 the first Adjugate **Site**, which is Adjugate-15, which is the one that connects
 the Ad jugate **site** that this is connected to, that Ruta-15 is connected
 to, the Adjugate **site** is Rocky Point, Mexico. And that's where the group just

 of the Lon **sites** of Span -7, and also into one of the
 is the Adjugate **site** to KAion-7. KAion-7 is Virginia Beach. This is

Page: 96

 connects to these **sites**. These were the Load-Out Gates. That means if the
 the Rocky Point **site**. And before that there was a big attack that was
 done on that **site** in Seeding-2, because these gates are old, these are
 the Shaion-7 **site** because there is a direct interface there. So then once

Page: 97

 is the Colorado **site** that we have. The Ad jugate to that is Adjugate-
 location, its Adjugate **site**, was Sedona, Arizona. But those grids are fallen and they're
 into this relocation **site** of, you know, recalibration of the thing that used to

Page: 98

 was a special **site** that actually had, right-oh, that just came through in
 remember at that **site**, like tonal healing. And I think this is where, if
 are why these **sites** are so important They are the ones that link directly,
 into the Lon **site** of Span-7. And that links into the whole Hub.

Page: 99

 the first Adjugate **Site** runs its power through. So that's what we were dealing

Page: 100

 the other two **sites**. So, we'll see. What the Beloveds want to do is
 to purchase a **site** there. But I don't know where they're going to come
 the AI on **site** in Colorado- that's a lovely house that we don't live
 they want a **site** over there as well. So it's like, well great, more
 special, that this **site** is very special to any of the Aquari humans, especially

Page: 111

 America _____ the **sites** there. And the East Coast isn't much better off when

Page: 128

 Greece is Cue **Site** 7. That is where they ran the Breach. They first
 is the main **site** but there are also a couple of others that run

Page: 130

 the Ad jugate **Site**, which means the AdorA 10 link site to Ruta 15

 AdorA 10 link **site** to Ruta 15 and KAion, which is the Virginia Beach,
 of Virginia Beach **site**. So, there's one strengthening set there. Then we have the
 the St. Kitts **site** is Adjugate 13. 13 is the strongest gate It is

Page: 136

 but on the **opposite** spin. That's not bad. It's just on the opposite spin,
 just on the **opposite** spin, and we balance each other out So, we're on
 same space at **opposite** spin rotation. So, by understanding this simple structure, where we

Page: 143

 made of the **opposite**, which is AdorA. Theirs would be made of the opposite,
 made of the **opposite**, which is ElorA energy. So, it's an amazing creation, but

Page: 166

 "grid, sacred **site** Spanner Interface Networks that can slow the progression of the

Page: 199

 No, it's the **opposite**. You actually get to the point where your gene code

Page: 202

 why the Kitts **site** is so important because it is very important. We also
 hold the Kitts **site** crust level, because there's a difference There's something called a

Page: 215

 are on the **opposite** spin and they are the ones that you have to

Page: 217

 side on the **opposite** spin of our atoms. And we have talked about that

Page: 223

 is the LITERAL **OPPOSITE** MEANING of what the word "Mashayah" means and implies.

Page: 225

 is quite the **opposite**, a joyful message of hope, empowerment and eternal promise, which

Page: 237

 just on the **opposite** spin, but at the same angular rotation of particle spin.

Page: 242

 Body on the **opposite** side. And the ManA Body or the Manifest Body and

Page: 243

 are going on **opposite** spin for the AdorA side. But, each of these Vector

 way on the **opposite** of the Vector Line, so they both move away from

Page: 245

 out in the **opposite** vector So, if you're projecting out this way, your Spirit

 out on the **opposite** vector, it's called the Adjugate Vector, it would be ...

 outward in the **opposite** direction. And, there's a certain point where they kind of

Page: 246

 going on that **opposite** horizon? Or, would it be more Light Body energy, ManA

Page: 248

 that go the **opposite** spin, back, fully into Source. So, what we're doing right

Page: 256

 configuration of different **sites** that link and hold energy, will pull it back and

 know, a major **site** by major site, hold it together. We will do it

 site by major **site**, hold it together. We will do it remote It doesn't

 AdorA and the **opposite** in EtorA. So there's a whole set that go-if

Page: 20

 called the Adjugate **Sites** to the Hub Gates-or to the Alon, ShAion and

 ShAion and KAion **sites** of the Hub Gates. So that's more information we're going

 one on the **opposite** side, on AdorA. We have another set, here. This collective,
