 go back as **backflow** to Source, and then it expands back out again, and  
 again, and breathes **backflow** return currents. So, whatever black hole forms out here in

---

Page: 39

---

 what's called the **backflow** return. There's something called Prana Exchange that we are going

---

Page: 40

---

 creates the first **backflow** to Source. Source created the first gift, the first outflow  
 the first full **backflow** to Source, and it creates a x2 replica of the  
 basic process of **backflow** to Source, and then you get what's called backflow return  
 get what's called **backflow** return from Source. So, as long as that creation point  
 open, you have **backflow** and backflow return. You have an open circulation, the breathing  
 have backflow and **backflow** return. You have an open circulation, the breathing rhythm of  
 rhythm of Source. **Backflow**, you have contraction of the light bodies. Outflow, you have  
 and are the **backflow** return flow back into Source. The outgoing cycles are called

---

Page: 41

---

 currents, or those **backflow** currents back to Source. It's a process that we'll see

---

Page: 52

---

 Prana sparks are **backflow** sparks. They go back to Source. They go back through  
 Tauren. Well, the **backflow** goes from the Prana seed Eiron point, back in, and

---

Page: 58

---

 sends that as **backflow**, then there's a (makes sound) thing that happens again.

---

Page: 88

---

 atom, but no **backflow** going back. They want us to know that there was

---

Page: 115

---

 to connect to **backflow** anymore, or the Antakarana cord that comes out, as outflow.

---

Page: 138

---

 Prana is the **backflow** to Source. It releases a flow of mana energy. Prana

---

Page: 140

---

 through, and as **backflow** to Source, and then the backflow return of mana comes  
 and then the **backflow** return of mana comes back out. Now, something fascinating happens  
 when the mana **backflow** return is released, after the seed atom receives its prana  
 down as a **backflow** return again. This gets interesting. So, each one of these,

---

Page: 141

---

 back as the **backflow** return from the ManU spark. At this point, you have  
 from the ManU **backflow**. It's sending a backflow return of Eck. It comes out  
 It's sending a **backflow** return of Eck. It comes out and triggers each one

 far as a **backflow** through the Eiron point ... it's not been done for  
 supposed as a **backflow** to Source frequency, which will allow on the exhale the  
 go back as **backflow** again, and then a full Eck spark will be released,

---

Page: 145

---

 So the first **backflow** return to the seed atom will happen then. Then on

---

Page: 147

---

 point as a **backflow**, when the body becomes prana depleted, it becomes mana depleted,

 the first three **backflow** return sparks that become the Tauren light seed, from which

---

Page: 47

---

 is called the **backflow** return, which allows the creation point that it originally came

---

Page: 52

---

 is called the **backflow** energy. So, when it is out manifest, it makes a

 what"s called a **backflow** return, where it takes that quantum, replicates it, and sends

---

Page: 131

---

 which sends a **backflow** back, and all sorts of things happen that I don"t

 it creates a **backflow** return that I believe is the "Va Field". And

---

Page: 198

---

 to it as **backflow**, so they replicate. And there is series of replications that

---

Page: 206

---

 Sparks as a **backflow** to what was before it. And that creates a Mana

---

Page: 223

---

 end of a **backflow** wave that was an ascension wave that went in, so

---

Page: 227

---

 downward, it"s the **backflow** spark goes up this way and then the backflow return

 and then the **backflow** return comes down this way so it"s there. Then it

---

Page: 228

---

 pulls in as **backflow** gets replicated, and this is where we get the formation

---

Page: 243

---

 exchange. When Prana **backflow** goes back through the Eiron point into the seed atom,

---

Page: 271

---

 does make another **backflow** spark gets another back flow return atomic spark and then

---

Page: 272

---

 is an etheric **backflow** spark that hadn't come all the way in to make

---

Page: 327

---

 how they form **Backflow** Return sparks and how that created the Tauren. There's a

 Partiki are actually **Backflow** Return sparks that we'll cover in a little bit, of

 But they are **Backflow** Sparks, are when something that's out here that sparks and

 and sends a **Backflow** Current back through the First Creation Point Door back into

 Source sends a **Backflow** Return · Current. So there were three different sparks that

 got three different **Backflow** Return Currents that form the three outer, what are

---

Page: 328

---

 and sparking and **Backflow** and Backflow Return until it builds the Light Body structure

 and Backflow and **Backflow** Return until it builds the Light Body structure for the

---

Page: 329

---

 sparks and create **Backflow** to Source and that allows for quantum Backflow Return, that

 allows for quantum **Backflow** Return, that makes more sparks. So they continually generate energy,

---

Page: 331

---

 Point as a **Backflow** and then get a replica of its entire self. And

---

Page: 332

---

 And sparking means **Backflow**, and Backflow means Backflow Return. So it's Quantum Generation and

 means Backflow, and **Backflow** means Backflow Return. So it's Quantum Generation and Quantum Replication

 and Backflow means **Backflow** Return. So it's Quantum Generation and Quantum Replication and Quantum

 the Bhardoah, or **Backflow** "Death" of the atomic mortal body occurs when the

 and reciprocal **"Backflow"** or "up-step Ascension" that is inherent to the

 door and a **backflow** return spark is let back loose. And the first three

 have three Partiki **backflow** return sparks in the Tauren and the center unit that

Page: 185

 Source and more **backflow** return sparks out And that is the difference between a

---

Page: 307

---

 And when a **backflow** spark goes back, it opens the original creation point door

 and closing through **backflow** sparks going back to Source, which you give back to

 then Source gives **backflow** return So, when we talk about Kristiac and anti-Kristiac,

 spark, and then **backflow** return with a replication, and a return of the original.

 ManU burst of **Backflow** flowing back to Source goes all the way through, it

 Frequency is the **Backflow** Return from the ManU that the Rasha-Lons spark. The

 the first three **backflow** return sparks that become the Tauren light seed, from which

---

Page: 203

---

 2 and 3 **BackFlow** Sparks with their Back-Flow Return Sparks, the 3 E-

---

Page: 212

---

 Sparks as a **backflow** to what was before it And that creates a Mana

---

Page: 230

---

 end of a **backflow** wave that was an ascension wave that went in, so

---

Page: 234

---

 downward, it's the **backflow** spark goes up this way and then the backflow return

 and then the **backflow** return comes down this way so it's there. Then it

---

Page: 250

 exchange. When Prana **backflow** goes back through the Eiron point into the seed atom,

---

Page: 279

---

 does make another **backflow** spark gets another back flow return atomic spark and then

---

Page: 280

---

 is an etheric **backflow** spark that hadn't come all the way in to make

---

Page: 337

---

 how they form **Backflow** Return sparks and how that created the Tauren. There's a

 Partikl are actually **Backflow** Return sparks that we'll cover in a little bit, of

 and sends a **Backflow** Current back through the First Creation Point Door back into

 Source sends a **Backflow** Return Current. So there were three different sparks that sent,

---

Page: 341

---

 Point as a **Backflow** and then get a replica of its entire self The

---

Page: 353

---

 and sends a **Backflow** spark out So the Prana Seed works in the same

---

Page: 354

---

 open and do **Backflow** and Backflow Return anymore, it starts a progressive releasing. It's

---

Page: 355

---

 isn't sending a **Backflow** like it's supposed to back to the Rasha Template, progressively

---

Page: 384

---

 already an atomic **backflow** return spark on that 0-point axis. So when this

---

Page: 385

---

 they were the **backflow** sparks left from Partikl1 and Partikl 2. And here is

---

Page: 408

---

 point allows for **backflow** to go all the way back to the Cosmic Spirit
