 larger universal level **Starfire** Cycle whenever that larger cycle takes place. And the life

Page: 22

 options out are **Starfire**-which is the natural Adashi turnaround-and that would mean

Page: 31

 what's a natural **Starfire** Cycle. So, you can go through a **Starfire** whole, or
 go through a **Starfire** whole, or you can go through it as space dust,

Page: 34

 Human Evolution & **Starfire** Potential" Inc"s: Adashi T em pies Access Key Journey -

Page: 39

 that happens before **Starfire** that, usually, there would be more time ... Starburst is
 was called the **Starfire** Cycle, where we align with the Universal Starfire Cycle. That
 with the Universal **Starfire** Cycle. That meant that we had to prepare for a
 prepare for a **Starfire**. **Starfire** is a good thing. A Starfire is an Adashi
 good thing. A **Starfire** is an Adashi Turnaround, but it could look like not
 can't go through **Starfire**; it would destroy the planet to go through Starfire. So,
 to go through **Starfire**. So, all sorts of other plans had to be made
 now aligned with **Starfire**, and the Urtha system is going into Starfire. That means
 is going into **Starfire**. That means certain things can be done here to stabilize

Page: 46

 and our evolutionary **Starfire** potential, but, like, in a long, large nutshell instead of

Page: 57

 were at their **Starfire** Cycle or they were at a Fall Evac Cycle, and

Page: 63

 that's called the **Starfire** Point, that a creation will then turn around and start

Page: 65

 til the next **Starfire** Cycle, all right. However, what I do want to do

Page: 92

 is called the **Starfire** point. The Starfire Point is, after a manifestation has moved
 Starfire point. The **Starfire** Point is, after a manifestation has moved through the Core
 that a natural **Starfire** Turn-Around is supposed to happen. That's when the matter
 together, enter the **Starfire** cycle. And what happens is you actually open the currents

Page: 103

 be becoming fully **Starfire**-able. And, that means that you would be capable of

Page: 109

 going into a **Starfire** and then Adashi Turnaround; that brings you back into the

Page: 118

 yet, through a **Starfire** Turnaround, and Adashi Return, that is the one where falls

Page: 123

 its point of **Starfire**, where it turns around, in, between 2047 and 2051. And,

Earth itself cannot **Starfire**, because there is too much grid damage. A portion of

 where it won't **Starfire** when Urtha does. But, it won't either fall or go

 does its natural **Starfire**. So, there are more, there are larger things we will

Page: 128

 moving into Adashi **Starfire**, Copvtight A"shavana & A"hzavana Deane, 2007. All Rights Reserved: Part

Page: 129

 go through a **Starfire** ... will lose bits of quantum of its own thrust.

Page: 150

 fully went through **Starfire** so they are fully Krysted beings that came in on

Page: 199

 able to do **Starfire** first of all, or even slide. But they also plug

Page: 201

 once you are **Starfire**-able, you could actually do that. But the first thing

Page: 208

 Krystar state for **Starfire** passage into the Adashi Return Cycles through the Halls of

Page: 212

 the Eyughas & **Starfire** Adashi Return Ascension When I talk about Krystar Vehicle, this

Page: 227

 turn around-enter **Starfire** and do Adashi turn-around. So it is at this

Page: 230

 through a natural **Starfire** Cycle, open up all the little Celestalline Suns and Seals,

Page: 256

 would go into **Starfire** transition and go into the Adashi Turnaround Cycles. And then

Page: 258

 call it the **Starfire** Map, that shows the interfaces of the gates and the

Page: 263

 actually do a **Starfire**, a natural Starfire turnaround to the Adashi Cycles. So, that's

 Starfire, a natural **Starfire** turnaround to the Adashi Cycles. So, that's what we're in

Page: 281

 does a natural **Starfire**. That means it disappears for a while. That interface is

Page: 285

 wave of a **Starfire** Cycle back into the Adashi Cycles. The beings and things

Page: 293

 able to do **Starfire** between 2047 and 2051. Most of us won't. Most of

 get back to **Starfire** potential. But some will be able to go during the

 going through its **Starfire**, its natural Adashi Turnaround Cycle. Next one please. Cop vnght

 able to ride **Starfire** Now it's more important then ever to get those gates

Page: 50

 we went into **Starfire** or actually when the Thothian shield fell, it chose not

Page: 53

 I would imagine **Starfire** from 2017, probably has a time limit on that Which

Page: 55

 plugs into the **Starfire** event that we are moving toward. But what I want

Page: 88

 dust return, or **Starfire** return whichever way it went, at least the consciousness would

Page: 91

 return through a **Starfire** cycle-its own Starfire cycle. And it would not be

 cycle-its own **Starfire** cycle. And it would not be just our Earth, it

Page: 115

 well up to **Starfire** - they are hoping to be able to train a

Page: 158

 talked about that **Starfire** is now going to occur. It begins its cycle 2047

 and Earth can't **Starfire**, but to be able to participate in a Starfire re-
 participate in a **Starfire** re-birth cycle, we go to Urtha. So, this is
 out and ride **Starfire** from 2047 through 2051 Starfire period. So, it's a really,
 2047 through 2051 **Starfire** period. So, it's a really, really big project that we

Page: 161

 to Urtha for **Starfire** If Spanner-? is not able to stay open-we've got

Page: 164

 into Urtha for **Starfire**, will be prevented from being taken down. The Earth body
 body itself cannot **Starfire** at this point, there's too much damage. But it can
 though they can't **Starfire** anymore and eventually will go back as space dust, you
 is capable of **Starfire** Urtha and Sala will Starfire together. And when that occurs,
 and Sala will **Starfire** together. And when that occurs, Earth and Sol, our sun,
 to go through **Starfire** rebirth. They will stay in the same place and enter
 that can do **Starfire**, when they will get out between 2047 and 2051, that
 go through into **Starfire**, this system will stay stable in Lone Star Fall Which

Page: 165

 aren't able to **Starfire** and the races that are left on this planet, they
 those who cannot **Starfire** and go through the re-birth cycle through Urtha. So

Page: 166

 a potentiality of **Starfire** re-birth. And that, the first stage of that, is

Page: 187

 preparation for the **Starfire** Cycle of 2047-2051. So, we start here with remembering

Page: 188

 to prepare for **Starfire**, that the Indigo Shield is keyed, not to Earth Shield

Page: 189

 go through a **Starfire** which means full Adashi Cycles-return cycles back into Source-
 it goes into **Starfire** And then comes back, re-birthed. And at that point
 be able to **Starfire**, but it will remain stable because of the Aquareion host

Page: 197

 Urtha during the **Starfire** cycle, the groups who have stayed with this and evolved

Page: 199

 this transition of **Starfire** is what is most important I just wanted to show

Page: 204

 were going to **Starfire** and Earth was going to fall and things like that,

Page: 233

 this planet, for **Starfire** The MCEO Freedom Teachings® Series Presented by Adashi MCEO

Page: 241

 goes into it's **Starfire** process and re-births. But it will still have free

Page: 252

 Urtha begins its **Starfire** process. That's like the star that is hosting this little

 not going through **Starfire** over there. So they will still be out, in other

 we go through **Starfire** Which means there may be the ability between 2047 and

 when our Urtha **Starfire** cycle occurs ... there may be a very good chance

Page: 253

 in an emergency **Starfire**, and they can literally pull in to from the Outer

 that go into **Starfire** go in, even if there is only like 2 or

Page: 254

 re-born after **Starfire** and after going fully back into Source. And than the

 escape route for **Starfire**, you had talked at FOL about aspects of ourselves hosting

Page: 259

 not only the **Starfire** map as it has been and to bring you up

Page: 265

 through a full **Starfire** and Re-Birth, or it wouldn't And if it didn't,

Page: 266

 on Earth through **Starfire** Because what it does is, in **Starfire**-we've talked about

 does is, in **Starfire**-we've talked about the **Starfire** process that's a natural part

 talked about the **Starfire** process that's a natural part of the Starborn process, in

 damaged. Where, at **Starfire** you have the contraction back into the next level, so

 capable of doing **Starfire** If something is not done when you have a Hosting

 is capable of **Starfire** Earth is not, anymore. [CD 1, Track 5] If

5] If Urtha **Starfires** normally, without intervention, Earth would be brought back to space goes into its **Starfire** right? Earth Can't However, what if there was a field doing its natural **Starfire** "Contraction," that matrix was on its natural "Expansion"? pop off in **Starfire**, and hold it That's what's being done here. Not just

Page: 270

so when Urtha **Starfires** and pulls in ... I mean, if Urtha Starfired and mean, if Urtha **Starfired** and pulled in and that line wasn't there, Earth's go'n

Page: 271

to try to **Starfire** So, we're not in that drama yet and hopefully we able, if after **Starfire**, this planet and some of its people, at least are means Earth can't **Starfire** anymore, it can't Re-Birth, but instead of being in the ability to **Starfire** or toReBirth, which means they can't regenerate their own quantum, its next natural **Starfire**, any space dust that's left from anything that did that of ascension through **Starfire** in the same way anymore, they can host other systems

Page: 273

implode when Urtha **Starfires** So it was something that was going to be done

Page: 274

have to, during **Starfire** It doesn't mean you have to, but I know where having to sit **Starfire** out, babysitting Earth, in order to hold the RaSh aLAe New Urtha, after **Starfire** So that is actually how we would get from Earth doing it before **Starfire**, it's a different process, but you still have to use to go, after **Starfire**, from Earth through Sirius B, up to Andromeda and over

Page: 280

get Earth through **Starfire** So, this is the class ... they warned us that

Page: 294

are calling the **Starfire** map. The Starfire map are the vertical maps that I've Starfire map. The **Starfire** map are the vertical maps that I've talked about where maps, or the **Starfire** maps. They become vertical maps because it has to do

Page: 295

maps, or the **Starfire** maps. They call them Starfire maps because that's where we They call them **Starfire** maps because that's where we need to get to if

 this is the **Starfire** body. It is the cycle that is the full expansion,

 Starfire cycle. The **Starfire** cycle is the contraction, where the full expansion of the

Page: 317

 REShaLA and a **Starfire** cycle. And this is what Urtha and Sala are going

Page: 324

 going through with **Starfire** There's also something in that we're going to need to

 done until 2047, when **Starfire** began. They are going to have to be done early.

Page: 326

 here? We got **Starfire** We also have Starburst We have Starseed, Starflame Where do

Page: 327

 do with the **Starfire** cycle. This is the creation process by which creation was

 when we do **Starfire** [next graph] That (graph) was just to remind

Page: 328

 takes us into **Starfire** This they clarified more on for me, the return cycle,

 is called the **Starfire** point. Then, you go into the cycles that are known

 is called the **Starfire** cycle. That's Adashi one. The second is called the Starlight

Page: 329

 Starborn, Starflame, Starburst, **Starfire**, Starlight, Starshine, and Sunshine. [Laughter] So, finally, we have

 would be the **Starfire** point, where we pass from the outer into the inner.

 move into the **Starfire** cycle, first we go through the Starfire point, and that

 go through the **Starfire** point, and that is called the DorAdeshai. The Door to

 go through the **Starfire** point, you enter the Starfire cycle which is Adashi-1,

 you enter the **Starfire** cycle which is Adashi-1, and you are in still

 we go through **Starfire** cycle, and I'm not sure how long these cycles exist

Page: 331

 flashpoint or a **Starfire** cycle, which allows the bodies to pull together, to open

Page: 332

 order to undergo **Starfire** So, what they were talking about, now it helps me

 was a normal **Starfire** that we were going up on, not one that was

 can ride through **Starfire**, and go to Urtha, and ride through Starfire process ...

 and ride through **Starfire** process ... some people will leave that way. Some people

Page: 333

 can ride through **Starfire** That means I guess we don't get to leave in

Page: 337

 Then, we hit **Starfire** point Starfire point is when Urtha and Sala and whenever

 hit Starfire point **Starfire** point is when Urtha and Sala and whenever our Rasha

 would have the **Starfire**, which is the fifth cycle, the Starfire cycle of the

 fifth cycle, the **Starfire** cycle of the REShaLA. That was the Adashi-1 cycle.

 this one, the **Starfire** cycle, is like the upper going home version, still in

 middle domains. So **Starfire** body, the REShaLA body, is in the Edon domains. The

 out through the **Starfire** point, through all the points there, and expands out as

 you have the **Starfire** body, the Starlight body, the Star whatever it was body

 call them the **Starfire** maps because they are what you need in order to

 order to understand **Starfire**, and in order to get where you can Starfire These

 where you can **Starfire** These are the Spanner maps as well. They have to

Page: 360

 gates that will **Starfire**, and they are holding the Sun and Earth, and they

Page: 361

 on Earth through **Starfire** and God knows how long thereafter, we are still training

 to ride the **Starfire** wave. So we will be able to go back and

 move into the **Starfire** cycles, and the Adashi cycles we get into the RESha

 will leave on **Starfire** Some of them wiii. .. At this point, anybody that's

Page: 362

 able to become **Starfire**-able, and the planet itself wouldn't be able to hold

 the Starfire cycle. **Starfire** cycle is when we go through the Starfire point and

 go through the **Starfire** point and certain levels of the RaShaLAe and RaShaLE bodies

Page: 370

 Edons, after a **Starfire**, you are in REShaLA. So you go from RaShaLAe body

 Edonic Adashi-1 **Starfire** State equals the inner RaSh ala fields/rings activation that

 level in the **Starfire**-2, equals the inner RaShala ... that's where we are

Page: 372

 Urtha after it's **Starfired**, right? Well, we don't have to tell that either. It's

Page: 398

 do a natural **Starfire** which means it is going to pull back in to
 and it can't **Starfire** anymore because of its grid damage and its host support
 through its natural **Starfire**, that is not going to leave Earth in too great
 would be a **Starfire** point, if there was enough grid damage here it would
 to survive Urtha's **Starfire** And that had to do with activating what is called
 did its natural **Starfire** and it had a dying hosted planet in its core.
 the frequencies of **Starfire** to do a full Edonic return, it would simply explode

Page: 399

 is going to **Starfire** and that means we have to activate the Gyrodome so
 can survive Urtha's **Starfire** and, you know, still hold. So we have been working
 working on the **Starfire** Mission which means preparing for when that Starfire period occurs-
 for when that **Starfire** period occurs- now that's between 2047 and 2051, that is
 as Urtha will **Starfire** Earth still needs to be prepared for that Starfire in
 prepared for that **Starfire** in order to survive it and it will. In fact

Page: 403

 back after it **Starfires** but there is a period where there is the Host
 is going to **Starfire**, so there is only a short period of time that
 to do after **Starfire**, but between now and 2047 is the only time because
 is going to **Starfire** It is going to go off for a while. It
 time of Urtha's **Starfire** And in order for that to be able to work
 can survive Urtha's **Starfire** alright Starfire is a natural process and Urtha is going
 Urtha's Starfire alright **Starfire** is a natural process and Urtha is going into that

Page: 410

 then eventually once **Starfire** is done and Urtha resumes its position in the Outer
 still capable of **Starfire** It is a Living Star Planet. I know it is

Page: 412

 a point, the **Starfire** point where they are able to access the Adashi Temples,

Page: 413

 be even after **Starfire**, we will have the 3-6-9 connection that will

Page: 416

 system when Urtha **Starfires** but it will also be a 3 dimensional functional system,

Page: 430

 the next natural **Starfire** for the Eckasha, that space dust will be drawn back

 not had a **Starfire** where they were brought back in. Their Matrix is still

Page: 443

 it through the **Starfire** process and through the process that the Solar System is

Page: 446

 the Planet through **Starfire** That they would activate it now and if they did,

Page: 452

 bit before 2047, **Starfire** period. But we are going through it now because of

 Earth through the **Starfire** period. You know it's the same concept It is just

Page: 454

 we got through **Starfire**, that could have been. We could have had a Kristiac

Page: 466

 point called the **StarFire** Point at which point full expansion has been achieved and

 expansion, then a **StarFire** Point hit where its activation of the entire RaSh a

 the Adashi. So **StarFire** is a natural condition. It has just been accelerated here

Page: 467

 can go through **StarFire**. So I'm hoping I got across to you, at least

Page: 469

 do with the **StarFire** Point. And what Urtha can do and will naturally and

 because it can't **StarFire** anymore- we can't fix it that much we can hold

Page: 495

 that is going **Starfire**, which means once that star goes Starfire, we're still hanging

 that star goes **Starfire**, we're still hanging here. What's going to hold us up?

 here, once Urtha **Starfires**, where there is still a way for ascension to come

Page: 35

 Urtha into its **Starfire**, into its Edon levels. We came out of the Edons

Page: 38

 aiming for the **Starfire** period of 2047- 2052, to where the Indigo Shield and the

Page: 39

 would be the **Starfire** path, and that is the path that Urtha is on.

 because Earth can't **Starfire** So, all of what we're doing is getting us to

 the Edons with **Starfire** Others will stay to run the nurseries. Because the bioregenesis

Page: 40

 here, after Urtha **Starfires** and 2047-2051 or 2052- that period. We will go

Page: 41

 able to ride **Starfire** with Urtha in to the Edons. So, it really depends

Page: 49

 does a natural **Starfire**, if it's still a Kristiac system, where it will take
 of doing a **Starfire**, they would take back with them the spirit of the
 wave, the next **Starfire** Wave, where the entire system went back. So, you always
 go into a **Starfire**, and into the Krystar activation, we take the memory crystal

Page: 56

 is go through **Starfire** It goes through the ascension period where it activates the

Page: 59

 Particularly when a **Starfire** cycle is going by. You don't want to miss that

Page: 62

 fortunately she will **Starfire**, so we still have that passage out, and also the

Page: 70

 is called natural **Starfire**, and turn around, so they begin the expansion process of

 we go through **Starfire**, we go from 3!3 out to respiritualizing the matter

Page: 78

 Urtha before the **Starfire** point But if those ... if there isn't anybody that

 going into natural **Starfire** The MCEO Freedom Teachings® Series Presented by Adashi MCEO

Page: 79

 The reason natural **Starfire** it doesn't harm the life field because the life field

 its natural Edon **Starfire** cycle into its Adashi cycle so, we're going to end

Page: 85

 run its natural **Starfire** system which is the ability to open those gate passages

Page: 116

 the Cycles of **StarFire**. The Aquafereion or Aquareion Matrix, the Parallel Adjacent Eckasha,
who

 going into a **StarFire** Period. They had, you know, they couldn't hold a host

 went through their **StarFire** Cycle. So they set the host, but then they had

Page: 118

 dust cycle-a **StarFire** cycle ... they come back in. But we're, anyway, we're

Page: 119

 capable of entering **StarFire** or at least some degree of it If we can't

 to ride Urtha's **StarFire** Wave out, that's ok. That's what the New Earth field

Page: 127

 to ride a **StarFire**, you need this configuration of frequencies open in the body.

Page: 142

 is the Krystar, **Starfire** State. Then there's still other states beyond that where we'd

Page: 180

 till the next **StarFire** cycle and that is a very slow accretion process. Earth

Page: 181

 get it through **Starfire** and bring it Home. But most of the crew, of

Page: 190

 Kristiac and still **StarFire** able. So there is a whole big thing going on

Page: 217

 Urtha is going **Starfire**, a natural Adashi Starfire, where it is going to pull

 a natural Adashi **Starfire**, where it is going to pull into its Adashi cycle.

 Urtha goes into **Starfire**- "cause Earth cannot Starfire So, it will hold Earth

 cause Earth cannot **Starfire** So, it will hold Earth for 250 years to allow

Page: 230

 complete. Goes through **Starfire**, goes through 3 Adashi sets and then back into Source.

Page: 294

 go into full **Starfire** In that state you would have 2/3rds, you would

 to a full **Starfire** Adashi one would be going to 2/3rds manifest and

Page: 372

 and into a **StarFire** Cycle in which you make the Turnaround and go into

 there is the **StarFire** Turnaround Cycle that takes you back into what are called

 Domains, go into **StarFire** Krystar Activation of the Rasha Bodies and it would take

 and then the **StarFire** Cycle that is a natural Ascension Cycle. Our Earth is

Page: 374

 Adashi Cycles after **StarFire** we go into the Reish aLAe, then the ReishaLEa and

Page: 375

to go through **Starfire** which is the Adashi shift to get into the Adashi-

Page: 428

 able to do **Starfire** between 2047 and 2052, that would require the 33-year-

Page: 429

 to a full **Starfire** into Adashi 1 cycles back into the Edons on the

Page: 442

 the ability to **Starfire**, which means do the Adashi turnaround and go back. Between

 star is going **Starfire** Earth, because of its damage, cannot **Starfire** It cannot do

 its damage, cannot **Starfire** It cannot do .. it would explode. That was known,

Page: 443

 It's going into **Starfire** Which means it will shift angular rotation of particle spin

Page: 444

 vaporized as Urtha **Starfires** In 223 years, this New Earth field will also go

 Adashi cycle, its **Starfire** cycle, and what is left will fall black hole status

 its natural Kristiac **Starfire** cycle. So, that's what we're in the middle of What's

Page: 450

 point once Urtha **Starfires**, Sirius B's still going to be available. You go from

 you'd go into **Starfire** with the New Ascension Earth from here. If you were

 your full Adashi **Starfire**, you would have to go back to the matrix that

Page: 453

 is where the **Starfire**- if you're going to **Starfire** in 2047-2052 and go

 you're going to **Starfire** in 2047-2052 and go home with Urtha, which means

-  going into a **Starfire** cycle, and it was known then and talked about that
 -  continue in the **Starfire** cycle and if not they would go into 3 day
 -  5 Stages of **Starfire** And what we're talking about now is not just Starfire
 -  is not just **Starfire** for Earth and for Urtha, because Earth itself cannot Starfire
 -  Earth itself cannot **Starfire** But a portion of it, a portion now can because
 -  2 of the **Starfire** cycle. That is the stage thaL and we'll cover more
 -  ends with Urtha's **Starfire** which is 2047-2052. After that there's the third stage
-

Page: 13

-  Stages of a **Starfire**, and we can get an idea of when exactly what
-

Page: 14

-  have the Urtha **Starfire** point, first Starfire point, where 2047-2052 where Urtha does
 -  Starfire point, first **Starfire** point, where 2047-2052 where Urtha does its Starfire And
 -  Urtha does its **Starfire** And that's where we were ... the Spirit Body of
 -  go into its **Starfire** Then, and that's called a ... I think I have
 -  this- the 2052 **Starfire**- and then the next one would be the Ma-Sha-
 -  cycles that a **Starfire** is about in relation to the structure of the Elum-
 -  stage of a **Starfire**, and that's called the HaRA-Krystiana Cycle, and then after
 -  on how a **Starfire** works, and it applies to the big picture but also
-

Page: 17

-  part of a **Starfire** is. At the Re-birth, a new wave of creation
-

Page: 19

-  back in and **Starfire**, where these 2 systems come back together and merge in
 -  5 stages to **Starfire**, where I'm just learning this part We'll talk more about
 -  Urtha is gonna **Starfire**, when the M-31 is gonna Star Fire. But, the
-

Page: 20

 cycle went in **Starfire**, pops back out, it is now in the Adashi Cycles
 it through a **Starfire**, so we need to know. Before, we were trying to
 it through a **Starfire** and they were hoping we would. If they could not
 the point where **Starfires** happen, and Turn-Around occurs, where you come back out
 1st part of **Starfire** you have, when the new wave comes out to the
 they hit their **Starfire** point, we go back in, fully back into Source. And,

Page: 21

 in, a full **Starfire** cycle, where you can literally pull this one and this
 is preparing for **Starfire** between 2047 and 2052. And, it is preparing for Starfire
 is preparing for **Starfire** because it is progressively doing a rapid Eiradonis Integration. And,
 part of the **Starfire** process of the pulling in together of the Veca and

Page: 22

 is going to **Starfire**, do its Starfire before the AquA"elle part The AquA"elle part
 Starfire, do its **Starfire** before the AquA"elle part The AquA"elle part goes two hundred

Page: 26

 a full system **Starfire** And I don't know yet about the ellipticals, but as

Page: 28

 progress to a **Starfire** and regenerate its natural system to bring it out of

Page: 29

 31 system, will **Starfire** in 2047-2051. That's okay. Because it will leave theA
 go into the **Starfire** path. Ascension Earth is the A level. That is the

Page: 30

 is going into **Starfire**, where it will pull into the center, and we can

Page: 33

 Stages of the **Starfire** Cycle, and how that works, and where exactly are we

Page: 35

 the stages of **Starfire** and see what that connects to So I'll start with

Page: 36

 they're already both **Starfired**, right. It's opening a tractor beam into the Milky Way
 end of the **Starfire** Stage 3 HaRA-Krysta Cycle in 2230AD. That's what's called

 That's what's called **Starfire** Point number 2. And that is the Ascension of the
 natural process of **Starfire** So then we can understand what .. get an idea

Page: 37

 Aquinos Urtha will **Starfire**--it'd do the Starfire-1, what's called the Starfire-1--
 it'd do the **Starfire**-1, what's called the Starfire-1--between 2047 and 2052,
 what's called the **Starfire**-1--between 2047 and 2052, and the Universal, what is

Page: 41

 to do the **Starfire**-1 point. So between 2047 and 2052 these are going

Page: 60

 stage 1 of **Starfire** that we just introduced this past week, what was it

Page: 70

 stages of the **Starfire** cycle. They're quite complex. They just showed us that for

Page: 74

 good. Stage 1 **Starfire** But now we're going into the Testing Cycle. And I

Page: 75

 is going into **Starfire** in order to cut this loose, so this doesn't take

Page: 77

 phase of the **Starfire** cycle. It gives you an idea of what the stages

Page: 81

 long time Urtha **Starfires** This is actually the first stage of Starfire This is

 first stage of **Starfire** This is the first Starfire point, and that's where the

 is the first **Starfire** point, and that's where the M31 system pulls into the

Page: 82

 3233 is where **Starfire**-3 occurs. And then we go on to Stage-5,

 is the 4th **Starfire** point That's when we go into the center and that's

Page: 97

 a Vector-4 **Starfire** Cycle doesn't involve as much energy as a Vector-1

Page: 104

 to do a **Starfire** Ascension. But, these little dots here, the hairy balls. I

Page: 116

 the Stage Two **Starfire** Cycle would begin for M31 and Sha-La that are

Page: 123

 half Stage Two **Starfire** Cycle, when the M31 and Sha-La Hosters, those ones

Page: 131

 of Stage Two **Starfire** Cycle, and that is the part where we've already engaged

Page: 136

 the Stage Two **Starfire** Cycle, and it is the Gha-Far Body that has

Page: 147

 natural process of **Starfire** ascension, when you get to the halfway point of Stage

Page: 148

 the Stage 2 **Starfire** Cycle, which ends in the first fold, the Ma-Sha-

 by which a **Starfire** Adashi Return occurs. So ... we've just discovered, or been

Page: 152

 "Through the **Starfire** Stage 2, Part 1 Bharda Cycle, the Gha-Fa" Body"

Page: 154

 Twin. "Through **Starfire** Stage 2, Part 1, Bharda, the Gha-Fa" wave downloads

 you. "Through **Starfire** Stage 2, Bharda, the Gha-Fa" wave downloads into the

Page: 155

 point of the **Starfire** Stage 2 Cycle, the Atomic Body has reached a point

Page: 156

 natural part of **Starfire** and it is part of going into the Krystar State,

 of Stage 2 **Starfire** And at the end of that, when you become a

Page: 157

 half Stage 2 **Starfire**, or if the being did not fulfill the Stage 1

 2 of the **Starfire** Cycle. And that is where you get the GhaFar Body

Page: 160

 engage Stage 2 **Starfire**, Part 2, Ma-Sha, to fulfill Transfiguration. Once the elemental

Page: 162

 engages its own **Starfire** Cycle." Then it will ride home as space dust with

Page: 163

 Earth would enter **Starfire** Stage 2, Part 1 Bharda, enabling them to catch the

 you enter a **Starfire** Cycle to do an Adashi Return and then there are

Page: 16

 that is the **Starfire** turnaround point, where the process ... there's a whole process

 out into a **Starfire** Cycle, or, if you finish an Adashi Cycle, once you

 once you do **Starfire** Krystar activation, go through Adashi Cycle, once you get back

 part of the **Starfire** process. So, it's happening with our Universe, not just with

Page: 47

 the Stage 1 of **Starfire**, and if you don't make it through Stage 1 and

Page: 50

 cannot go through **Starfire**, it will eventually go into a fall situation. And, it
 in the next **Starfire** Wave in the living system. There are systems offall groups

Page: 51

 through a full **Starfire** and a full Adashi Return and have come back as

Page: 52

 we could not **Starfire**, because you could not pass into the center unless there

Page: 53

 back out, into **Starfire** and go back, and come into the Adashi Cycles. When

Page: 56

 into a natural **Starfire** Cycle. So, Urtha's here. Earth, through many years-since 550

Page: 57

 hold the full **Starfire** frequencies where you could go to Urtha, which is the

Page: 59

 able to eventually **Starfire**, will go into self-contained quarantine, and it's something that

Page: 76

 whole system can **Starfire**, regenerate itself, rebirth, and eventually evolve out of this system

Page: 89

 align with the **Starfire** Cycle because Urtha is going on a Starfire Cycle which
 going on a **Starfire** Cycle which means this is going to Starfire right, which
 is going to **Starfire** right, which means this if it's going to do anything
 that system. The **Starfire** of Urtha I believe is 2047 to 2052. Right after
 where once this **Starfires**, the Ma-Sha-Yah which is the Bi-location Body,
 the AdorA side **Starfires**. And when the AdorA side Starfires, the EtorA side's Mah-
