 They are the **currents** that we need to activate, in order to keep our

 sorts of different **currents** that go with each one of those, like etheric, ketheric,

Page: 62

 working with these **currents**, and you make connection through the journeys with ... and

 lots of different **currents** that come through when you activate them in the bodies,

 the Neon Aurora **Currents**. (chuckles) I mean we've been bringing currents in all

 we've been bringing **currents** in all over the place. These are not just currents

 are not just **currents** for the Outer Domains, not just currents for the Middle,

 Domains, not just **currents** for the Middle, the Inner or even the Core Domains.

 These are the **currents** that exist beyond the Creation Point Door, the first Creation

 and bring the **currents** all the way up from the RaSh a to the

 that allows the **currents** that we've been running on the etheric levels and on

Page: 116

 to open the **currents** progressively ... and it's really neat what those currents do

 neat what those **currents** do once they're opened. So, once we see what they

Page: 123

 will be beautiful **currents** flowing through in those configurations. Running through, that will be

Page: 132

 certain level of **currents** that comes through the LaVa at its core, that will

Page: 135

 means it's making **currents** and sparks ... it's making Love (chuckles), right, making

Page: 137

 the reverse light **currents** just to hop around in Space-Time, you can go

 it on Krist **currents**. And it is already going on the natural organic spin,

Page: 205

 on the natural **currents** of the Kristiac cycles, but you just won't have your

Page: 226

 body structure that **currents** that were generated from here, actually begin to accrete and

Page: 232

 types of different **currents** have, so when key resolution happens, those keys go into

 the main primal **currents** that everything else is built on and they all started

 do with the **currents** that are spiraling out from the center that we'll look at

 progressive expansion of **currents** coming out, of spark pulse currents coming out. These are,

 of spark pulse **currents** coming out. These are, everytime a replica happens, the ones

 where the core **currents** start to flow out of and it, the Rosetta and

 that keep the **currents** flowing because 235 The MCEO Freedom Teachings® Series Presented

 the extra replica **currents** of the light body currents, because it will, the light

 the light body **currents**, because it will, the light body, starting with the Tauren,

 where the first **currents** start and we're still dealing with the Tauren and how

 continues to make **currents**. Replicas that then break down into currents that come outward,

 break down into **currents** that come outward, and it also creates counter spiraling currents

 creates counter spiraling **currents** that come back in that will allow for return. That's

 get Eckashi outward **currents** that form the Eckashi cycles and then the Adashi turn

 ride the other **currents** coming back in clockwise. So, the ones coming out, come

Page: 237

 shows how these **currents** split when it keeps going into expansion. The next set

 in to Source **currents**, and once all of those pick up a large cycle

 you have those **currents** forming, the currents from the krystal spirals coming together meeting.

 currents forming, the **currents** from the krystal spirals coming together meeting. They also activate

 flow of spark **currents** back outward feeding the Krystal Spiral. The MCEO Freedom Teachings

Page: 238

 winds form the **currents** of the inner, the core and the inner flames. This

 probably carries the **currents** of one of those domains is how I think that

Page: 241

 allow for the **currents** that come out to form the light body that goes

 connect with the **currents** that go back to the seed atom and back to

Page: 243

 pumping of the **currents** like the pumping of the blood. And then you have

 allows all those **currents** that are happening behind this level in the Tauren, all

Page: 251

 taking the **currents** that come from here out into the outer light body

Page: 257

 Fields of energy **currents** going counter clock wise. So in between each, in between

 continually generating Spark **Currents**. The MCEO Freedom Teachings® Series Presented by Adashi MCEO

Page: 258

 generate the Spark **Currents** that will accrete or come together, those Sparks will start

Page: 262

 on Sets of **Currents** as well, coming in from each level, as you go

Page: 270

 through the central **currents** to the structure known as the Eye of God, that

Page: 278

 God and the **currents** that flow through the Allurea. So, the first Eye of

Page: 279

 of those particular **currents**. So, what they're doing is actually opening these set of
 set of core **currents**, that are all the way back in the first, behind
 up all these **currents** so you, this is the first 7 currents. You have
 the first 7 **currents**. You have the first 7 currents that go with the
 the first 7 **currents** that go with the first 7 replications of the Cousha.
 those core Cousha **currents** that creates the rapid activation of the entire RashaLAe body.
 all of these **currents** turned on from the Cousha all the way up through

Page: 281

 bodies, where those **currents** start to open and from that point we will be

Page: 283

 do with the **currents** that are running as well, so we'll get into a

Page: 291

 showing, without the **currents** showing, that are spiraling from each of the chambers. It
 nerve carries the **currents**, just like the currents come through from the center and
 just like the **currents** come through from the center and there is the main
 and builds the **currents** as they're coming out into the light body, or the

Page: 294

 are circulating split **currents** from the hibernation zone here, because what they've done is

Page: 321

 the Core LaVa **Currents**. And they are the first seven Core Currents that come
 first seven Core **Currents** that come out into manifestation from the Spirit Body. So

Page: 322

 with the Antakharana **currents** and running the primal life force currents, and all of
 primal life force **currents**, and all of that kind of thing. Well, this ...
 of those natural **currents** of regeneration and rejuvenation can't come into the body. When

Page: 328

 literally opening the **currents** from all of the Domains that you have passed through

Page: 337

 literally the spiraling **currents** that will come out through those cells. You could put
 would be the **currents** coming out of them. These would be the clockwise ones

 Those Light Body **currents** that have to do with the Light Body Domains going
 what the Core **Currents** coming-the deeper Core Currents coming from the Spirit Body-
 the deeper Core **Currents** coming from the Spirit Body-will ride through. So it
 the Spirit Body **Currents** it would probably blow you up, because literally you don't
 the Spirit Body **currents** are. So it's a progression of opening the currents and
 of opening the **currents** and finally we've gotten all the way back to where
 can open the **Currents** of the Spirit Body, as well as Light Body Currents.

 of the Core **Currents** from the Spirit Body to just move naturally through. Usually

Page: 354

 types of matter **currents** within and between them. When we look at the Vertical

Page: 356

 and release spark **currents**. So it's all a breathing, it's a living breathing Manifest

Page: 361

 the natural vertical **currents** that are coming through, that phase, that still phase and

Page: 362

 in the matter **currents** from up here, from Adashi-1 . When we get

Page: 364

 the ManA base **currents** coming out into manifestation, and the other one would be

 with those deeper **currents** are starting to open and they have to do with

 CVC- all these **currents** turning on around it, so it actually expands out to

Page: 367

 which set of **currents** you are trying to bring in from which body, be

 actually bring the **currents** in, the flows from that particular you know, specific area

Page: 373

 are the spark **currents** that come out from the 1st Partikl. Meanwhile, those coming

Page: 374

 probably ManA based **currents** going CW positive charge outward this way and EirA negative

 EirA negative charge **currents** of the Spirit Body going this way. But there is

 lots of different **currents** as we've seen. There is 15 different states of matter

 different types of **currents**. So what we get out of this by the time

 set of Core **Currents**, of 7 Core Currents that become very important. But what

 of 7 Core **Currents** that become very important. But what is fascinating about this,

Page: 376

 units become spark **currents** that amplify and cycle and as far as numbers go,

Page: 378

 a set of **currents**, or flows, which are Core Flow energies that are literally

 allows for the **currents** from these areas of anatomy to come into the bodies-

Page: 379

 always open and **currents** are always moving back and forth. And these 2 blink

Page: 381

 Body level--those **currents** step out through the process of Spirit Body and Light

 the Dark Matter **currents**. These were the Aurora currents, remember we talked about- I

 were the Aurora **currents**, remember we talked about- I don't know some of you

 the Aurora neon **currents** and the Ultras. The Ultra currents have their opposite frequency

 Ultras. The Ultra **currents** have their opposite frequency as the stream running inside of

 with the Heliotalic **currents** you know, before that. And then from there come out

Page: 384

 of the Hara **currents**. And eventually we end up with our Hara line that

Page: 387

 so these Core **Currents** are not accessible to a body that is born here.

Page: 389

 have the ManA **Currents**, projecting forward, that is considered "front" for whichever set

 literally manifest the **currents** that form the different Domains. From here, they're probably going

Page: 390

 instead of running **currents** back and forth like we're supposed to through that ELUma-

Page: 401

 here, where our **currents** aren't flowing out of that Domain, when it's working naturally

 imprint and the **currents** in from the Edonic level. And then 1 would be

Page: 402

 on-line, the **currents** from the Edons, from where you came from, all right.

Page: 406

 where the manifesting **currents** would come through. And that's where the Spirit manifesting currents

 the Spirit manifesting **currents** would come through, going in the opposite direction all right.

Page: 408

 have the Manifest **Currents** moving forward and the Spirit Currents moving back from that

 and the Spirit **Currents** moving back from that Center Creation Point, where the Cousha

Page: 409

 EirA frequencies or **currents**, going out backwards. What you also have is a set

 and the Spirit **currents** are EirA 11 and 2/3rds negative charge ... pulls

 So the EirA **currents** go back to the first transduction point, all right, that's

 right. And these **currents** up here, which are called the Ma-Ta currents, they

 the Ma-Ta **currents**, they have ... if you take the 21 and 2/

 called the Eira **currents**, that are 11 and 2/3rds, but with a positive

Page: 410

 manifests, and the **currents** are going this way, facing that way. The displaced Spirit

 energy. The Mana **currents** go out, when the Mana currents split, this part of

 when the Mana **currents** split, this part of the split Mana currents comes back

 the split Mana **currents** comes back in and fills out the hole. And that's

 the little spark **currents** that form the atoms. And this is what fills out

 The Spirit body's **currents** are still going that way. This one are the turnaround
 are the turnaround **currents** that came back and it's the embodied Spirit, and this

Page: 411

 with the EirA **currents** going backwards. Each one of these, because each one are
 on the ManA **currents** that are outward- moving. And then the ones that are
 negative-charge EirA **currents**, and the displaced EirA currents that become Eira, positive-
charged
 the displaced EirA **currents** that become Eira, positive-charged EirA currents. And what they
 positive-charged EirA **currents**. And what they form, when they combined, is Eiradons, which

Page: 412

 of the Spirit **currents** in, but then they get trapped in that body. And
 will open the **currents** between the Cousha centers. When that is accomplished, we will
 of the natural **currents** of the Eiradonis get to come into the body because

Page: 413

 Eiron flows backflow **currents**, which triggers opening of the Ek outflow currents. That begins
 the Ek outflow **currents**. That begins this natural flow of transfiguration between the bodies.
 allow for the **currents** of the HarA-Krysta Chamber to purge and burn off-

Page: 414

 show me what **currents** get mucked up where, and where it turns them in

Page: 423

 Now that those **currents** are going down into Earth core, there's going to be

Page: 425

 part of that **currents** will go upward and part will go all the way
 naturally as those **currents** circulate back up through. We have begun the process of

Page: 454

 to create spark **currents**. So, you can look at this in terms of the

Page: 459

 directly the Urtha **currents**, the Urtha Allurean Chambers into Earth's Allurean Chambers. And
because

 we have these **currents** that are activating, we have the Krystal River current that

Page: 37

 would be the **currents** that run this way on the horizontal. Then our Staff

Page: 38

 run the Kristiac **currents**; that they haven't taken the shield out yet. At this

Page: 41

 have the strongest **currents**, so they are ones, the Aquari line comes from, and

Page: 44

 open those core **currents** into the body, in their natural order, the way they

Page: 45

 **currents** that come from what is called the Eye of God,

 primal life force **currents** that we live on, that everything is manifest on, not

Page: 47

 to create the **currents** upon which matter as we know it is formed Next

Page: 49

 domains, all those **currents** are shut off There is no more turnaround. At that

Page: 50

 don't need those **currents** in that way yet It breaks down to form something

Page: 51

 in the inner **currents** into the outer domains to keep that stream of consciousness

Page: 52

 back the spiritual **currents** in to heal the rest of the light body and

Page: 55

 carry the EirA **currents** They create what are spheres known as the Alon, KAion,

 do with generating **currents** in the Rasha bodies, but also how it comes through

Page: 57

 They are the **currents** that we need to activate, in order to keep our

Page: 59

 run the core **currents** all the way through from the core all the way

Page: 60

 this. The Kundalini **currents** are the outer domain currents that connect into these, but

 the outer domain **currents** that connect into these, but these are the real first

 real first creation **currents** Next one, please Graph [OVD-R 1sat-31253800} I'm

Page: 61

 arrangements, when the **currents** step out further through the Big Bang. So, it is

Page: 63

 sorts of different **currents** that go with each one of those, like etheric, ketheric,

 far as the **currents** coming out from Source? All of these little particles and

Page: 64

 working with these **currents**, and you make connection through the journeys with ... and

Page: 70

 open up the **currents**, the Rash aLAe body will turn on the currents coming

 turn on the **currents** coming in itself, of the RashaLEa and then the Rashallah

 those core creation **currents** open up and open what's called an Eiron stream from

Page: 75

 the Krystal River **currents** on the Aqualene Sun activations of the Rasha bodies to

Page: 95

 and reversing the **currents** in them and using them to sustain the NETs so

Page: 112

 lots of different **currents** that come through when you activate them in the bodies,

 the Neon Aurora **Currents**. (chuckles) I mean we've been bringing currents in all

 we've been bringing **currents** in all over the place. These are not just currents

 are not just **currents** for the Outer Domains, not just currents for the Middle,

 Domains, not just **currents** for the Middle, the Inner or even the Core Domains.

 These are the **currents** that exist beyond the Creation Point Door, the first Creation

 and bring the **currents** all the way up from the RaSh a to the

 that allows the **currents** that we've been running on the etheric levels and on

Page: 120

 to open the **currents** progressively ... and it's really neat what those currents do

 neat what those **currents** do once they're opened. So, once we see what they

Page: 127

 will be beautiful **currents** flowing through in those configurations. Running through, that will be

Page: 136

 certain level of **currents** that comes through the LaVa at its core, that will

Page: 139

 means it's making **currents** and sparks ... it's making Love (chuckles), right, making

Page: 141

 on the Kristiac **currents**, instead of using the reverse light currents just to hop

 the reverse light **currents** just to hop around in Space-Time, you can go

 (graph) Ooh, **currents** are coming in, ow. You know, when the currents come

 know, when the **currents** come in, the spine ones, I, I've been feeling lately

Page: 146

 to use the **currents** and how to begin chakra healing with them and those

 directly with the **currents** that are opening from the Core Flows. So once the
 open as Eiron **currents** within the different layers of the Auric fields, within the

Page: 162

 be a, 2 **currents** of LaVa sent out from the eyes. It will be

Page: 192

 it on Krist **currents** And it is already going on the natural organic spin,

Page: 211

 on the natural **currents** of the Kristiac cycles, but you just won't have your

Page: 232

 body structure that **currents** that were generated from here, actually begin to accrete and

Page: 239

 types of different **currents** have, so when key resolution happens, those keys go into

 the main primal **currents** that everything else is built on and they all started

Page: 240

 them and also **currents**, all right? Where if you have, I'll use, as an

 those become spark **currents** that begin the flow of the krystal spiral and become

 base for the **currents** that later come out and form the electromagnetic waves all

 do with the **currents** that are spiraling out from the center that we'll look

 progressive expansion of **currents** coming out, of spark pulse currents coming out These are,

 of spark pulse **currents** coming out These are, everytime a replica happens, the ones

 where the core **currents** start to flow out of and it, the Rosetta and

 that keep the **currents** The MCEO Freedom Teachings® Series Presented by Adashi MCEO

Page: 243

 the extra replica **currents** of the light body currents, because it will, the light

 the light body **currents**, because it will, the light body, starting with the Tauren,

 where the first **currents** start and we're still dealing with the Tauren and how

 continues to make **currents** Replicas that then break down into currents that come outward,

 break down into **currents** that come outward, and it also creates counter spiraling currents

 creates counter spiraling **currents** that come back in that will allow for return. That's

 get Eckashi outward **currents** that form the Eckashi cycles and then the Adashi turn

 ride the other **currents** coming back in clockwise. So, the ones coming out, come

Page: 244

 shows how these **currents** split when it keeps going into expansion. The next set

 in to Source **currents**, and once all of those pick up a large cycle

 you have those **currents** forming, the currents from the krystal spirals coming together meeting

 currents forming, the **currents** from the krystal spirals coming together meeting They also activate

Page: 245

 flow of spark **currents** back outward feeding the Krystal Spiral. And I do believe

 winds form the **currents** of the inner, the core and the inner flames. This

 probably carries the **currents** of one of those domains is how I think that

Page: 248

 allow for the **currents** that come out to form the light body that goes

 connect with the **currents** that go back to the seed atom and back to

Page: 250

 pumping of the **currents** like the pumping of the blood. The MCEO Freedom Teachings

Page: 251

 allows all those **currents** that are happening behind this level in the Tauren, all

Page: 258

 be taking the **currents** that come from here out into the outer light body

Page: 264

 Fields of energy **currents** going counter clock wise. So in between each, in between

Page: 265

 continually generating Spark **Currents**. These are what generate the Spark Currents that will accrete

 generate the Spark **Currents** that will accrete or come together, those Sparks will start

Page: 270

 on Sets of **Currents** as well, coming in from each level, as you go

Page: 278

 through the central **currents** to the structure known as the Eye of God, that

Page: 286

 God and the **currents** that flow through the Allurea. So, the first Eye of

Page: 288

 of those particular **currents** So, what they're doing is actually opening these set of
 set of core **currents**, that are all the way back in the first, behind
 up all these **currents** so you, this is the first 7 currents You have
 the first 7 **currents** You have the first 7 currents that go with the
 the first 7 **currents** that go with the first 7 replications of the Cou
 those core Cousha **currents** that creates the rapid activation of the entire RashaLAe body.
 all of these **currents** turned on from the Cousha all the way up through

Page: 290

 bodies, where those **currents** start to open and from that point we will be

Page: 292

 do with the **currents** that are running as well, so we'll get into a

Page: 300

 showing, without the **currents** showing, that are spiraling from each of the chambers. It
 nerve carries the **currents**, just like the currents come through from the center and
 just like the **currents** come through from the center and there is the main
 and builds the **currents** as they're coming out into the light body, or the

Page: 303

 are circulating split **currents** from the hibernation zone here, because what they've done is

Page: 331

 the Core LaVa **Currents**. And they are the first seven Core Currents that come
 first seven Core **Currents** that come out into manifestation from the Spirit Body. So

Page: 332

 with the Antakharana **currents** and running the primal life force currents, and all of
 primal life force **currents**, and all of that kind of thing. Well, this ...
 of those natural **currents** of regeneration and rejuvenation can't come into the body. When

Page: 337

 different Backflow Return **Currents** that form the three outer, what are called the Ena

Page: 338

 literally opening the **currents** from all of the Domains that you have passed through

Page: 347

 literally the spiraling **currents** that will come out through those cells. You could put

 would be the **currents** coming out of them These would be the clockwise ones

Page: 348

 us the Base **Currents**, the Light Body Currents that come out and make the

 the Light Body **Currents** that come out and make the Primal Life Force Currents

 Primal Life Force **Currents** in the Light Body and the Atomic Body structure And

 And there's other **currents** that before any of this happens, take place in that

 actually be the **currents** from the Core Cycle coming out into the Inner Domains.

 these things, these **currents** to open in our bodies. But at this point, the

 to open those **currents** in the body. Those Light Body currents that have to

 Those Light Body **currents** that have to do with the Light Body Domains going

 what the Core **Currents** coming the deeper Core Currents coming from the Spirit Body-will

 coming the deeper Core **Currents** coming from the Spirit Body-will ride through. So it

 the Spirit Body **Currents** it would probably blow you up, because literally you don't

 the Spirit Body **currents** are. So it's a progression of opening the currents and

 of opening the **currents** and finally we've gotten all the way back to where

 can open the **Currents** of the Spirit Body, as well as Light Body Currents.

 as Light Body **Currents**. Next one please. [Graph] [Sat2 00 24 51]

Page: 356

 of the Core **Currents** from the Spirit Body to just move naturally through. Usually

Page: 365

 types of matter **currents** within and between them. When we look at the Vertical

Page: 367

 and release spark **currents** So it's all a breathing, it's a living breathing Manifest

Page: 373

 the natural vertical **currents** that are coming through, that phase, that still phase and

 in the matter **currents** from up here, from Adashi-1. When we get to

Page: 375

- the ManA base **currents** coming out into manifestation, and the other one would be
 - with those deeper **currents** are starting to open and they have to do with
-

Page: 376

- CVC- all these **currents** turning on around it, so it actually expands out to
-

Page: 378

- which set of **currents** you are trying to bring in from which body, be
 - actually bring the **currents** in, the flows from that particular you know, specific area
-

Page: 385

- are the spark **currents** that come out from the 1st Partikl. Meanwhile, those coming
-

Page: 386

- probably ManA based **currents** going CW positive charge outward this way and EirA negative
 - EirA negative charge **currents** of the Spirit Body going this way. But there is
 - lots of different **currents** as we've seen. There is 15 different states of matter
 - different types of **currents** So what we get out of this by the time
 - set of Core **Currents**, of 7 Core Currents that become very important But what
 - of 7 Core **Currents** that become very important But what is fascinating about this,
-

Page: 388

- units become spark **currents** that amplify and cycle and as far as numbers go,
-

Page: 390

- a set of **currents**, or flows, which are Core Flow energies that are literally
 - allows for the **currents** from these areas of anatomy to come into the bodies
-

Page: 391

- always open and **currents** are always moving back and forth And these 2 blink
-

Page: 393

- Body level--those **currents** step out through the process of Spirit Body and Light
- the Dark Matter **currents** These were the Aurora currents, remember we talked about- I
- were the Aurora **currents**, remember we talked about- I don't know some of you
- the Aurora neon **currents** and the Ultras. The Ultra currents have their opposite frequency
- Ultras. The Ultra **currents** have their opposite frequency as the stream running inside of
- with the Heliotalic **currents** you know, before that And then from there come out

Page: 396

 of the Hara **currents** And eventually we end up with our Hara line that

Page: 399

 so these Core **Currents** are not accessible to a body that is born here.

Page: 401

 have the ManA **Currents**, projecting forward, that is considered "front" for whichever set

 literally manifest the **currents** that form the different Domains. From here, they're probably going

Page: 402

 instead of running **currents** back and forth like we're supposed to through that E-

Page: 413

 here, where our **currents** aren't flowing out of that Domain, when it's working naturally

Page: 414

 imprint and the **currents** in from the Edonic level. And then 1 would be

Page: 415

 on-line, the **currents** from the Edons, from where you came from, all right

Page: 419

 where the manifesting **currents** would come through. And that's where the Spirit manifesting currents

 the Spirit manifesting **currents** would come through, going in the opposite direction all right.

Page: 421

 have the Manifest **Currents** moving forward and the Spirit Currents moving back from that

 and the Spirit **Currents** moving back from that Center Creation Point, where the Cousha

 EirA frequencies or **currents**, going out backwards. What you also have is a set

 amount the Spirit **currents** are EirA 11 and 2/3rds negative charge ... pulls

Page: 422

 So the EirA **currents** go back to the first transduction point, all right, that's

 right. And these **currents** up here, which are called the Ma-Ta currents, they

 the Ma-Ta **currents**, they have ... if you take the 21 and 2/

 called the Eira **currents**, that are 11 and 2/3rds, but with a positive

 manifests, and the **currents** are going this way, facing that way. The displaced Spirit

 energy. The Mana **currents** go out, when the Mana currents split, this part of
 when the Mana **currents** split, this part of the split Mana currents comes back
 the split Mana **currents** comes back in and fills out the hole. And that's
 the little spark **currents** that form the atoms And this is what fills out

Page: 423

 The Spirit body's **currents** are still going that way. This one are the turnaround
 are the turnaround **currents** that came back and it's the embodied Spirit, and this
 with the EirA **currents** going backwards. Each one of these, because each one are

Page: 424

 on the ManA **currents** that are outward- moving And then the ones that are
 negative-charge EirA **currents**, and the displaced EirA currents that become Eira, positive-
charged
 the displaced EirA **currents** that become Eira, positive-charged EirA currents And what they
 positive-charged EirA **currents** And what they form, when they combined, is Eiradons, which
 of the Spirit **currents** in, but then they get trapped in that body. And

Page: 425

 will open the **currents** between the Cousha centers When that is accomplished, we will
 of the natural **currents** of the Eiradonis get to come into the body because
 Eiron flows backflow **currents**, which triggers opening of the Ek outflow currents That begins
 the Ek outflow **currents** That begins this natural flow of transfiguration between the bodies.

Page: 426

 allow for the **currents** of the HarA-Krysta Chamber to purge and burn off-

Page: 427

 show me what **currents** get mucked up where, and where it turns them in

Page: 436

 Now that those **currents** are going down into Earth core, there's going to be

Page: 437

 part of that **currents** will go upward and part will go all the way

Page: 438

 naturally as those **currents** circulate back up through. We have begun the process of

Page: 468

 to create spark **currents** So, you can look at this in terms of the

Page: 473

 directly the Urtha **currents**, the Urtha Allurean Chambers into Earth's Allurean Chambers. And because
