 -  you to anchor **Aqualene** Sun, and for your body pattern to be able to
 -  come from the **Aqualene** Sun. Both are radiation frequencies that are coming in. The
 -  this planet. The **Aqualene** Sun frequencies have a special gift. For those who can

Page: 12

 fields of the **Aqualene** Sun. Then, we will be able to take that to

Page: 32

 frequencies of the **Aqualene** Sun, which have to do with the frequencies of the

 little about the **Aqualene** Sun, because that will progressively assist the body to not

Page: 33

 when this particular **Aqualene** Sun host of Rashalae body was needed, when Urtha Starfire

 they're called the **Aqualene** transmission. Aqualene transmission refers to that very large powerful blended

 the Aqualene transmission. **Aqualene** transmission refers to that very large powerful blended ray that

 that, of the **Aqualene** transmission and when you not only run the currents of

 it's called the **Aqualene** Sun, and it's called the Aqualene Sun because it's the

 it's called the **Aqualene** Sun because it's the Aqualene transmission frequencies coming through and

 because it's the **Aqualene** transmission frequencies coming through and activating the radial body on

 gets through the **aqualene** sun that's going to be around the sun. What I've

 is called the **Aqualene** fire water flame and that is what will allow for

 to activate as **Aqualene** sun, where you can actually control the activation of it.

Page: 36

 would activate the **Aqualene** sun field around the outside. I knew they didn't want

 do I use **Aqualene** Sun here? And it's the strongest protection field and transmutation

 it's from the **Aqualene** transmission which is all of those blended rays on the

 we have the **Aqualene** Transmission which is that plus the Hubs from the AnshaTAsa

 being put under **Aqualene** Sun protection which they haven't told me much about them.

Page: 37

 able to activate **Aqualene** Sun, and that gives a protection field that will at

 Earth in its **Aqualene** sun into Sirius B to its core but not fully

 are what, what **Aqualene** Suns are and at least that will give you visual

 beginning of the **Aqualene** sun activation. Next one please, I believe we go into

Page: 54

 for the full **Aqualene** transmission. It's funny because, they've had us use this as

 do with the **Aqualene** Sun core flame that will activate within ... once we

Page: 55

 beginning of the **Aqualene** transmission directly. After that point, you can activate this flame
 bodies with the **Aqualene** Sun, which is that transmutation buffer field that will allow
 transmission of the **Aqualene** transmission crystals and fire water crystals - I forget what

Page: 67

 known as the **Aqualene** Sun. So, the Rashalae body, once it's fully activated, can
 fully activate the **Aqualene** Sun, or the RishaA body, the body of the Sun

Page: 80

 activation of the **Aqualene** Sun frequencies from the Aqualene transmissions. So, we'll have the
the
 frequencies from the **Aqualene** transmissions. So, we'll have the Aurora zone fields coming
from

Page: 82

 we get the **Aqualene** Sun frequencies back, we will begin to be able to

Page: 85

 layers of the **Aqualene** Sun, so you will have protection. So, even just aiming
 vertical within the **Aqualene** Sun field will keep you out of most trouble. You

Page: 86

 relation to the **Aqualene** Sun activations. When you put those pieces of knowledge together,
 we do the **Aqualene** Sun activation, which the next part of it is initiating
 there, because the **Aqualene** Sun and the frequencies it comes in on, or the

Page: 89

 you activate the **Aqualene** Sun and it burns off the Net fields? What happens?

Page: 95

 Sun, before the **Aqualene** Sun field is activated to buffer it. So, I imagine

Page: 96

 culminate in the **Aqualene** Sun activation of the Rashalae body, it means turning on

Page: 102

 you activated your **Aqualene** Sun and your coronosphere too fast. We won't have those
 apply with the **Aqualene** Sun frequencies. From what I've seen in my experience, the

 work with the **Aqualene** Sun it will progressively help our bodies to transmute that

Page: 106

 progressively with the **Aqualene** Sun activations, begin the process of depolarizing that part of

Page: 108

 more with the **Aqualene** Sun and will be able to go into the slide

Page: 119

 together through the **Aqualene** Sun. When they are Page 119 of 151

Page: 120

 activated through the **Aqualene** Sun, these Aurora zones will open up as a full

 bodies, of the **Aqualene** Sun. So, by the time that burst is released, even

 field of the **Aqualene** Sun that will be around Sala at that point. Even

Page: 121

 screen of the **Aqualene** Sun, that will take those gamma bursts and transmute them,

Page: 125

 planet from the **Aqualene** Sun, even if we didn't anchor it, they're coming. They

Page: 129

 together, once the **Aqualene** Sun fields fully activate. These are the cloud cities, but

Page: 134

 layers of the **Aqualene** Sun frequencies are going to be activating in the planetary

 frequencies of the **Aqualene** transmission running through them. So they will not just have

 those frequencies of **Aqualene** Sun came on completely, it is what happened in the

Page: 137

 is where the **Aqualene** Sun rays are going to activate in the Rashalae body

 you get into **Aqualene** Sun, but they wanted me to remind everyone about the

Page: 144

 the level of **Aqualene** Sun activation that would be needed to ... deal with

Page: 148

 activation of the **Aqualene** Sun frequencies within the bands and layers - first the

 activations of the **Aqualene** Sun within the band layers of one through four. That

Page: 149

 in beginning the **Aqualene** transmission in your fields, but you will be able to,

Page: 150

 which is the **Aqualene** Sun, and this is the closest image we've seen here

 to what the **Aqualene** Sun looks like, and what your fields look like, it's

Page: 385

 Bringing in the **Aqualene** Sun So now we're going to, we've got our keys,

 something called the **Aqualene** Sun buffer field that is part of what is called

 do with the **Aqualene** Sun activations. There are certain things that happen in the
 what is the **Aqualene** Sun activation. That would actually show between the iris and

 it with an **Aqualene** sun hug and you find this large nasty looking lizard

Page: 92

 is called an **Aqualene** Sun Activation. So, there are 3 Aqualene Sun activation levels
 there are 3 **Aqualene** Sun activation levels to bring the 4 platforms together and

 out to an **Aqualene** Sun and go vertical (laughs), right, push right, breathe

Page: 160

 very, very big **Aqualene** Sun that turns into a ball of spinning LaVa, love

Page: 170

 we have enough **Aqualene** Sun. Now Aqualene Sun is a frequency that has been

 Aqualene Sun. Now **Aqualene** Sun is a frequency that has been progressively activated through

Page: 171

 we've showed the **Aqualene** Sun image- they want me to shift gears cause they

Page: 172

 image of the **Aqualene** Sun Fire-Water Krystal in its form, flame form, imagine

Page: 183

 they form an **Aqualene** Sun Field, they open up a Slide Zone. The first

Page: 217

 be here. The **Aqualene** Sun Gyrodome fields that we're activating will hold Earth from

Page: 220

 When we do **Aqualene** Sun activations, RaSha body progressive activations, what we're doing is

Page: 229

 more about what **Aqualene** Sun activation levels are, "cause that just has to

Page: 252

 work with the **Aqualene** Sun fields that are being built through the Gyrodome and

Page: 304

 blue pulse, the **Aqualene** color. When you take that back one step, that's where

 carry the Krystar **Aqualene** colors. If you take it back one to Cousha four,

Page: 306

 Fire-Water Krystal **Aqualene** Sun around you and blow it out to sun form,

Page: 308

 is bringing the **Aqualene** Sun levels into activation. What this means is we are

 orbs. So, the **Aqualene** sun activation level1 opens this slide zone area. In-between

 3. So each **Aqualene** Sun activation level in the field is created from the

 blending into the **Aqualene** sun slide zones. I'm not going into where is everybody,
