 the big top **spiral** coming down. They are cutting it off here, trying to

 the natural merkaba **spirals** of the planet into reversal. They would force a blend  
 the natural merkaba **spirals** would no longer be at this axis alignment. They'd be  
 2/3 top **spiral** wormholes. These are the ones, after all these were created  
 in the top **spiral**, bottom spiral and middle shield, and little wormhole on the  
 top spiral, bottom **spiral** and middle shield, and little wormhole on the top. That  
 of that particular **spiral**. So, this is a pyramidal vortex rotating this way. This  
 reversing the top **spiral**, that has to do with watching how this planet's merkaba

 they took their **spirals** with them, the 8 spiral pulled through this way, and  
 them, the 8 **spiral** pulled through this way, and the S spiral pulled through  
 and the S **spiral** pulled through this way. So you ended up with still  
 creating the metatronic **spiral**. They were set purposely into the shields of the hijacked  
 forming the top **spiral**. So, over here, this is the AS shield, remember? Over

 from combining merkaba **spirals** in a very creative but very anti-Christiac way that

 2/3 top **spiral** wormholes (reading title from graph). The top spiral wormholes,  
 graph). The top **spiral** wormholes, they would be the ones at the arc 9,  
 in the top **spiral** in the pcm universe, and it was taking energy from  
 the pka bottom **spiral**. Zero point means, you have a wormhole going CCW inside  
 of a larger **spiral** going in the other direction, and it is progressively feeding  
 from the other **spiral**. As the spin ratio of this one and the energy  
 1/3 top **spiral**. That was when the wormhole was started in 25,500 BC.  
 reduced the main **spiral** into 11 4/9 CW rotation. The main spiral that  
 rotation. The main **spiral** that was 22 2/9 CW rotation was reduced to  
 When the top **spiral** of the wormhole and the natural top spiral reached zero  
 the natural top **spiral** reached zero point - they called it zero point before  
 other. The top **spiral** stopped, and when the top spiral stopped spinning, it causes  
 when the top **spiral** stopped spinning, it causes the differential field shield to stop

 relation to the **spirals**, is it breaks the link down the arc axis. It  
 so the two **spirals** separate from it, so they can't blend and come together.  
 reached, the top **spirals** will stop, and then the shield will stop and reverse,  
 a same spin **spiral** set, which is a phaselocked anti-Christiac merkaba, that can  
 when the top **spiral** and wormhole reached critical mass zero point, the Eieyani races  
 and the top **spiral** to fully connect with each other. It stopped them from  
 phaselocked, same spin **spiral** set. We suffered the Eieyani massacre for that, but from  
 and the top **spiral** 11 4/9 CW with this Mahadra Adhrana buffer field  
 frequencies allowed the **spirals** to take enough energy to keep the rotation that they

---

Page: 57

---

 interface through that **spiral**, through the Halls of Amenti gates, into Phantom, to begin  
 immediately the top **spirals** in the pcm universe went into zero point stasis with  
 4/9 top **spiral** CW. So, they stopped. The merkaba top spirals stopped spinning.  
 The merkaba top **spirals** stopped spinning. The bottom spiral continued to spin on its  
 spinning. The bottom **spiral** continued to spin on its usual 7 7/9 CCW.  
 when the top **spirals** did. It stopped and then reversed. Now these stopped and  
 follow the bottom **spiral**. So the shield rotated CCW, when it was supposed to  
 that the bottom **spiral** was going on. That 7 7/9, that is where  
 stopped the top **spirals**, and the shield reversed to the same spin as the

---

Page: 58

---

 into the natural **spiral**, through the Mahadra Adhrana frequency buffer. However, once they  
stopped  
 stopped the top **spirals**, it also stopped the rotation of their vortices, but it  
 make sure the **spirals** continued their process. Once that static NET let go, there's  
 like the bottom **spiral** they would go into a same spin spiral set. Then,  
 a same spin **spiral** set. Then, the 34 vortex over here would accelerate it  
 CCW same spin **spiral** set, and it would be happening over there on the  
 CW same spin **spiral** set. So, they were trying to form two smaller anti-  
 like the bottom **spiral** and the top spiral stopped, it created what's called monadic  
 and the top **spiral** stopped, it created what's called monadic reversal on the planetary  
 of the bottom **spiral**, and you ended up with them all going CCW, and

---

 out. The bottom **spiral** was  $7 \frac{7}{9}$ , with the top spirals immobile, and  
 with the top **spirals** immobile, and a static field. Our bodies have evolved through  
 a set of **spirals** goes into same spin spiral set, and what happens when  
 into same spin **spiral** set, and what happens when it does. What happened to  
 the two top **spirals** that are being held still by a NET static field,  
 in reverse bottom **spiral**, what happens if you take the NET field down. If  
 with the top **spiral** following the same spin direction as the bottom spiral. It's  
 as the bottom **spiral**. It's no longer receiving natural frequency from its own original  
 Phantom. The Phantom **spirals**, that had  $11 \frac{4}{9}$  frequency CCW, joined with the

---

 magnetics. The magnetic **spiral** is going to be the one going through all the  
 When the two **spirals** go into same spin, you have a negative charge on

 and inverted the **spirals**. When the spirals inverted, they shifted - first they went  
 spirals. When the **spirals** inverted, they shifted - first they went into Phantom shift  
 into same spin **spiral** set compaction onto the Solar Cross horizontal axis, and the  
 CCW same spin **spiral** set, and the one over here is the 21 CW  
 CW same spin **spiral** set. What they are going to be doing is fully

 a same spin **spiral** set. One is 34 same spin and one is 21  
 have same spin **spiral** sets and you don't have the natural currents running through  
 55 same spin **spiral** set in the center, that used to be a little  
 21 same spin **spiral** set. But now it's grown to be 55. The two  
 one, etc. It **spirals** these energies together in a closed circuit radiation envelope, and

---

 Grand Cross solar **spirals** will intersect with Earth to activate the Earth grids and

---

 Remember these two **spiral** sets coming together from that. We've explored this a bit

---

 when The top **spiral** and bottom spiral end up on The same spin spiral

 spiral and bottom **spiral** end up on The same spin spiral set. They push  
 The same spin **spiral** set. They push apart, break The staff, and then The  
 and then The **spirals** invert- they come back together to form another merkaba field,

 your natural top **spiral** and that used to be your vertical axis. Well, The  
 and The top **spiral** is actually what becomes The bottom spiral, when you get  
 becomes The bottom **spiral**, when you get that reversal of kathara center two and  
 34 same spin **spiral** set CCW. That would be fused to The other one,  
 in The other **spiral** from The parallel, The 21 CW. And this is where  
 how The two **spirals** came together and through each other to form The capsule

 through the Threshold **Spiral**. So, it"s a big thing we are in the middle

---

Page: 80

 back into Krystal **Spiral**, if the drama hadn"t accelerated this quickly. So, there is

 3 anti-Kristiac **spiral** running, and that is the part that will ... .

 into the ascension **spirals** that will go in through Urtha, or worst case scenario

 The natural Krystal **Spiral** is built on the Kathara grids that are embedded, very

 have a Krystal **Spiral** running out from the core here, and the Diamond Door

 have the Krystal **Spiral** here. If this were large, and you were looking at

 have the Krystal **Spiral** coming out of this little tiny part, spiraling outward with

 little tiny part, **spiraling** outward with various proportional relationships. It also has something to

---

Page: 324

---

 the ones that **spiral** out, and they are a different ratio of expansion than

---

Page: 337

---

 are on the **spiral** that spirals counterclockwise that will take you back into Source,

 the spiral that **spirals** counterclockwise that will take you back into Source, and then

 Source, and then **spiral** you back out if you choose to leave again. If

---

Page: 344

---

 is the Fibonacci **spiral** that a lot of trees and things grow by at

---

Page: 345

---

 into our Threshold **Spiral**. But what is going to happen instead is they are

---

Page: 351

 templates on the **spiraling** of Kathara grids and how they expanded out. So, the

---

Page: 398

---

 the one Krystal **Spiral** ascension path out of here at this point because of

---

Page: 403

---

 ability of Krystal **Spiral** evolution and the first place they need to get out

 are the Krystal **Spiral** frequencies braided together of 3 Eckashas. We have ours, our natural

 difference between Krystal **Spiral** and its proportions and the Fib-of-No-Chi Spiral,

 of-No-Chi **Spiral**, what they call the Fibonacci Spiral. It's the anti-Kristiac

 call the Fibonacci **Spiral**. It's the anti-Kristiac spiral. It is part of the

 the anti-Kristiac **spiral**. It is part of the black hole technology. So, these

 on the Krystal **Spiral**, the natural Kristiac spiral. We'll see a little bit where

 the natural Kristiac **spiral**. We'll see a little bit where that comes from This

 place. The Krystal **Spiral** that we've talked about, you can think of that as

 a simple Krystal **Spiral** from one Eckasha matrix, as the stream of consciousness coming

 have three Krystal **Spirals** from three different Eckashas coming together to create a three

---

Page: 51

---

 This creates this **spiraling** outward of creation, that is created through each one of

 get the Krystal **Spiral** as opposed to the Fib-of-No-Chi Spiral. Chi

 of-No-Chi **Spiral**. Chi is a form of energy. If you take a

 find the Krystal **Spiral**. You'd start at the center zero point, come up here,  
 shape of the **Spiral**, the math of the spiral, and it is a very  
 math of the **spiral**, and it is a very different shape than the fib-  
 of-no-chi **spiral**, and it is the natural Kristiac creation spiral. I don't  
 natural Kristiac creation **spiral**. I don't have the spiral pictures. We went through a  
 don't have the **spiral** pictures. We went through a whole series of graphs to  
 have a Krystal **Spiral** coming out this way. That's the outgoing spiral. Then there  
 That's the outgoing **spiral**. Then there is a reverse counterspin ingoing one that ends

---

Page: 53

 of just the **spiraling** out set of ... following that spiraling graph ... these  
 ... following that **spiraling** graph ... these start to go like this, and they

---

Page: 59

 out on the **spiral** thing; then there is this Prana Exchange cycle that occurs,

---

Page: 67

---

 have a Krystal **Spiral** coming out from the center going clockwise, and it creates  
 creates a counter **spiral** going back in to Source, that would be the Adashi

 to the bottom **spiral**. So when the females in the center are performing their  
 a bottom merkaba **spiral** rotation of 35 and intending that the upper part of  
 lower. The upper **spiral** CW spin speed is 400. The bottom spiral CCW spin  
 400. The bottom **spiral** CCW spin speed is 140, so the (Az says  
 androge. 400 upper **spiral**, 140 bottom spiral. And the corresponding male ManA work the  
 spiral, 140 bottom **spiral**. And the corresponding male ManA work the top spiral only  
 work the top **spiral** only in the way that the females in the inner  
 working the bottom **spiral** only. The same approach pertains to the males and their  
 their top merkaba **spiral** rotating at 400, ok? Now both the ManU and the

---

Page: 118

---

 we're going Krystal **Spiral** and Krystal River and that's what we're training you to

---

Page: 152

---

 there was a **spiraling** current that the Shield caught and you're all moving and  
 all moving and **spiraling** upward very, very quickly up into Earth's atmosphere. And now

---

Page: 162

---

 now enter the **spiral** of Chakra 9 and come from the back of the

---

Page: 165

 combining their Krystal **Spiral**? OK good so I don't have to deal with a

---

Page: 172

 the expansion the **spiraling** expansion, of the krystal spiral, which makes a 45-degree

 of the krystal **spiral**, which makes a 45-degree turn for each of the

 look at the **spiral** without all the spheres on it later. So, this is

---

Page: 240

 of the krystal **spiral** and become the base for the currents that later come

---

Page: 241

---

 we get the **spiral** expansion happening that we'll look at a little bit closer

---

Page: 242

---

 currents that are **spiraling** out from the center that we'll look at briefly in

 all of those **spirals** that you saw the, of the takeyon cycles, ya, I'm

 called the Krystal **Spiral**. The Krystal Spiral would start here at center point And

 Spiral. The Krystal **Spiral** would start here at center point And remember this one

---

Page: 243

 outward going Krystal **Spiral** comes from is the breakdown from the extra replica currents

is the Krystal **Spiral** that you could say it carried Chi, all right, or

-  of No Chi **spiral** that is a spiral that doesn't even have a relationship
-  that is a **spiral** that doesn't even have a relationship to its own center
-  is the counterclockwise **spiral** to occur, and it's through the two of them that
-  Metatron, the Fibonacci **spiral** and the lies that are told by the Metatronic teachings
-  between the krystal **spiral** and the fib of no chi spiral or the Fibonacci
-  of no chi **spiral** or the Fibonacci spiral and the numerical sequences. They haven't
-  or the Fibonacci **spiral** and the numerical sequences. They haven't given me the numeral
-  also creates counter **spiraling** currents that come back in that will allow for return.

---

Page: 244

---

-  from the other **spiral** in order to get the whole side. This is where
-  outward going Krystal **Spiral**, when it combines with the back spiral, right, at that
-  with the back **spiral**, right, at that point when they meet here, and then
-  from the krystal **spirals** coming together meeting They also activate and there is a

---

Page: 245

---

-  feeding the Krystal **Spiral**. And I do believe they call the spirals of Ah-
-  they call the **spirals** of Ah-al-aah and Aah-LAEA" and that has

---

Page: 300

 top and bottom **spirals** in each set determines the nature of the energy held  
 speeds between the **spirals** in each set. The differences between the spin numbers for  
 electric and magnetic **spirals** establish this Differential Field. These numbers are shown in the
