Page: 73

---

 little things called **Van Allen** Radiation Belts up there, somewhere, around our planet. They

---

Page: 74

---

 tell where the **Van Allen** Belts are just by looking up in science books

 us where the **Van Allen** Belts fit in relation to this structure. So, here

 have the inner **Van Allen** Belt running. So if you want to know where

 in the inner **Van Allen** Belt. There are something called the Nets, that are

 where the inner **Van Allen** Belt is, and out here, we should have our

---

Page: 75

---

 These are the **Van Allen** Belts. And I showed you where the inner Van

 where the inner **Van Allen** Belt was in relation to ... one this size

 was the inner **Van Allen** Belt running here. Then there is what they call

 there is the **Van Allen** Outer Belt here. Then out past there ... now

---

Page: 76

---

 through the inner **Van Allen** Belt to about halfway into the Van Allen Gap.

 halfway into the **Van Allen** Gap. There is another Net. That's called the Intra-

 of the outer **Van Allen** Belt and up out of that a bit into

---

Page: 77

---

 part of the **Van Allen** Belts and a little bit beyond it, that is

---

Page: 78

---

 connection. Here's our **Van Allen** Belts again that don't belong there. Here's our Nets

---

Page: 79

---

 past the outer **Van Allen** Belt, past the Net that runs a bit outside

 of the outer **Van Allen** Belt, and here we would find Urtha D2 Ta

---

Page: 93

---

 things about the **Van Allen** Belts ... now we know where the Van Allen  
 know where the **Van Allen** Belts are in relation to the grids that we  
 the Rod. The **Van Allen** Belts are coming off this way, from Earth, right?  
 show you the **Van Allen** Belts, and actually they will show you them upside  
 we're seeing the **Van Allen** Belts, when you see those little diagrams that you

---

Page: 94

---

 information on the **Van Allen** Belts and that kind of stuff, and if you

---

Page: 95

---

 layer and the **Van Allen** Belts are actually formed from the Nets. So, I

---

Page: 96

---

 Earth D2 inner **Van Allen** Belt is right out in this area. Then the  
 where the two **Van Allen** Belts are, where the gap between them is, and  
 relation to the **Van Allen** Belts? It's right in Page 96 of 151

---

Page: 97

---

 out what a **Van Allen** Gap is and Van Allen #2 and all  
 Gap is and **Van Allen** #2 and all of that. We're just going

---

Page: 98

---

 relation to the **Van Allen** Belts as a reference point, where certain parts of

---

Page: 107

---

 maps, where the **Van Allen** Belts exist. And science already knows approximately how many  
 miles up the **Van Allen** Belts are. So, they are a very good marker  
 So, the inner **Van Allen** Belt - I had various conflicting ones on how  
 have the inner **Van Allen** belt. So this would be the innermost point of  
 in between the **Van Allen** belts, which they call the Gap Zone. The outer  
 Zone. The outer **Van Allen** Belt is here, and it spans these layers. This  
 have the outer **Van Allen**. This is where, in the outer Van Allen area,  
 in the outer **Van Allen** area, that the D3 level Epi-Net or the

---

Page: 113

---

 before the inner **Van Allen** Radiation Belt. So, this is how you can tell  
 looking where the **Van Allen** Belts are, in relation to where the Nets are,

---

Page: 114

---

 again, find the **Van Allen** Belts. We have the inner Van Allen Belt running  
 have the inner **Van Allen** Belt running here. Here is where we're looking for  
 the gap between **Van Allen** 1 and Van Allen 2, over here. So, it's  
 Allen 1 and **Van Allen** 2, over here. So, it's actually running the gap.  
 of the inner **Van Allen** Belt. So you can literally know where these places  
 center of the **Van Allen** Belt. The Epi-Net actually creates the Van Allen  
 actually creates the **Van Allen** Outer Belt. It goes up, all the way out  
 out ... the **Van Allen** Belt still comes to out here. So, it goes  
 the middle of the **Van Allen** Belt and out still a bit more, and that's  
 in the outer **Van Allen** Belt. Right below it, you've got this band here.

---

Page: 115

---

 middle of the **Van Allen** Belt, then out toward the end of the Van  
 end of the **Van Allen** Outer Belt, and then into it a little bit.

---

Page: 117

---

 space between our **Van Allen** Belts. You have lower here we go. These were created

---

Page: 118

---

 of the inner **Van Allen** Belt. These places are physical. This is just mind-

---

Page: 121

---

 into the inner **Van Allen** Belt I believe, that would be right where the

---

Page: 122

---

 of the inner **Van Allen** Belt and the Gap Zone. It's not all the  
 of the outer **Van Allen** Belt, and then up a bit from there. That  
 of the outer **Van Allen** Belt. The magnetosphere is outside our planet, surrounding our

---

Page: 127

---

 is within the **Van Allen** gap ... D2 Intranet ... tells you it's the  
 in the inner **Van Allen** proton field. This is where Atlantis and Lemurian time

Page: 10

---

 you've got the **Van Allen** radiation belts going up there and all that kind  
 layer of, say, **Van Allen** belt number one and I don't have them memorized  
 up does the **Van Allen** inner belt begin? Science here knows those numbers. Right?  
 where exactly the **Van Allen** radiation belts fit so we can tell where those

---

Page: 153

---

 be where the **Van Allen** belts are. So if you know how far up  
 far up the **Van Allen** belts are, you can start to judge, which science

---

Page: 156

---

 is the Inner **Van Allen** belt. And I haven't had the time yet to  
 what's called the **Van Allen** Gap, alright, which is a space in the atmosphere  
 atmosphere between the **Van Allen** Inner and the Van Allen Outer Bands. This would  
 Inner and the **Van Allen** Outer Bands. This would be the Van Allen Outer  
 would be the **Van Allen** Outer Band, and this would be going up past

---

Page: 158

---

 find where the **Van Allen** belts are, and they are down in here somewhere-  
 can place the **Van Allen** belts in here at certain spots so we can

---

Page: 261

---

 are in the **Van Allen** Gap, which is the space between the inner Van  
 between the inner **Van Allen** belt and the outer Van Allen belt. And then  
 and the outer **Van Allen** belt. And then we have the Aurora 4 Platforms  
 of the outer **Van Allen** belt, above D3 upper Telos hibernation zone. We also

---

Page: 263

---

 Zone and the **Van Allen** belts would be. Here is where the inner belt

---

Page: 67

---

 get into the **Van Allen** radiation belt, this is where the proton belt starts

 is where the **Van Allen** radiation belt start But these are part of the

---

Page: 68

---

 to create the **Van Allen** radiation belts that are part of the NET that

 the first inner **Van Allen** radiation belt. That is caused by the interaction of

---

Page: 69

---

 of the inner **Van Allen** belt You have the other one, the ozone layer

---

Page: 74

---

 of the inner **Van Allen** radiation Belt 1, which is the proton belt, positive

 are forming the **Van Allen** Belts, these are not natural configurations, in fact, they

---

Page: 80

---

 showing the outer **Van Allen** band, which is the positive charge proton band here,

 and the inner **Van Allen** Belt. Oh, this is the inner one, ok, shown

---

Page: 81

---

 is the inner **Van Allen** Belt again, which is the proton band, that is

 is the inner **Van Allen** Belt- and here is our surface Earth. There is

 of what the **Van Allen** system is, but the Van Allen didn't discover it

 is, but the **Van Allen** didn't discover it so it's not technically none of

 of them are **Van Allen** Belts. They are 81 The MCEO Freedom Teachings®

---

Page: 84

---

 tangle of the **Van Allen** Belts, so that we can start getting the training

---

Page: 86

---

 These are the **Van Allen** Belts, the outer and the inner, they are actually

---

Page: 107

---

 spaces between the **Van Allen** radiation bands, where the inner one is here that

---

Page: 108

---

 where the Inner **Van Allen** radiation Belt starts, and this is where we get  
 band of the **Van Allen** radiation Belt So this is giving you placement maps  
 we've got the **Van Allen** inner radiation Belt, then there is this gap that  
 and the outer **Van Allen** Belts. Technically there is a field that runs through,  
 there is another **Van Allen** Radiation Belt that is different, so they call it

---

Page: 109

---

 saying where the **Van Allen** belts are, is between 6,437 km and 13,000 km.  
 pertaining to the **Van Allen** Radiation Belts. I'm not sure if those are accurate,  
 talked about the **Van Allen** Belts, where they started and where they stopped in  
 zone between the **Van Allen** Radiation Belts. When you come out here, you have  
 of the outer **Van Allen** band starts, the electron band starts We have the

---

Page: 112

---

 we're out past **Van Allen** #1, past the gap into Van Allen #  
 the gap into **Van Allen** #2 territory And out here somewhere we've got

---

Page: 117

---

 this is where **Van Allen** Belt I starts And that is about 500 km  
 bottom of the **Van Allen** ... they said around 500km. Then there were conflicting  
 between the Inner **Van Allen** and the Outer Van Allen Belt, between the most  
 and the Outer **Van Allen** Belt, between the most dense part of the positive

---

Page: 129

---

 start of the **Van Allen** radiation gap. This is the gap between the inner  
 between the inner **Van Allen** radiation belt and where the outer Van Allen radiation  
 where the outer **Van Allen** radiation belt starts in our atmosphere. This is the  
 of the inner **Van Allen** belt The gap is something we need to leap  
 front of the **Van Allen** gap in front of Sea16, in front of the

---

Page: 130

---

 start of the **Van Allen** gap. And now we are going into a leap  
 zones in the **Van Allen** gap. And we are going to go directly through  
 us across the **Van Allen** gap and we would come in just below Seal

 end of the **Van Allen** gap where the outer belt just starts Step 18

 of the outer **Van Allen** belt. And continue to float to Urtha D-2

 middle of the **Van Allen** outer belt So we are floating into the Van

 floating into the **Van Allen** outer belt and then through Seal? and then into

 middle of the **Van Allen** outer belt When Seal? releases, there is not much

 middle of the **Van Allen** outer belt, we'll go into Step 19. We are

 of the outer **Van Allen** belt Step 20 We will now pass through the

 leave the outer **Van Allen** belt And now we are going to do another

---

Page: 148

---

 upward through the **Van Allen** radiation belts and through our atmosphere that connect directly,

---

Page: 173

---

 get into the **Van Allen** Radiation Belts and what they are and what they

---

Page: 175

---

 connected with the **Van Allen** radiation belts and that kind of thing. So I

---

Page: 194

---

 further where the **Van Allen** radiation belts are ... what they have to do

---

Page: 198

---

 see where the **Van Allen** radiation Belts plug into this, but first we will

---

Page: 201

---

 is where the **Van Allen** radiation Belts fit, all right? In the D-3

 got the inner **Van Allen** radiation Belt that is running here and I believe

 be. Except the **Van Allen** Belt is blocking here. Now, here is the gap

 between the inner **Van Allen** Belt and the outer Van Allen Belt which is

 and the outer **Van Allen** Belt which is running out through these frequency fields

 have the inner **Van Allen**, the gap between them, and the outer Van Allen

 and the outer **Van Allen** Belts. These are things that are known in our

 atmosphere, the outer **Van Allen** Belts, I think, goes out to 13,000 km or

---

Page: 202

---

 of the outer **Van Allen** Belt about 13,000 km out something like that. And

 again of the **Van Allen** radiation Belt-the inner one and the outer one-

 with the inner **Van Allen** radiation Belt, I believe, and that is called the

 in the outer **Van Allen** Belt. This is the Ego-NET, or the Epigenetic  
 level. So the **Van Allen** radiation Belts are directly connected to the NET which

---

Page: 203

---

 we're still past **Van Allen** 1, past Van Allen 2. Right around here somewhere,  
 Allen 1, past **Van Allen** 2. Right around here somewhere, I believe it runs

---

Page: 204

---

 is the inner **Van Allen** radiation Belt, somewhere in here we've got our surface  
 that show the **Van Allen** radiation Belts, the inner Belt and the outer Belt

---

Page: 205

---

 because of these **Van Allen** radiation Belts and the NET belts that they are

---

Page: 206

---

 you got the **Van Allen** inner and the Van Allen outer This shows you  
 inner and the **Van Allen** outer This shows you the polarized layers which give  
 our atmosphere up **Van Allen**-1, Van Allen-2, magnetosphere. These places actually exist  
 Van Allen-1, **Van Allen**-2, magnetosphere. These places actually exist right here with

---

Page: 226

---

 start of the **Van Allen** Radiation Gap. This is the gap between the inner  
 between the inner **Van Allen** Radiation Belt and where the outer Van Allen Radiation  
 where the outer **Van Allen** Radiation Belt starts in our atmosphere. This is the  
 of the inner **Van Allen** Belt The gap is something we need to leap  
 front of the **Van Allen** Gap in front of Sea16, in front of the

---

Page: 227

---

 start of the **Van Allen** Gap. And now we are going into a leap  
 zones in the **Van Allen** Gap. And we are going to go directly through  
 us across the **Van Allen** Gap and we would come in just below Seal  
 end of the **Van Allen** Gap where the outer belt just starts Step 18  
 of the outer **Van Allen** Belt. And continue to float to Urtha D-2  
 middle of the **Van Allen** Outer Belt So we are floating into the Van  
 floating into the **Van Allen** Outer Belt and then through Seal? and then into  
 middle of the **Van Allen** Outer Belt When Seal? releases, there is not much  
 middle of the **Van Allen** outer belt, we'll go into Step 19. We are

of the outer **Van Allen** Belt Step 20 We will now pass through the

leave the outer **Van Allen** belt And now we are going to do another

---

Page: 239

---

that and the **Van Allen** radiation Belts and the interface with the geleziac radiation

---

Page: 243

---

where the inner **Van Allen** radiation Belt is. It shows you where the gap

and the outer **Van Allen** radiation Belt is and this is where you have

---

Page: 244

---

have the inner **Van Allen** radiation Belt We have the gapzone between them where

---

Page: 245

---

got the inner **Van Allen** gap, the outer Van Allen Belt and why out

gap, the outer **Van Allen** Belt and why out of here we have what

---

Page: 248

---

see like the **Van Allen** radiation Belt outer one in the D-2 spectrum

---

Page: 295

---

look at the **Van Allen** Radiation Belts, they have very specific ... they are

---

Page: 302

---

Anomaly and the **Van Allen** Radiation Belts .... it's connected to that And Shala

---

Page: 339

---

atmospheric levels, the **Van Allen** Radiation belts, those kind of things. So, by understanding

---

Page: 343

---

Earth's 02 inner **Van Allen** Belt runs these right here. The Sha-Lla of

also an outer **Van Allen** Belt that we have to see the embedded Kathara

We have the **Van Allen** Belts that form in between the 02 Sha and

what's called the **Van Allen** Gap Zone. This is the gap between the inner

and the outer **Van Allen** Belts. You have the inner belt here, and out

---

Page: 344

---

thermosphere and our **Van Allen** Belts. We can use the Van Allen Belts because

can use the **Van Allen** Belts because we know where they are sitting to

into the inner **Van Allen** Belt There's another one, that is the Derma-NET,

---

Page: 345

---

 running between the **Van Allen** Belts and, I believe that's where we're supposed to

---

Page: 346

---

 area of the **Van Allen** Belts, and part of which are messed up by

---

Page: 348

---

 fit. The inner **Van Allen** radiation belts, the outer Van Allen radiation belts, where  
 belts, the outer **Van Allen** radiation belts, where the Epi-NET is running here  
 ... past the **Van Allen** one, and middle atmosphere ... they break it down  
 end of the **Van Allen** Gap, where the Van Allen outer band starts, and  
 Gap, where the **Van Allen** outer band starts, and I think that's the electron  
 where are the **Van Allen** belts? How far up are they? We can actually  
 anyway ... Inner **Van Allen**, outer Van Allen, in here you have the Gap  
 Van Allen, outer **Van Allen**, in here you have the Gap Zone, and that  
 end of the **Van Allen** Gap, and where the outer starts The outer Van  
 starts The outer **Van Allen** Gap, where it starts begins what our guys call  
 goes past the **Van Allen** Gap, all the way out to other things that  
 of the outer **Van Allen**, is where the Epi-NET is running, and that's

---

Page: 350

---

 It's the inner **Van Allen** Belt, proton belt Then there's the epigenetic EGO-NET.  
 km. And that's **Van Allen** outer electron belt, so it's running in that belt  
 belt So, the **Van Allen** belts are not natural configurations either. They wouldn't be  
 Layer and the **Van Allen** belts that are completely unnatural, natural configurations on the

---

Page: 351

---

 part of the **Van Allen** belt is that Aurora platform? If you're aiming for  
 science where the **Van Allen** belts are. Where what is that they know is  
 overs, where the **van Allen** belts are here. Take it from there and go

---

Page: 355

---

 is the inner **Van Allen** belt. So, these cloud cities, the surface cloud cities,  
 of the inner **Van Allen** belt, starting in the Gap area. Over here, we

---

Page: 356

---

 them with these **Van Allen** belt drawings. You usually see them with the writing

---

Page: 397

---

 there in the **Van Allen** radiation Belts? What are they? These things are not

---

Page: 408

---

 be the Inner **Van Allen** radiation Belt level ... see all these things can

 and the Outer **Van Allen** Belt, then you have the Outer Van Allen Belt,

 have the Outer **Van Allen** Belt, then you have all the way going up

---

Page: 411

---

 here, around the **Van Allen** layers we are supposed to have our Corona sphere,

---

Page: 413

---

 as well as **Van Allen** radiation Belts and all of that. There would be

---

Page: 415

---

 nor are the **Van Allen**"s. But above it you have the Hibernation Zone, the

 and the Inner **Van Allen** is where you have the Aurora-2 platform and

---

Page: 450

---

 anomaly in the **Van Allen** Belts and all that stuff has to do with

---

Page: 505

---

 that is (**Van Allen** Gap) open and merge to form the Level-2

---

Page: 517

---

 Ozone Layer, the **Van Allen** Belts and that kind of stuff that can give

---

Page: 518

---

 relation to the **Van Allen** Radiation Belts, usually you see diagrams about Van Allen

 see diagrams about **Van Allen** Radiation Belts ... you can find them on the

---

Page: 519

---

 we've got the **Van Allen** Belts here, the Inner belt and the Outer Belts.

 we have 2 **Van Allen** Belts; Inner Belt would run around that way and

---

Page: 520

---

 the 02 Inner **Van Allen** Belt. The Inner Van Allen Belt I believe spans

 Belt. The Inner **Van Allen** Belt I believe spans here, ok? And you don't

 see the Outer **Van Allen** Belt yet. That would be out here in the

---

Page: 522

---

 where we have **Van Allen** Belt-1 wrapped around here. This is our 02

 is where the **Van Allen** Belts inner would come around, right? They are outside

 you have Thermosphere, **Van Allen** Belts ... here is where you end up with

 wouldn't have the **Van Allen** Belts there. This is the Outer Van Allen Belt.

 is the Outer **Van Allen** Belt. This is the Gap Zone between the Van

 Zone between the **Van Allen** Belts. This is still going out further Out here,

---

Page: 523

---

 edge of the **Van Allen** Inner Belt. Like so if you go through the

 go through the **Van Allen** Belt to the end where you just approach the

 you have the **Van Allen** Gap here, alright... the Gap Zone. And then you

 have the Outer **Van Allen** Belt spanning these 2 areas. Now when you come

 of the Outer **Van Allen** Belt going all the way through to our mental

 where the Inner **Van Allen** Belt would start. So, this is where you can

 edges of our **Van Allen** Outer Belt, but not yet to the Magnetosphere, yet.

---

Page: 524

---

 It places the **Van Allen** Belts here. It places the Aurora Platforms in these

---

Page: 526

---

 of the Inner **Van Allen**, rightL going into the Gap area. So you can

 in relation to **Van Allen** and right through the middle of the Outer Van

 of the Outer **Van Allen** Radiation Belt. It is the center of that NET.

 of the Outer **Van Allen** Belt. And the inner D3 one is at the

 of the Outer **Van Allen** BelL and I believe the outer belt is the

---

Page: 548

---

 Manifests in: Inner **Van Allen** proton belt (outer Y>) to the Van Allen

---

Page: 81

---

 used are the **Van Allen** belts because science here has identified the Van Allen  
 has identified the **Van Allen** belts by showing us where the Van Allen belts,  
 us where the **Van Allen** belts, the inner belt, the Van Allen Gap between  
 inner belt, the **Van Allen** Gap between them and then the outer Van Allen  
 then the outer **Van Allen** belt, we can actually ... and when we see

---

Page: 84

---

 to the inner **Van Allen** belt and the outer Van Allen belt This is  
 and the outer **Van Allen** belt This is where we can start telling ...  
 where the inner **Van Allen** belt starts, how many whatever miles up, kilometers or  
 be ... the **Van Allen** belts are not part of the natural structure. They  
 is the outer **Van Allen** belt that you saw as a band before but

---

Page: 85

---

 Where are those **Van Allen** belts again? Van Allen, outer So they're out They're  
 Allen belts again? **Van Allen**, outer So they're out They're actually in the area  
 relation to the **Van Allen's** again? Right outside the edge of the outer Van  
 of the outer **Van Allen** belt there is an Aurora platform. It's called Aurora

---

Page: 86

---

 relation to the **Van Allen** belt? It's right outside the inner Van Allen belt  
 outside the inner **Van Allen** belt It's in the Van Allen gap, all right?  
 It's in the **Van Allen** gap, all right? That's another NET static field That

---

Page: 87

---

 in the whatever **Van Allen** belt that is, right up on, in the Van  
 on, in the **Van Allen** gap. And there's also the A3 platform that you  
 of the outer **Van Allen** belt, right? So that tells you how many miles

---

Page: 88

---

 around the outer **Van Allen**. We could pick up the, the channels to it

 3 of the **Van Allen** belt, and you'll see later where that goes. And,

---

Page: 91

---

 is in the **Van Allen** Gap, all right. That Aurora 3 Platform are the

 Aquifers in the **Van Allen** Gap. The name of these are called Aquafereion and

 of the outer **Van Allen** belt above the 03 upper Telos Hibernation Zone, so

---

Page: 96

---

 into the inner **Van Allen** belt from the crust actually it will go from

 into the inner **Van Allen** belt and that will be, that is where the

---

Page: 103

---

 Gyrodome and the **Van Allen** Gap. The Aquafereion races will handle entirely the clearing

 Cluster and the **Van Allen** via Ecousha 3 Tenerife En"-TUha"-VA. So, there

---

Page: 126

---

 happening in the **Van Allen** Belts and that kind of stuff As well as,

 atmosphere through the **Van Allen** Belts. And at that point, that's the point of

---

Page: 183

---

 they use the **Van Allen** Radiation Belts and their positions as actually markers to

 relation to the **Van Allen** Belts. That is something that can be measured from

 far up the **Van Allen** Belts are and stuff So, when we talk about

---

Page: 185

---

 is in the **Van Allen** gap between the Inner Van Allen Belt and the

 between the Inner **Van Allen** Belt and the Outer Van Allen Belt going up

 and the Outer **Van Allen** Belt going up in the atmosphere, that corresponds to

---

Page: 220

---

 you where the **Van Allen** Belts are. This shows you where all of these

 up into the **Van Allen** Belt over here. This is the Gyrodome. This forms

---

Page: 308

---

 don't have the **Van Allen** Belt messes. Here's the outer Van Allen, the inner

 Here's the outer **Van Allen**, the inner Van Allen, the Van Allen Gap. What

 Allen, the inner **Van Allen**, the Van Allen Gap. What we're progressively doing, is

 Van Allen, the **Van Allen** Gap. What we're progressively doing, is bringing the Aqualene

---

Page: 358

---

 down. Using the **Van Allen** Radiation Belts as the markers, we were able to

---

Page: 364

---

 do with the **Van Allen** Belts, that actually gives us false Mental Body, D-

---

Page: 366

---

 see where the **Van Allen** Radiation Belts fit, the Inner and the Outer, in

---

Page: 369

---

 at where the **Van Allen** Belts fit and all of that kind of stuff

---

Page: 445

---

 called the inner **Van Allen** Belt This is where the inner Van Allen Belt  
 where the inner **Van Allen** Belt starts, above the thermosphere. This is actually an  
 tilt The two **Van Allen** Belts are actually holding that misalignment of the poles  
 what's called the **Van Allen** Gap Zone, which is a space between the inner  
 between the inner **Van Allen** Belt and the outer Van Allen Belt So, in  
 and the outer **Van Allen** Belt So, in relation to the Rasha, they are  
 atmosphere the outer **Van Allen** Belt is, and also to find out where, if  
 and the outer **Van Allen**, and out into where Urtha is. Next one, please.

---

Page: 447

---

 are where the **Van Allen** Belts would wrap around through. In relation to the  
 one, the outer **Van Allen** Belt, would be out here. So, you had to  
 where the outer **Van Allen** Belt was. It's out here also, that the D3  
 of the outer **Van Allen** Belt. The Aurora 4 platform is here, and the  
 and the outer **Van Allen** Belt ends here. If we keep going up, we

---

Page: 450

---

 place by the **Van Allen** Belts. Next one, please. [Graph] [Sun5 00

---

Page: 451

---

 but in the **Van Allen** Gap, between the Inner and Outer Van Allen Belts.  
 Inner and Outer **Van Allen** Belts. Then we have the Aurora 4 platform called  
 of the Outer **Van Allen** Belt So, these are the safe zones and these

 a yardstick the **Van Allen** Radiation Belts where we know, our science here knows  
 above the Outer **Van Allen** Radiation Belt, but it's under, it's still below the  
 is the Inner **Van Allen** Belt; A2 is down below it; A3 is up

---

Page: 61

---

 are in the **Van Allen** Gaps, and they're called Aquafereion. We have whole race  
 of the Outer **Van Allen** Belt, above D3, Upper Telos. It also shows you

---

Page: 68

---

 relation to the **Van Allen** Belts. So you can get an idea of where  
 holding in-the **Van Allen** Belts are not natural. They are part of the

---

Page: 69

---

 on. So the **Van Allen** Belts are actually holding this in. This is called

 where? Into the **Van Allen** Belts. Okay, this is interesting This is hanging out  
 out in the **Van Allen** Belts-- which I forget how many, you know, miles  
 atmosphere to the **Van Allen** Belts ... the radiation belts. And I'm still narrating  
 level of the **Van Allen** Belts- the outer Van Allen Belt actually. And then  
 Belts- the outer **Van Allen** Belt actually. And then another one will pop on

---

Page: 114

---

 in the outer **Van Allen** Belt, actually, I'm watching what is happening. So it's

---

Page: 115

---

 around the outer **Van Allen** Belt layer where we have our three layers out

---

Page: 116

---

 band of the **Van Allen** Belts. That's where the first Mirror level is activating  
 in the outer **Van Allen**, another one on the inner maybe, and a couple

---
