 they distribute their **quantum** and here is ... the harmonic keys themselves you had

 a redistribution of **quantum** between ... I'm not going to go through what that

 redistribution of the **quantum** of the two keys base tone and the over tone,

 tone key a **quantum** equal to that of the base tone. Now the base

 3 positive charge **quantum** base. It loses $1\frac{2}{3}$ positive quantum and gives

 $\frac{2}{3}$ positive **quantum** and gives it to the base tone, and that leaves

 $\frac{2}{3}$ positive **quantum**, as is called the kasha key, and down here you

 these key cycles **quantum** is built. It is built and stored in the form

 differences charge and **quantum** holding. The keys go under resolution, and that's where prana

Page: 40

 that once a **quantum** is built up through key generation, through spark generation that
 get a certain **quantum** built, where the keys go under resolution, they store for

 work is very **scientificquantum** mechanics. We teach you of Partiki, Partika and Particum-the

Page: 56

 the expansion of **quantum** by sparking, backflow and Backflow Return from 1 point, the

Page: 58

 part of the **quantum** that was formed here in the Triad Cycle. Part of

 Part of that **quantum** ends up forming a sphere, a spherical crystal that"s called

Page: 60

 sparking and generating **quantum**, but also, this is the point where the Eukatharaista Body

Page: 62

 some of the **quantum** physics stuff? First you have to have three different language

 the process of **quantum** Copyright A"shavana & A"hzavana Deane, 2007, All Rights Reserved; Part

Page: 63

 The process of **quantum** building has to do with each one of these little

 are literally the **quantum** building ... through what is called a Harmonic Key Cycle,

 means there"s enough **quantum** in the manifest side of creation that it triggers open

 but with a **quantum** replica. So the quantum gets doubled and first gets doubled

 replica. So the **quantum** gets doubled and first gets doubled and doubled and doubled

 is how the **quantum** is built between the flow and the backflow. The sparks

 replication of the **quantum** that was given plus the original quantum. So, there is

 plus the original **quantum**. So, there is a process of quantum building that is

 a process of **quantum** building that is done through the process of Harmonic Key

 specific amounts of **quantum** built and therefore, backflow sent back to Source, and

therefore,

Page: 64

-  make a larger **quantum**. And, when the whole thing pulls back into creation point
 -  and generate more **quantum** and it is in this phase, while we're going into
-

Page: 68

-  they make a **quantum** equal. Now, there's a whole set of technicals that go
 -  with how much **quantum** does a Partiki have and how do you measure that
 -  you measure that **quantum** in the 1st place? Comes down to measurements called URs.
 -  of the same **quantum** came through the same place, split that one. The one
 -  same amount of **quantum** that, if you put them back together, that they had,
 -  be the same **quantum** as Partiki 1 because they are Partiki 1 when you
-

Page: 69

-  thus make another **quantum** equivalent to Partiki 1 that is called a spark, and
 -  out an equal **quantum** with the Partiki. So, it sends a Backflow Return Spark
 -  they have different **quantum** and different qualities to them, they are different types of
-

Page: 71

-  because of the **quantum** interactions that take place in the creation point, when that
-

Page: 73

-  has a specific **quantum**. It is made of Partiki 1, Partiki 2 and Spark
 -  have the same **quantum** as a Partiki. So, the quantum that the Cousha holds
 -  Partiki. So, the **quantum** that the Cousha holds is the quantum of 3 Partiki.
 -  holds is the **quantum** of 3 Partiki. Now, Partiki's have specific quantum that can
 -  Partiki's have specific **quantum** that can be broken down into other things like Ur's
-

Page: 74

-  has a specific **quantum** of 3 Partiki and it's centered, its sphere is centered
 -  part of its **quantum** in front of the creation point door and the other
 -  much of their **quantum** is one place or the other. This determines the type,
 -  each with specific **quantum**. Now, let me see if I can read this one,
-

Page: 75

-  core unit of **quantum** ... would be called an Ek. And a positive charge
-  Partiki has a **quantum** of 360 Ek. And so, we have 3 Partiki, so
- 

would be the **quantum** of the Cousha. Now, I'm not going to go through

-  specific relationship between **quantums** that's going to start to happen here. You have a
-  You have a **quantum** of 3 Partiki. 360 Ek is 1 Partiki, so you
-  you how much **quantum** the Cousha has. What they're doing instead is simply saying,
-  that amount of **quantum**-power of 3 Partiki-all right, the electrical power of
-  to watch that **quantum** build, so the Cousha is the quantum that gets replicated
-  Cousha is the **quantum** that gets replicated in what happens next, all right. It
-  is the same **quantum** of 1 Cousha, which is the power of 3 Partiki
-  this is specific **quantum** that are evolving from this, very specified quantum of energy
-  this, very specified **quantums** of energy that can be ultimately measured in Om's of
-  1/3rd of its **quantum** in front of the creation point door and 2/3rds of
-  2/3rds of its **quantum** behind the creation point door so it's formed a different
-  1/3rd of its **quantum**, whatever its quantum is and this particular unit's quantum happens
-  quantum, whatever its **quantum** is and this particular unit's quantum happens to be the
-  this particular unit's **quantum** happens to be the power of 3 Partiki, with 1/3rd
-  on how much **quantum** you have pushing forward from creation point, to how much
-  We have the **quantum** of 3 Partiki-or 3 Partiki power-1/3rd manifest, positive

Page: 76

-  1/3rd of the **quantum** of 3 in front of creation point door, which means
-  units and their **quantum** increase, because each of them at a certain point, because
-  Cousha is the **quantum** that is being replicated and it has the power of
-  right, that's a **quantum** of 6 Partiki power. This one has 2/3rds manifest
-  1/3rd of a **quantum** of 6, right, so that means 4 Partiki power would
-  you'd have a **quantum** of 4 thrust pushing this way and 2 pulling that

Page: 78

-  far as stored **quantum**, that is quantum that is stored in things. (A'sha
-  quantum, that is **quantum** that is stored in things. (A'sha speaking to Az.)
-  times 2 Cousha **quantum**, which is 3. We have the 6 Partiki that comes
-  we had a **quantum** of 3 Partiki with 1/3rd in front of creation point
-  1/3rd of a **quantum** of 6 in front of creation point door and 1/3rd
-  pull of a **quantum** of 6. All right, that is what d-2 base
-  3, they've a **quantum** of 9 and 2/3rds of it, all of it,

Page: 79

 the original Cousha **quantum**, 1/2 of it in front of creation point door,
 have Cousha 3 **quantum** here ... I'm not going to read all the quantum
 read all the **quantums** as we go. And remember, this gives you a positive
 rep 4, again **quantum** of 3 times 4, is quantum of 12. So, that
 times 4, is **quantum** of 12. So, that particular Cousha, rep 4, has 12
 4, has 12 **quantum** and it has 2 ... what is it.. .2/3rds
 times 5 equals **quantum** of 15. Quantum of 15 is another one of those
 quantum of 15. **Quantum** of 15 is another one of those that has 1/
 can reach these **quantum** equilibrium balances where you do have equal push and pull.
 has only a **quantum** of 3 with 1/2 and 1/2. This has
 This has a **quantum** of 15 with 1/2 and 1/2, so it's

Page: 80

 times 6 equals **quantum** of 18. 1/3rd of it is manifest, 2/3rds of
 3rds of the **quantum** of 18 equals 15 Partiki power pulling back as Spirit
 of itself as **quantum** in manifest. Now, this one here, this is where it
 in Spirit, total **quantum** of 126 Partiki power. This is called the Heart of

Page: 183

 the process of **quantum** building in the Starborn cycle. Even though we are talking

Page: 185

 of self-generated **quantum** building is set in motion. And with those quantum building,

 And with those **quantum** building, at certain points, there are backflow sparks sent back

 key replication and **quantum** building occurs from the Tauren, up to the process of

 process of building **quantum** enough to where the whole thing flashes off and forms

 and build more **quantum**. That would give you the next level; the seed atom

 Takeyon cycling and **quantum** building ends in what is called the REShaLA or the

Page: 319

 of your own **quantum** in terms of the journey that you're gonna undertake? Both

Page: 324

 that generates Takeyons, **quantum** building cycles, where you get to the point where we

 occur within the **quantum** replication and expansion, after you have the formation of the

Page: 325

 and makes more **quantum**, and then pulses back out again, and that's where you

Page: 326

 they are building **quantum** for their next expansion levels and it creates literally the

Page: 330

 holders of specific **quantums**, first of all. What started out as harmonic keys have

 keys. There's a **quantum** resolution phase that occurs within a Takeyon cycle or key

 part of their **quantum** that is equal to the quantum of the base tone

 equal to the **quantum** of the base tone key. So, if the base tone

 11 2/3 **quantum** and charge, the ManA key, that's 33 1/3, will

 the base tone **quantum** that was taken away from the ManA key. What you

 bit of their **quantum** they go from being ManA to Mana. And that's a

Page: 369

 and make more **quantum** and then go into Source, go into flashpoint and then

Page: 456

 and it builds **quantum** that way alright so it self-generates quantum. It is

 it self-generates **quantum**. It is because there, the 3 Partiki pull into the

 to self generate **quantum**. This is just the Light Seed at this point but

Page: 457

 to where your **quantum** would balance with what we could carry in our own

Page: 43

 means they become **quantum** generators, so they can generate their own quantum. They are
 generate their own **quantum**. They are eternal life systems, where they don't have to

Page: 44

 tells you the **quantums** of each, like what has 33 1/3, what has

Page: 45

 of the x **quantum** that Source gave in the first place to go out

 and they generate **quantum**. There's one spark here, and then it would rotate and

Page: 48

 of sparking, new **quantum** is built up, without having to take anymore quantum from

 to take anymore **quantum** from Source. The PartikE is a quantum generator It has

 PartikE is a **quantum** generator It has the ability to replicate, because of the

 they change their **quantums** around a little bit We went into detail on all

 the sparks building **quantum**, forming what are called harmonic keys, the harmonic keys eventually

 the only two **quantums** given, but from those two quanta, the whole light body

 that allow for **quantum** replication. The keys of E-No-Ka are ones that

 it replicates the **quantum**. There is a point.. The core difference between a Kristiac

 longer, is when **quantum** is generated, at a certain point, enough is generated to

 back with more **quantum**. And not only that, there's also the ability with eternal

Page: 49

 resolution, changing the **quantum** around, balancing their quantum out, basically. This is where we

 around, balancing their **quantum** out, basically. This is where we get all sorts of

 has a certain **quantum**. The base of ManA would be $331/3$, and I'm
 some of its **quantum** to the EirA, a quantum that is equal to the
 the EirA, a **quantum** that is equal to the EirA, so, you have a
 is the same **quantum** of the EirA, but they are both positive. This is
 $21 \frac{2}{3}$ **quantum** of energy. There are whole energy structures that are based

Page: 50

 **quantums**. I hate that stuff, to be honest with you. I
 to give them **quantums** ... there are certain things they already know about playing
 a bit different **quantum**. So, it's all about how much quantum of electrical stored
 about how much **quantum** of electrical stored energy is being held in particles. It
 ... for the **quantum** of energy of work it takes to raise however much
 they build up **quantum** in the PartikE of the Tauren, and then eventually there's
 there's so much **quantum** that all of the keys turn into Takeyons, and it

Page: 52

 even have the **quantum** breakdowns on all of these done yet. We don't really

Page: 53

 these are the **quantum** changes. I believe it amplifies. I think these are larger,

Page: 54

 it takes a **quantum** leap, as far as ... the more of these cells
 the greater the **quantum** in the sparks when they rub, like friction sparks that
 it builds its **quantum**, and at a certain point, it triggers open the original
 sends all that **quantum** back to Source. It didn't just take the original gift
 it takes that **quantum**, replicates it, and sends more back out So, you end
 they generate more **quantum**, that allows for the building of quantum that will allow
 the building of **quantum** that will allow for the next layer out to form,

Page: 55

 have much more **quantum** stored in them. The Alons carry the Joules. And the
 certain point of **quantum** build up of Prana, the Prana Seed itself will phase,
 the natural spiritual **quantum** of energy back into the atomic structure of our bodies,

Page: 56

 activation and the **quantum** building of all of the Rasha body, in order to
 create enough spark **quantum** where the thing called the Prana Seed at the center

Page: 57

 Atom generates its **quantums** and at certain times goes in and opens the flows,

Page: 58

 a 3.888 base **quantum**, and you have a Prana-kei, which is 7.776 base

 is 7.776 base **quantum**. They form gates 14 and 15. Now, these core gates,

Page: 60

 up with spark **quantum**, and they trigger what are called the Orons out here.

 again, a certain **quantum** of energy where you have 33 1/3 base ManA,

 has a bigger **quantum**, and that sets in motion other layers of things that

Page: 61

 is a distinct **quantum**. It is the stuff that is connected to our light

Page: 68

 they build up **quantum** spark, they pull back in, replicate again and come back

Page: 70

 expansion/contraction and **quantum** generation from the outer layer, and once you hit that,

Page: 74

 after is a **quantum** of energy. The biggest quantum they can capture. They are

 energy. The biggest **quantum** they can capture. They are coming from fields that have

Page: 84

 certain level of **quantum** compared to other levels. We'll see more about that tomorrow

Page: 85

 It's about capturing **quantum**. They want energy to fuel what is their great escape.

Page: 108

 __ generates sufficient **quantum** in the SEur Pillars in the Stand so, I don't

Page: 115

 have a certain **quantum** of frequency that had to do with how much energy

 up their entire **quantum**. When you add up the Quantum of the Light Body

 add up the **Quantum** of the Light Body Structure that builds on them, they

Page: 118

 you weighed its **Quantum** Energy, it would either have more Light Side or more

Page: 119

 can make the **Quantum** Leap to go into the Return Cycles, and then manifest

Page: 122

 certain level of **Quantum** Thrust, which is Joule Count, as far as units of
 when traveling through **Quantum** Leaps like that It is a body that is capable
 to make the **Quantum** Leap in Frequency to you know, Joule CounL to be
 that is manufacturing **Quantum**.It is replicating Quantum and that is how the Light
 It is replicating **Quantum** and that is how the Light Quotient is built or
 down all the **Quantum** thingys, but you'll see where that translates into "OM

Page: 123

 in building the **Quantum** Joule Count, when it actually helps to ground you in

Page: 124

 will regain that **Quantum** once we learn how to slide, all right So we're
 allow for enough **quantum** to be generated in the Matter Form, where you can

Page: 125

 to get the **Quantum** into the Hibernation Zones. So thaLwhat they were going to

Page: 127

 these down into **Quantum**. We didn't have time to do that, but they showed
 and Partikl2's **Quantum**. Now Partikl1 and Partikl2 formed the Triad. The Triad did
 Partikl1 and its **Quantum** and Partikl 2 and its Quantum and the 4th Spark
 2 and its **Quantum** and the 4th Spark and its Quantum, pull together and
 Spark and its **Quantum**, pull together and crystallize, all right? The MCEO Freedom Teachings

Page: 128

 we have the **Quantum** of Partikl1, that was an "atmic" ... we'll see
 And these are **quantums** of radiation, ok, quantified radiation. The quantified radiation is actually
 considered the first **quantum**. And that would be called an "Ec," all right.
 the first original **quantum** released that begins the process of Partikl's forming. So an
 call the First **Quantum**. Now, one Partikl has a quantum of 360 Ec, and
 Partikl has a **quantum** of 360 Ec, and that means it is a Full
 we get the **Quantum** Measure of Electrical Force or Thrust going Outward versus Pull

- those has a **Quantum** of 360 Ec, all right Ec, again, Positive Ec is
 - So there"s a **Quantum** that would be here ... I believe that comes out
 - the relationship of **Quantum** Physics to the Science and Art of Spiritual Creation, because
-

Page: 129

- are just little **quantums**. I don"t have to go through all those. What"s important
 - actually ... the **Quantum** pops open the Creation Point Door again, allowing for this
 - when those little **quantums** of radiation come together, they crystallize. So the original parLthe
-

Page: 130

- Cycle that enough **Quantum** is built where this occurs from the Inner Domain. Let"s
 - 4, that"s 3 **quantum** of 360 Ec each, all right. So you have a quantum
 - you have a **quantum** here of 3 times the 360. I"m not gonna go into
 - rather than the **quantums** involved right now. You can see the quantum expanding because
 - can see the **quantum** expanding because of the size of them increasing. What"s important
 - you get a **quantum** differential of 2, which would be the Materialization Force ... how
 - much Force Thrust **Quantum** was available for Materialization. There is another part of this
 - that creates one **quantum**. Now a series of interactions inside of it take place
 - Partikl is a **Quantum** of 360 Ec, all right That would imply that if you
-

Page: 131

- whole set of **Quantum** Calculations that go with this. The Expansion I want you
- 3 unit or **quantum** of energy. They start interacting with each other and they
- specific amount of **Quantum** just like the Partikl and the Sparks do. Each of
- has a 360 **Quantum**, the Eiron has um ... let"s see, what is its
- what is its **quantum** number ... it"s got 60 Positive OM"s and Negative 60
- what its Base **Quantum** is, all right. Then you need to know how much
- showed me the **Quantums** by showing me what size expansions to use, using spheres.
- of 3. The **Quantum** of the Eiron that pops through from the Creation Point
- of the stored **quantum** of the Eiron, all right. So this is where the
- it"s a little **quantum** of energy first. .. it pops out the center and
- little bit of **quantum**, equal to a 1/3 of a Partikl that came
- still had the **quantum** of 3 Partikl ... now if you notice, this was the
- 2 of its **quantum** out in manifestation on the outside of the Creation Point
- Replication of that **quantum**, when that crystallized and pulled in, it replicated the quantum
- it replicated the **quantum** from the Source Field behind it and it came back

-  3 of its **quantum**, whatever that quantum was, on the other side of Creation
-  quantum, whatever that **quantum** was, on the other side of Creation Point Door in
-  point where those **quantum** interact with each other and again pull through the Creation
-  itself There's a **quantum** equilibrium balance that is established by what's on the manifest
-  have whatever its **Quantum** is, it will have the 2/3 of itself on
-  of the original **quantum**, and you know it has 1/3 out Replica 2
-  was the original **quantum** times 2, gives you the Power of 6 Partikl. ..
-  all of its **quantum** is actually out on the manifest side of Creation Point

-  bigger **quantum** but it has 2/3 of itself in manifestation and
-  there is more **quantum** going over into the Spirit Side. This is the part
-  to get some **Quantum** that might have something to do with the 15 Rings

-  Sparking and generating **Quantum** within itself So the Fields that are generated, the first
-  but split their **quantum** and polarize into an Expanding and Contracting Set, 2 Sets
-  allows for more **quantum** generation. What is also interesting is that is the original?
-  ... they build **quantum** and come back out and do a replica, just a
-  because of the **quantum** they hold and the polarity it has, they move together,
-  2 Partikl as **quantum** plus the 4th Spark and then that little bit of
-  1/3 Partikl **quantum** that came through as the Eiron. The MCEO Freedom Teachings

-  all that extra **Quantum** of Energy that you're gonna need to be able to
-  part of our **quantum** and our Consciousness is, that we need to join with
-  and from that **quantum** in merging the Spiritual Bodies with the Atomic Bodies, that
-  equilibrium balance of **quantum**, begins to form The MCEO Freedom Teachings® Series Presented

-  3 sets of **quantum** that work together and all the math that we've ever
-  we do those **quantum** break-downs. It would all appear in here and you'd
-  polarity-wise. Their **quantum** and their charge are messed up because of the matter
-  it's a quantified **quantum** at that point. So at that point, expansion can occur

 a place of **quantum** potential compromise, where if there was too much force this
 the point of **quantum** equilibrium. And this is also the point where these things,

Page: 138

 2 times the **quantum** of the original, right and it was 2/3 out
 cycles that enough **quantum** is actually sent back where the entire thing opens these

Page: 141

 As a collective **quantum** it is considered 1/3 out (CD13, Track 3)

Page: 142

 phase and generate **quantum** and quantum joules, all right But they also make these
 generate quantum and **quantum** joules, all right But they also make these ... and

Page: 143

 to have enough **Quantum** Thrust or Joule Thrust to be able to go into

Page: 158

 It is a **quantum** of LaVa, a quantum of love LaVa is very, very
 of LaVa, a **quantum** of love LaVa is very, very powerful stuff You don't

Page: 159

 that that LaVa **quantum** has broken itself into 12 Fire Lines and is now

Page: 161

 that the original **quantum** of LaVa that was given to you kinda squirts out

Page: 167

 you know as **quantum**, into the Hibernation Zones. If they were able to do

Page: 204

 Takeyon cycle whatever **quantum** has been generated by the Tauren forming Keys, which are
 generating its own **quantum**, additional quantum, just with the quantum that were given by
 own quantum, additional **quantum**, just with the quantum that were given by Source. And
 just with the **quantums** that were given by Source. And each time it finishes
 that progressively build **quantum** and allow for the replication and quantum building. That is
 the replication and **quantum** building. That is the difference between an Eternal Life System

 this process of **quantum** resolution that, key resolution, that breaks down the 33 1/
 3rds of its **quantum**, an equal amount, to the 11 2/3rds basetone, so
 is called the **quantum** equilibrium key, and that bonds with this to form, eventually

Page: 239

 get through into **quantum** resolution there are a million more steps by the way
 forming, going into **quantum** resolution of the keys. There's still harmonic keys. There are
 spark generation builds **quantum** and progressively that quantum builds, first there's sparks
and they
 and progressively that **quantum** builds, first there's sparks and they go to harmonic keys,
 certain point of **quantum** generation of the takeyons, they all pull together and there's
 and there's enough **quantum** there to actually pop open creation point door and they
 door, replicate the **quantum** and come back out replicated. And this is the process
 reached a certain **quantum** after the keys build up to form the takeyons, reach
 reach a certain **quantum** that's when the flash point happens. When they actually flash
 because there's enough **quantum** generated to stimulate it opening It opens and the whole
 and then this **quantum** did that and this one over here and that one

Page: 240

 process by which **quantums** progressively build up. They not only form the light body
 as numbers and **quantum** distribution and types of energy or radiation are formed here.
 to build enough **quantum** and to bring in the quantum from the other parts
 bring in the **quantum** from the other parts of yourself in the other space

Page: 241

 it builds more **quantum** because it's bigger now. It has 6 Partiki so as
 cycle which generates **quantum** and reaches a certain point called takeyon flash point, pulls
 replication of that **quantum**, then it births back out as the next larger set
 a very specific **quantum** of Eck or Ohms. I believe an ohm is a
 that point enough **quantum** is being generated by the sparking that you have a

Page: 242

 there's this whole **quantum**-building thing, and it creates- these are spheres within spheres
 of energy and **quantum** as they go. But, what you would see here if

Page: 243

 that once that **quantum** is reached in one form of manifest form, the others
 keep building more **quantum**. So, what it does is, it begins the out flow
 of its own **quantum** to build the light body cells. Those light body cells,

Page: 244

 flame cycle where **quantum** that has been stored in those krystals I mentioned before
 of spark and **quantum** generation that have to do with the expansion and contraction

Page: 245

 sparking reaches a **quantum** where it will pop back into Source and then just

Page: 246

 each other, building **quantum** by doing that. They hit a certain point where they

Page: 247

 these stages of **quantum** building, going back to Source, coming back, replicating, more quantum
 back, replicating, more **quantum** being generated. This is what an eternal life system does,

Page: 248

 together and make **quantum** and build quantum. And when that pulls into center, it
 quantum and build **quantum**. And when that pulls into center, it bursts back out,
 involved and the **quantum**'s that are involved. So, I'm pretty sure this is the

Page: 250

 3rds of its **quantum** goes to the Prana-Kei and 1/3rd goes to
 process of building **quantum** in the body and building light quotient where the RaSha
 building and storing **quantum** and that will cause accretion of sparks in the outer
 build and store **quantum** as joules in the outer light body structure, and at

Page: 251

 the generation of **quantum** outside here, that builds up enough to where it makes
 allows what the **quantum** that was built to go back to Source, and then

Page: 252

 that has a **quantum** of 7.776 all right This one is the Prana-Chi

 negative charge has **quantum** of 3.888, right You put them together it gives you the

Page: 253

 give it any **quantum**? Yea, 11 2/3rds negative times 12, OK, so that

 has a bigger **quantum**. They didn't tell me a lot about the Eira other

Page: 255

 the first core **quantum** or the first, you could say it's the type of

Page: 256

 they build up **quantum** to the point where another pull back into Source happens,

Page: 258

 and replicate its **quantum** and bring out the next expansion. And the next expansion

Page: 264

 and builds Its **quantum** from interacting with Itself, it pulls back in and it

Page: 266

 before phases, builds **quantum**, pops in and replicates, comes back bigger and that creates

Page: 270

 a lot of **quantum** to make. You need to open the, the Prana Seeds

 them all with **quantum**. So what we are in the process of doing is

Page: 271

 all of the **Quantum**'s, you have to analyze how Many of those Quantum's there

 Many of those **Quantum**'s there are to get the Total Quantum. Then you have

 get the Total **Quantum**. Then you have to take whatever the whole Quantum is,

 whatever the whole **Quantum** is, divide it by much 2/3rds is out, 2/

Page: 276

 don't have enough **Quantum**, there's not enough Thrust in your field from the amplification

Page: 279

 back the original **quantum** as a back flow return spark, and that's where we

Page: 280

 giving me the **quantums** and everything on it was enough to make me insane.
 of really wacky **quantum** replications occur. Big spark happens and everything pulls back into
 several stages of **quantum** swapping on the other side of the door culminates in
 each with their **quantum** of one Partiki, right, and we'll get into that in
 also has a **quantum** of one Partiki, because when you split either one of
 know, like the **quantums** split, and when you put them back together and they
 they make the **quantum** of one Partiki again So, you have now a quantum
 have now a **quantum** of 3 Partiki. You have Partiki one original, Partiki two original

Page: 281

 contractions, expansions and **quantum** replications. So, when we get into to the first thing
 we've got the **quantum** of three Partiki, and the quantum of one third of
 Partiki, and the **quantum** of one third of a Partiki is the UM flame
 know, divine variable **quantum**. They call it variable, because the UM flame sometimes pulls
 krystal. Now, the **quantums**, I'm not going to get heavily into these quantum, I
 heavily into these **quantums**, I just want to show you something that occurs with
 understanding the first **quantums**. Up here we have one Partiki, so the energy content
 one Partiki, the **quantum** it holds, is equal to 360 what are called Eck.
 like an Eck **quantum** that has a charge that is positive it isn't an
 So, the first **quantum** differentiation word to define a quantum, would be an Eck.
 to define a **quantum**, would be an Eck. Now, it gets, and some of

Page: 282

 you have a **quantum** of 360, which is a full spherical circulation it's considered
 increments of measuring **quantum** from Source, things become expressed in the power of
how
 heavyduty information with **quantum** stuff on there that told us about encryption in the
 Y, of its **quantum** in manifest and Y, of its quantum in Spirit Its quantum
 and Y, of its **quantum** in Spirit Its quantum is 3 Partiki so 360, a
 in Spirit Its **quantum** is 3 Partiki so 360, a quantum of 360 Eck times
 so 360, a **quantum** of 360 Eck times 3 plus the 1/3rd gives you
 gives you the **quantum**, and you're just doing it without the, when we're doing
 the 3, the **quantum** of the 3 Partiki. It's in this that begins the
 Cousha becomes the **quantum** that gets replicated, so that is the original quantum. The
 is the original **quantum**. The first replication of the Cousha, the first contraction and

Page: 283

 Partiki is its **quantum**, so that it would have the power of 3. Now
 Now of that **quantum** of 3, 1/3rd of it is out in manifestation
 at it, the **quantum** of 3, its total quantum is 3, 1/3rd of 3 is
 of 3, its total **quantum** is 3, 1/3rd of 3 is out in manifestation, 2/
 Partiki, that's its **quantum**. You have 1 /3rd of it, 1 /3rd
 have this much **quantum** pushing or thrusting this way, and you have that much
 have that much **quantum** pulling that way, so if you subtract the thrust, if
 get to a **quantum** set, and I don't know where that is yet, where
 they are specified **quantums** or quanta of energy and it would be a subtraction,
 is the Cousha **quantum**. So you have Cousha rep one is a times one
 Partiki as its **quantum** and one third of its out in manifestation, 2/3rds
 of whatever its **quantum** would be. The MCEO Freedom Teachings® Series Presented by

Page: 284

 Cousha, the original **quantum**, goes through a times 2 replication on the second contraction
 which is the **quantum** of one Cousha times 2 equals quantum of 6. Now,
 times 2 equals **quantum** of 6. Now, this one is the quantum of 6
 one is the **quantum** of 6 and its got 2/3rds of itself out
 of how the **quantums** work, it doesn't matter right now what they are but
 2/3rds of **quantum** 6, 1/3rd of quantum 6 in Spirit. The next
 1/3rd of **quantum** 6 in Spirit. The next one is a times 3
 the original. Cousha **quantum** gets replicated times 3, which means the quantum of 3
 which means the **quantum** of 3 Partiki times three gives you a quantum of
 gives you a **quantum** of 9 This one, or one Ecousha times 3 is
 3 is a **quantum** of 9 You have 9 quantum; you have 3/3rds
 You have 9 **quantum**; you have 3/3rds or all of it out in
 times 4 equals **quantum** of 12 so its one Cousha quantum times 4 is
 its one Cousha **quantum** times 4 is quantum of 12. Quantum of 12 with
 times 4 is **quantum** of 12. Quantum of 12 with 2/3rds manifest and
 quantum of 12. **Quantum** of 12 with 2/3rds manifest and 1/3rd in
 different number of **quantum** number or number of Ohms to a number of Yans,
 the core content, **quantum** content, that is on the Spirit side, and the Ohms
 times 5 equals **quantum** of 15. Quantum of 15 with half out and half
 quantum of 15. **Quantum** of 15 with half out and half in so, that
 that gives a **quantum** of 7.5 Partiki power out in manifestation, and 7.5 Partiki

 have half the **quantum** out and half the quantum in, so there's no differential

 and half the **quantum** in, so there's no differential between them. There's no resistance

Page: 285

 a rep 5 **quantum** of 15, Y, manifest and Y, in Spirit. Next one. [

 6, gives you **quantum** of 18. Quantum of 18 with 1/6th of it

 quantum of 18. **Quantum** of 18 with 1/6th of it manifest and 5/

 on a 3 **quantum**, so 3 times 7 would be 21 manifest quantum, and

 be 21 manifest **quantum**, and then you'd have 15 times 7 gives you I

 believe, 105 manifest **quantum**, or not manifest quantum, on the Spirit side. So, this

 or not manifest **quantum**, on the Spirit side. So, this gives you the 21

Page: 287

 is the original **quantum**, and that one would be half-and-half Half in

 size and same **quantum** of it, but its only 1/3rd in manifest and

 it from the **quantum** expansion and then taking that size and how much of

Page: 288

 that third extra **quantum** and then turns back in and takes that away, and

 other than distribute **quantum**, and do things in relation to keeping the balances, the

 balances, of how **quantum** works going between the door between Spirit and manifest So,

Page: 294

 to generate enough **quantum**, where as a group and with the assistance of the

 to have enough **quantum** to make this leap. Because, we are going to have

Page: 299

 characteristic to the **quantum**, and stuff that we talked about briefly, that each one

Page: 330

 we're doing a **quantum** leap here because we're-after the two sets of classes

Page: 335

 but that requires **quantum** building. It requires what's called Thrust or Light Quotient, or

Page: 338

 through phasing and **quantum** building and sparking and Backflow and Backflow Return until it

 you build enough **quantum** by literally opening the currents from all of the Domains

 to build the **quantum** thrust that will allow you to go into the higher

Page: 339

 that allows for **quantum** Backflow Return, that makes more sparks. So they continually generate

 the building of **quantum** in the Rasha bodies that allows for the building of
 the building of **quantum** in the Light Bodies. We've heard about Mana here and
 through something called **Quantum** Resolution. And this is where what is ManA, that has
 Key Resolution or **Quantum** Resolution. Once sparks are made, and sparks accrete to form
 Keys redistribute their **quantum** for storage Until they can store up, more sparking happens,
 that store in **Quantum** Resolution, in distributing their quantum in specific ways. And this
 in distributing their **quantum** in specific ways. And this is where we get the

 Quantum Generation and **Quantum** Replication and Quantum Building. So it started there. We're going
 Quantum Replication and **Quantum** Building. So it started there. We're going to see by
 Tauren, progressively expands **quantum** and size, and grows to become what is called the
 proportions, very specific **quantum** of energy each time and that gives you a very
 under resolution of **quantum** and hold and store, until there's more sparks made and
 when there's enough **quantum**, where the Takeyon triggers the opening of the Creation Point

 build up enough **quantum** and then they pull all the way in with the

Page: 360

 exact proportions of **quantum** expressed in the power of x many Partikl because Partikl

have a specific **quantum** of energy and the smallest energy unit is known as

 as how much **quantum** that particular thing carries. So as these come down, these

Page: 364

 Ho Cell build **quantum** and at certain points the Prana Seed phases and pulls

 a replicate of **quantum** and the next thing it births out is a times

Page: 367

 they build enough **quantum** and they do a pop-off and pop-back-on

 on with a **quantum** replica. And what they create next- and remember there are

 and they generate **quantum** and spark and pulse, because all of these things pulse,

 and do their **quantum** leap thing, where they pull into the Creation Point, pop

Page: 368

 phase and generate **quantum** and they pop out and they create what are the

Page: 371

 the cycles are **quantum** building cycles. And each time you build more quantum, it

 you build more **quantum**, it fills out more frequency in the template until you

momentarily
 it allows the **quantum** to come in that way, that is how it does
 how it does **quantum** replication and what it does the next time is, comes

Page: 396

 1 back-flow **quantum**. Cause it sent back ... that was the original that
 it did that **quantum** was replicated as a back-flow return from Source. The

Page: 397

 return, a replica **quantum** of the Amour A Spark. So this one was the
 return to that **quantum**. The back-flow return forms what is called the Mahara

Page: 398

 Ring with the **quantum** of one Shaion or carrier of EirA energy, right So
 like Eks, a **quantum**. Remember an Ek is the first quantum. So they're Yon-
 is the first **quantum**. So they're Yon-Eks, that is a Yon-Ek which

Page: 399

 forever, stays alive **quantum** of energy that allows movement of energy between the Spirit

Page: 400

 that original, smaller **quantum**. This is an "Ek"-cousha, because this Field here,

 for phasing and **quantum** building between the Mahata-ReishA ... this was that replica

Page: 402

 back by the **quantum** that's going Spirit and stored over here somewhere as a

 it has more **quantum** when it does this. So from phasing of the 1st

Page: 409

 you with a **quantum** of 10. This is where we get a base-1

 When the Prana **quantum**, 11 and 2/3rds positive, comes into the EirA Spirit

 displacement, where that **quantum** coming in ... of joules coming in ... pushes backward,

 pushes backward, a **quantum** of energy, of equal amount. And that's called ... the

 and form a **quantum** of 23 and a 1/3rd and they form a

 has the 10 **quantum**, the Ma-Ta, comes back here to the transfiguration point

 let"s say 10 **quantum**"s worth manifest as "matter body" and there"s still the

Page: 502

 and they generate **quantum**. So there is a perpetual motion quantum generator for natural
 a perpetual motion **quantum** generator for natural regenesis All that process has to do

Page: 512

 give them enough **quantum** to begin phasing again. So, they won't be able to

Page: 515

 give it enough **quantum** to be able to go into the transmutation. So, you

 Earth 1/6th **quantum** that can be combined with the Median Earth 1/3
 Earth 1/3 **quantum**, and if we can amplify that with the Ad jugate

Page: 132

 about an equal **quantum** of Median Earth frequency, so part of that would fall

Page: 139

 Cousha is a **quantum** of three Partiki. And then the next replication of that
 thirds of their **quantum** in spirit form That means all ManA and no EirA,
 of a specific **quantum**. Half of it would be in the ManA and half
