds** too, they would have a Krist seed. Because our planet

 have a Krist **seed**. Because our planet and now the solar, Sol, as well,

 one of these **seeds** and because the larger ones, the planet and the solar

 would have the **seed**, but then we would have the, this KaLA-Hara body

 have the Prana **Seed** close. If you couldn't generate enough frequency to

 hold the Prana **Seed** open, it would end up with initiating bardoah on the

Page: 424

Page: 425

 of the Prana **Seeds** closing to start Bardoah. So, we would like to welcome

Page: 428

 keeping Earth's Prana **Seed** open. The Sun went into bardoah, which means its Prana

 means its Prana **Seed** closed. Right now Earth's Prana Seed would have closed in

 And after a **seed** atom is created, is when the Rasha Cycle takes place.

 right. The 1st **Seed** atom that was created was this one up here that  
 that the 1st **Seed** atom was called the Yunasai well that is the 1st  
 is the 1st **Seed** Atom of Light. This is the 1st Seed Atom of  
 is the 1st **Seed** Atom of Spirit Body. (0:50:51) And, when  
 birth to the **seed** atom for the next domain on the Inner level, which

 and yan-yUn **Seeds** This is what you end up with by the end

Page: 114

 part, 1st Light **Seed**. Then we have the Light Seed and the Eukatharaista Body.  
 have the Light **Seed** and the Eukatharaista Body. You have the Starborn Inner Light

Page: 119

 Tauren Living Light **Seed**. First, that whole structure of the REisha-TA, the Reusha-

 the First Light **Seed**. And, that is what starts the Starbom Cycle. And we

 The Tauren Light **Seed**-Eternal Life Ec-Ka-Sha God Seed Anyway, back to  
 Ka-Sha God **Seed** Anyway, back to the lauren. The lauren is the little  
 the little Light **Seed** that, when the Elum-Eiradhona; the big thing births, the  
 lauren, little light **seed** in the center, births. And God said: "Let there  
 The first Light **Seed** is the lauren. We"ve covered this material pretty extensively, so

 the first core **seed** atom, after a seed atom forms, the next stage is  
 atom, after a **seed** atom forms, the next stage is the formation of the

 call the Spirit **Seed** Atom, which is the Elum-Eiradhona huge Body is formed

 to the Light **Seed**. And then the Light Seed begins its phasing cycle as  
 then the Light **Seed** begins its phasing cycle as the Rasha Body is being  
 of the next **seed** atom, which is the Yunasai, which is the seed atom  
 which is the **seed** atom that goes with the Inner Domain. So, that is  
 birth of the **seed** atom, which was the Spirit Body in the Core Cycle.  
 You have the **seed** atom being born, and then you have the Rasha being

---

Page: 135

---

 called the Prana **Seed** ... births; Prana is a very specific type of

---

Page: 136

---

 So, the Prana **Seed** forms at the center of the Rasha Body, the first

---

Page: 138

---

 is the Prana **Seed** ... this is just a close up of it. ..

---

Page: 139

---

 Planes & Prana **Seed** Part of this Rasha Body not only has its Alons, KAions,  
 and its Prana **Seed** at the center, it has Density Levels. And this becomes  
 have the Prana **Seed**. That Prana Seed would represent the Core Gate, the Core  
 Seed. That Prana **Seed** would represent the Core Gate, the Core Gate that leads  
 because the Prana **Seed** at the center of our Sun ... our Sun is  
 Sun, the Prana **Seed** has closed and compacted, which sets in motion what is  
 If a Prana **Seed** closes, what it means is the connection to the Spirit  
 when the Prana **Seed** closes; it will shut down the connection from the Prana  
 from the Prana **Seed** to what comes next, which is the Outer Light Body

---

Page: 140

 separate the Prana **Seed** from that. It allows the Prana Seed itself to ...

 allows the Prana **Seed** itself to ... and the Rasha a part ... to  
 and the Prana **Seed** closes, it means that a system, a Light Body System,  
 release. The Prana **Seed** has closed, and that means the link between the Prana  
 between the Prana **Seed** and the Light Body Matter Body Structure of the Sun

 system. And in **Seeding** 2 of the Angelic Humans, they began a hybrid race

 allow the Prana **Seed** to phase. It would allow the frequency to go back

 here. They were **seeded** on top of the natural crystals of Earth. And they  
 And they were **seeded** in from a planet called Nibiru that had been pulled

---

Page: 154

---

 where the Prana **Seed** would be. And that is where the opening, the natural  
 of the Prana **Seed** to the Rasha Dark Matter Template that goes through the  
 fast your Prana **Seed** is cycling. The whole Ascension process, you could perceive most

---

Page: 159

---

 where they had **seeded** the Nibiruan Crystal Grids on top of these. There would  
 talk about the **Seeds** of Suffering and that story. But for now, the good,  
 where they were **seeded**. It was like a step-down from where they were

---

Page: 166

 24 Eckasha God **Seeds**, where you have 4 of the Eckasha-A, and each  
 the 24 God **Seeds**, and that brought that into coherence where, now we can

---

Page: 170

---

 is the Light **Seed**. And it is from the Light Seed that we start  
 from the Light **Seed** that we start to begin to get the structure that  
 was the Light **Seed** that forms at the center of it. From there you  
 within the Light **Seed** that it hits what is called the Takeyon Flash Point,

Page: 174

 about the Prana **Seed**, it is talking about a specific type of energy that

 the end of **Seeding**-1. It could have happened at the end of Seeding-  
 the end of **Seeding**-2. That's why every one of the Seedings of Angelic  
 one of the **Seedings** of Angelic Humans and Cloisters had, toward the end of  
 Aquaferion Line of **Seeding**-3. So what "Aquaferion Lines" means is, you were  
 Race Human of **Seeding**-3, and there was a point in time where there  
 which is a **Seed** that takes us through, up to Urtha, 1st where we

 33,000BC. This is **Seeding-3** history. There's another one that goes in here that  
 that show where **Seeding-1** was and where that ended with the Electric Wars,  
 5.5MYA, then when **Seeding-2** was and that ended with the Thousand Years War.  
 War. And then **Seeding-3** where it started and ... here we go 250MYA  
 Parallel Earth Human **Seeding-1** with the 5 Palaidorian Cloisters, right? Then we had  
 Palaidorian Cloisters were **seeded** on Earth. Then 5.5 MYA Human Seeding-1 was destroyed  
 5.5 MYA Human **Seeding-1** was destroyed by Electric Wars. 3,700,000 Human Seeding-2

destroyed  
 848,800 YA Human **Seeding-2** was destroyed by the Thousand Years War. So this  
 where Angelic Human **Seeding-3**, our contemporary lineage begins. We had 798,000BC-the

 the Tauren light **seed**. I'll start here and I'll end up here really, really

 that's the light **seed** we just talked about When it expands and it does

 it's called the **seed** cycle, or the SEda cycle. And that's where the triad

 is the first **seed** atom It is the seed atom that is created from

 It is the **seed** atom that is created from the light seed, through the

 from the light **seed**, through the Starborn cycle, creating the seed atom, and the

 cycle, creating the **seed** atom, and the seed atom creates what is ... each

 atom, and the **seed** atom creates what is ... each one of these layers,

 of the inner **seed** atom Yunasai. What next? [next graph] Before we go

 birth of the **seed** atom with the Rosetta. So, that's the Yunasai. If you're

 with the Yunasai **seed** atom is born there, and then the Reuzhetta on that

 you have a **seed** atom It's not always the Yunasai you're talking about. That's

 That's the inner **seed** atom You also have an UmShaddEi seed atom that is

 have an UmShaddEi **seed** atom that is the middle seed atom, and the YanAsa

 is the middle **seed** atom, and the YanAsa seed atom that is the outer

 and the YanAsa **seed** atom that is the outer seed atom So this process

 is the outer **seed** atom So this process that you're gonna see happens at

 those, at their **seed** atom level. Once the seed atom is formed from its

 level. Once the **seed** atom is formed from its Tauren, then you go through

 cycle, where the **seed** of light is born, which is the birth of the

 up to the **seed** atom, which is considered the star Then you have the

 is the Yunasai **seed** atom, with this other stuff going down to its Tauren,

 you have a **seed** atom. So that's one through six layers. [next graph]

---

Page: 315

 birth of the **seed** atom, the Lifeborn cycle which encompasses six cracks, six pops,

---

Page: 316

 is called the **seed** cycle ... actually the first part of the SEda cycle,

 cycle, that's the **seed** cycle, yeah. Now, this is referred to as the seed

 to as the **seed** domain. That's before the core domain. That's where you have

 cycle, or a **seed** cycle. This is the structure of all the cycles. These

 the inner Yunasai **seed** atom, deep in the center there ... at the center

 next level; the **seed** atom that would be born at the end of that

-  the middle UmShaddEi **seed** atom, and after you get through its six cracks, six
-  the outer YanA"sa **seed** atom, which would be in the center here, and then
-  pull into the **seed** domains. This is the beginning of a Starfire cycle. The
-  You had a **seed** domain there. Then you had the core domains here, and

---

Page: 324

---

-  the Tauren light **seed** all the way up through the creation of the Starborn
-  is the inner **seed** atom, and the Reuzhetta, which is the cluster of all
-  Reuzhetta and the **seed** atom. And this process occurs from the first Partiki unit,
-  creation of the **seed** atom, through the creation of the bodies that emerge through
-  Yunasai, or the **seed** atom level in any of the domain cycles, then you
-  Up to the **seed** atom, we had the Partiki bodies. From that point, we

---

Page: 325

---

-  we have a **seed** atom, we go through The MCEO Freedom Teachings® Series

---

Page: 326

---

-  Starburst We have **Starseed**, Starflame Where do all these fit? And what do they

---

Page: 327

---

-  the Tauren light **seed** cycle. That was actually the cycle where the first Partiki
-  we have the **seed** domains, the core domains, the inner domains, the middle and
-  outer domains. The **seed** and the core domains are actually the same domain, so
-  out the next **seed** atom up. So, this is we described, when we described

---

Page: 328

---

-  because actually the **seed** goes from zero to one, that forms the triad, and
-  goes back to **seed** and starts over, and another comes all the way back
-  go back to **seed** and expand out again and continually perpetually cycle, and this
-  to as the **Starseed** body. The cycle that is part of it is called
-  or the one-**seed** cycle. The MCEO Freedom Teachings® Series Presented by Adashi

 where we were **seeded** here. Now there is a lot of history that happened  
 where Angelic Human **Seeding** 1 was seeded on Parallel Earth and then 25 million  
 Seeding 1 was **seeded** on Parallel Earth and then 25 million years ago were  
 years ago were **seeded** on Earth. Why so many millions years difference between the  
 difference between the **seeding** of Angelic Humans on Parallel Earth compared to here. And  
 of the Prana **Seed** on the Planet then- and this is before the Angelic  
 Humans were even **seeded** here, before they got a chance to seed them over  
 a chance to **seed** them over here. They wiped out the Seeding 1, and  
 wiped out the **Seeding** 1, and 2 I think, over on Parallel -of  
 they hadn't even **seeded** them here yet, you know the Amenti Angelic Human Races.

---

Page: 438

---

 after we were **seeded** there 250 million years ago, the Angelic Human Races -

---

Page: 439

---

 Aquafereion Races of **Seeding** 1 were given permission by the Krystal River Councils to  
 So Angelic Humans **Seeding** first 1 could take place here as we know from

---

Page: 441

---

 from their Atlantian **seedings** so there are Uby Races being fully incarnate. They are  
 generations that were **seeded** in Atlantis of the Uby-Races that certain ones are

Page: 444

---

 through the Prana **Seed** and into the Seed atom that connects you to your  
 and into the **Seed** atom that connects you to your first Tauren Light seed  
 first Tauren Light **seed** and all of that So it is really complicated information  
 of the Prana **Seed** in the physical bodies. That has already occurred in the

---

Page: 445

 is when they **seeded** the Turaneusiam-2 Race which are the Angelic Humans on  
 after we were **seeded** over in Parallel, after the Humans were seeded over in  
 the Humans were **seeded** over in Parallel, they were attacked and the Planet taken

 the T-2 **Seed** Races except for the ones they pulled to mix with

 of the Prana **Seed** and separation of the Seed atom from the Prana Seed  
 separation of the **Seed** atom from the Prana Seed of the outer structures, then  
 from the Prana **Seed** of the outer structures, then there is a phase of  
 the compacting Prana **Seed**. And that is when it starts to give off gamma  
 in the Prana **Seed** that leads right into the Seed atom and then back  
 right into the **Seed** atom and then back further all the way back to  
 block the Prana **Seed**, it blocks the Eiron Point-that doorway-so any energy  
 when the Prana **Seed** closes or when the Core Gates close. On Earth, the  
 by the Aquafereion **Seeding**-1 Races and the Aquari Races of Urtha and that

 allowed for the **seeding**, after the repairing was done because there was a lot,  
 order to even **seed** life here again. And they hadn't been seeded here anyway  
 they hadn't been **seeded** here anyway since Tara, but 25 million years ago is  
 when our First **Seeding** of the Angelic Human Seeding-1. Remember we're Seeding-3

-  how the first **Seed** atom-the Yunasai-is formed This Yunasai is the Seed
-  Yunasai is the **Seed** atom for the Inner Domains right. This is way before
-  Flame Cycle and **Seed** atom is the next expansion. But we never had, until
-  learned from the **Seed** atom, what happens next? Alright we've got a Seed atom,
-  we've got a **Seed** atom, great. How do we get from the Yunasai Seed
-  from the Yunasai **Seed** atom all the way up to the Light Body structure

---

Page: 461

-  From the **Seed** atom, what you end up with when you see all
-  with is the **Seed** atom and what is called the Rosetta, right The Rosetta
-  into the 1st **Seed** atom Now there is something that happens after this and
-  we've got the **Seed** atom The Seed atom is again at the same top,
-  Seed atom The **Seed** atom is again at the same top, where its top
-  of the Light **Seed** of the Tauren in the Planet that has caused so
-  the Tauren Light **Seed** is born; then the cycling of the Tauren to create

 up to the **Seed** atom, then you have the LifeBorn Cycles that take you  
 not including the **Seed** Cycle. So this is big. Creation is not like just,  
 your little Light **Seed** that is in here, and with its Fire Chambers that  
 where the Prana **Seed** is born at the center alright So you've got the  
 you've got the **Seed** atom back here and then up here as things are  
 got the Prana **Seed** being formed and the Prana Seed is configured like a  
 and the Prana **Seed** is configured like a Tri-Veca, like a phase set  
 back into the **Seed** atom So there is an open exchange of energy between  
 As the Prana **Seed** phases it opens what is called the Eiron Point The  
 Tauren and the **Seed** atom It is the connection from the Par-TE"KEi  
 Templates into the **Seed** atom where that would take you back to the connections  
 formation of the **Seed** atom This is where the RaSha Bodies begin at the  
 birth of the **Seed** atom and the Rosetta. This is the LifeBorn Cycle that

 back into the **Seed** atom and would replicate. These, I call them A.S.

about the Prana **seed** because I don't even have any diagrams with it on

-  that"s the Star **Seed** Cycle that has its own little StarBorn Cycle within it,

 Krystal is the **Seed** for the next Domain out So we have other Cousha's

 that was the **Seed** Krystal for the Outer Domain. The Seed Krystal ... and

 one is the **Seed** for the Outer Domain, which corresponds to the 10, 11

 behind their Cousha **Seed**, so there is this layer that needs to activate and

 which is the **Seed** for the Outer Domains. Then we have our d-2,

 the Tauren Light **Seed** from which the StarBorn Cycle emerges. Just wanted to start

 the Tauren Light **Seed**. It is that particular 15 geleziac layer structure that ends

 Atom, the Inner **Seed** Atom. It is at that point, right after the Yunasai

 the Spiritual Body **Seed** is planted that is called the Ecousha, so we'll talk

 of the First **Seed** Atom called the Yunasai Seed Atom, it's the Inner Domain

 called the Yunasai **Seed** Atom, it's the Inner Domain Seed Atom. From that point-

 the Inner Domain **Seed** Atom. From that point- tomorrow we'll cover more heavily what

 created the First **Seed** Atom .. The MCEO Freedom Teachings® Series Presented by

 ... the Partikl **Seed** Atom and the Rosetta were born. This is where we  
 that Rosetta and **Seed** Atom that were created through these, going into their phase  
 Planes, the Prana **Seed** and the AmourA RaSha Bodies. So this is where the  
 Tauren births the **Seed** Atom, the Yunasai Seed Atom and the Rosetta, and then  
 Atom, the Yunasai **Seed** Atom and the Rosetta, and then from the Seed Atom  
 then from the **Seed** Atom and the Rosetta phasing we end up with the

---

Page: 206

---

 the Tauren Light **Seed**. Well, when the Yunasai gets done with its phasing thing,

---

Page: 208

---

 have the Yunasai **Seed** Atom that is the Seed Atom for the next cycle  
 that is the **Seed** Atom for the next cycle which is the Inner cycle.  
 UmShaddEi Middle Domain **Seedatom**. And then you have the cycles that go with here.  
 Yon-A-Sa **Seed** Atom that would give birth to the Ka-LA Eyugha  
 doors in the **Seed** Atoms that go back to the doors in the RaSh  
 called the Prana **Seeds**, that go back all the way to the first Creation

 progressively open the **Seed** Atoms and the Prana Seeds between, or what is called-  
 and the Prana **Seeds** between, or what is called- in the centre of the  
 of the Prana **Seed** there is a point called the Eiron Point and that  
 which is the **seed** for the Light Body and Source, and this is- they"d  
 be considered the **seed** for the Spirit Body. So there is a whole other

---

Page: 211

 that creates the **Seed** Krystal, or the 1st Partikl set that are the Krystar  
 in which the **seed**, the Ecousha Seed which is like the Triad of Partikl  
 seed, the Ecousha **Seed** which is like the Triad of Partikl 1 and Partikl  
 where our Krist **Seed** is formed So we are in a very important point  
 of the Kryst **Seed** we begin the process of what are called the Three

 you the Prana **seed**. When we refer to core gates, like the Core Gates  
 as the Prana **Seed**. This is because they generate Prana Sparks. There"s a natural

---

Page: 214

 there"s a Prana **Seed** at the center When you take this structure into the

 because its Prana **seed** is compacted. So, this is opening a whole new set

Page: 231

 the Tauren light **seed** born and that has the, the PartikE, in the middle  
 to where the **seed** atom, the first seed atom of the Yunasai is born,  
 atom, the first **seed** atom of the Yunasai is born, with the Rosetta cluster

---

Page: 232

 and the Prana **seed** and the RaSha Amour A RaSha body and that's the

---

Page: 233

---

 or to the **seed** atom behind it, you will then be able to pull

---

Page: 235

---

 of the light **seed**. So, we have the spirit seed that birthed first that  
 have the spirit **seed** that birthed first that they didn't even talk about "  
 the Tauren light **seed**. That's the beginning of the light body structure, all right.

---

Page: 236

---

 the Tauren light **seed** back in Tenerife We had the 15 geleziac layers and

---

Page: 238

---

 relation to Prana **seeds**, this is where this type of energy first starts to

---

Page: 239

---

 becomes the Yunasai **seed** atom So I'll show you that in a minute. So

---

Page: 241

---

 where the spirit **seed** forms before this births out but it's on the other

---

Page: 242

---

 or the first **seed** atom births out The Yunasai is the seed atom for

 Yunasai is the **seed** atom for the inner domains, all right This is just

 was the first **seed** of the core, out to the first seed atom of

 to the first **seed** atom of the inner domains, all right There's also a

 be considered the **seed** cycle and through that seed cycle the Tauren was born

 and through that **seed** cycle the Tauren was born on this axis. So, axis

---

Page: 244

 the Yunasai inner **seed** atom Within the Yunasai, there are the flames Now these

 of the Yunasai **seed** atom and the Rosetta. The Rosetta is the current generator

---

Page: 246

---

 of which the **seed** atom is a little tiny thing, all right. So, these

---

Page: 248

---

 back to the **seed** atom and back to the Tauren and back to Source.

---

Page: 249

---

 back to the **seed** atom behind it, and to the Tauren behind that, and

---

Page: 250

---

 called the Prana **seed**. It has what is called the Eira unit and it

 of the Prana **seed** and the Eira is the top one that holds the

 opens the Prana **seed** and the RaSh a structure and whatever's built outside of

 in to the **seed** atom structure and back in to the Tauren and all

 things. The Prana **seed**, and this has to do with Prana exchange, at certain

 point into the **seed** atom, it will create in the seed atom a Mana

 create in the **seed** atom a Mana out flow return or a back flow

 at the Prana **seed**, and that will cause the seed atom to go back

 will cause the **seed** atom to go back even further and spark back even

 at the Prana **seed** center, opens and closes by the generation of quantum outside  
 up through the **seed** atom to actually begin releasing back outward. So, there's some  
 actually birth the **seed** within our bodies, in our RashaLAe body and our light  
 of our Kryst **seed**, that is the seed atom from which, it would be  
 that is the **seed** atom from which, it would be like the Partiki one  
 will emerge the **seed** atom of the Krist body or the Kryst body that  
 into building the **seed** atom. And the first seed atom is the inner seed

 the planetary Prana **seed**. When we talk about the core gates of the Sun  
 about the Prana **seed** and we have said that the core gates of our  
 which the Prana **seed** compacts and closes and the Eiron point can't open anymore,

 to the Prana **seed**, right? In terms of the numbers, the core gates are

 sparks the Prana **seed** at the center and the Eiron point opens, and it  
 in the Prana **seed** and it opens the Eiron point and that Prana spark  
 in to the **seed** atom and at that point the seed atom sends back  
 that point the **seed** atom sends back a Mana back flow return spark, and  
 through the Prana **seed** and goes out into the seed atom, and the seed  
 out into the **seed** atom, and the seed atom sends it down to the  
 atom, and the **seed** atom sends it down to the Tauren, the Tauren sends  
 of the Prana **seed** all the way through back to Source, comes back out

---

 state, where the **seed** atom is and those kind of things. So, this is,

 level where the **seed** atom is, right, and then pop back out. Where the  
 out. Where the **seed** atom pulls back into the Tauren, and the Tauren pulls  
 beyond the Prana **seed**, ya know, so they're little tiny compared to this that

---

Page: 257

---

 is how the **seed** atoms work, and our little UmShaddEi down there in our

---

Page: 269

---

 out before its **seed** atom forms for the next level out, that first Partikl1  
 become the next **Seed** Atom out and those kind of things. So it's really  
 of the Krystar **Seed**, which will carry the imprint of all that went before

---

Page: 270

 the, the Prana **Seeds** and the Eiron Points between all of those uh, you  
 of the Prana **Seeds** of each of the RaSha Bodies, cause each one of

 the Tauren Light **Seed** is fully born, that they ... leave it there. All

 closes, the Prana **Seed** closes, all of those kind of things. There's one point

---

Page: 274

 back into the **Seed** Atom and our Light Body steps back and shifts Mentor

 through of the **seed** of the Spiritual body, and where the Spiritual body actually  
 ok, that's the **seed** for the Spirit body, that's the seed for the RaSha  
 body, that's the **seed** for the RaSha body and that's the seed for the  
 and that's the **seed** for the light body, right. We know the Tauren is

---

Page: 280

 of the light **seed** being born, which will come out this way at a  
 This becomes the **seed** for the RaSha bodies from which the RaSha bodies;  
 there forms a **seed** for the Spirit body that is the Krystar, and the

 template or the **seed** for the RaSha body and for the Spirit body. Now,  
 AdorA and ElorA **seeds** are formed, and then there's expanding and contracting and then  
 the Spirit body **seed**. They haven't shown me exactly what this looks like, but

 the Tauren light **seed** is born. So, first we were going, they'll probably give  
 what the Krystar **seed** looks like, which is the seed of the Spirit body  
 which is the **seed** of the Spirit body that would be behind the door  
 door where the **seed** of the light body ends up in front of the

 that is the **seed** that stands between the manifest side and the- it is

Page: 342

- one little Light **Seed** and then that built up to be-that had like
- there is a **Seed** Atom, and before a Seed Atom, there is a 1st
- and before a **Seed** Atom, there is a 1st Partikl and then a 2nd
- of birthing the **Seed** for our literally our next-it's called the Kryst Seed,
- called the Kryst **Seed**, Krystar Seed for the next Ascension Cycle. So when you
- Kryst Seed, Krystar **Seed** for the next Ascension Cycle. So when you were in

---

Page: 343

- called the Yunasai **Seed** Atom. And that is the Seed Atom for the Inner
- that is the **Seed** Atom for the Inner Domain. So this was associated with

---

Page: 344

---

- the Living Light **Seed**, the Tauren Light Seed and this is where the Spiritual
- the Tauren Light **Seed** and this is where the Spiritual Body is born. And

---

Page: 347

 the First Inner **Seed** Atom. Now, there is a Core Seed Atom that we  
 is a Core **Seed** Atom that we didn't know about before and I had  
 the Inner Domain **Seed** Atom. Where's the Core Domain Seed Atom? Is it the  
 the Core Domain **Seed** Atom? Is it the Tauren? Is it the PartikE inside

---

Page: 348

---

 the Yunasai Inner **Seed** Atom and this would be the Reuzhetta that goes with

---

Page: 349

---

 in the Yunasai **Seed** Atom. Just to give you an idea and remember that  
 birth of the **Seed** Atom with the Rosetta-the Yunasai Seed Atom with the  
 Rosetta-the Yunasai **Seed** Atom with the Rosetta. So that would be the second  
 got the Yunasai **Seed** Atom. What happens next? What happens next is the Yunasai  
 the Inner Domain **Seed** Atom and now the Inner Domain Rasha Body will emerge  
 of the Yunasai **Seed** Atom. And I have a feeling that phasing has to  
 Body and the **Seed** Atom that occurs, that allows for this next phase to

---

Page: 350

---

 well, the Yunasai **Seed** Atom is phasing. The Yunasai has 30 cells and it's  
 birthed from the **Seed** Atom, the Yunasai doing its pulse cycle, generate enough quantum,

---

Page: 352

---

 we have Prana **Seed** yet? Yes. At the center here when this Rasha Body  
 called the Prana **Seed**, and that is simply a little set of three things.

---

Page: 353

---

 Body yet Prana **Seed** becomes important because it is ... when the Lons phase,  
 between the Prana **Seed**-the little thing at the Corewhere the center in the  
 in the Prana **Seed** called the Eiron Point opens, allows the Backftow to go  
 of the Prana **Seed**, like behind the Prana Seed. And that will allow the  
 behind the Prana **Seed**. And that will allow the Orons to phase and they  
 you the Prana **Seed** a little bit more closely. It is a Phase Set,  
 So the Prana **Seed** works in the same way. It is the Prana Seed  
 is the Prana **Seed** that is crucial to the concept ofBardoah or the leaving  
 through the Prana **Seed** out into the Light Body structure, and stretches itself out  
 When the Prana **Seed** closes, the Spirit is actually still if it's still in

---

Page: 354

---

 body. The Prana **Seed** is at the center of the Rasha Body, and if  
 if the Prana **Seed** closes and the Eiron point can't open and do Backflow  
 of the Prana **Seed** opening, because actually this begins to de-polarize and the

---

Page: 355

---

 back to the **Seed** Atom, the Seed Atom will send that back to the  
 Seed Atom, the **Seed** Atom will send that back to the Spirit Body and  
 by the Prana **Seed**. At a certain point with phasing of the Rash a  
 Body, the Prana **Seed**, the whole thing contracts and makes a big Prana spark  
 damage to its **Seed** Atom. So, anyway, this is the process we're involved in,  
 through the Prana **Seed**. It would hold the Eiron Point open and just hold

---

Page: 356

---

 through the Prana **Seed** into the Domains before, into the Spirit Body, and then

---

Page: 363

 smaller is the **Seed** Atom, the Yunasai Seed Atom. We're still in the Inner  
 Atom, the Yunasai **Seed** Atom. We're still in the Inner Domain. We haven't even
